21. (Extension of the Long Beach Breakwater - War Department - Corps of Engineers) The Commission was informed that at the present time the War Department Corps of Engineers is studying the feasibility of extending the San Pedro-Long Beach breakwater from its authorized end 9,000 feet offshore from the Los Angeles-Orange County boundary a distance of 11,200 feet south-easterly and parallel to the coast line. This extension would include the submerged lands in front of Seal Beach to a point offshore from Anaheim Bay.

The Commission was further informed that preliminary estimate of the Corps of Engineers is that the extension cannot be economically justified unless the State or local interests provide fifty percent of the total estimated cost of \$10,700,000.00.

Upon motion duly made and unanimously carried, a resolution was adopted authorizing the sponsorship of a favorable report to the Governor and the Legislature that the State participate in the cost of the breakwater extension to the extent of one-half of the estimated cost and not to exceed \$5,000,000.00, said funds for such State participation in the project to come from one-half of the monthly oil revenues accruing in the State Lands Act Fund from developments made possible by the construction of the breakwater. Any revenues derived from development from the upland are not to be included in funds to be made available for the participation. In any event, there shall be no participation by the State unless it is finally determined that the submerged lands are in fact owned by the State, and the amount of money finally determined upon to be spent by the State be concurred in by the State Lands Division.
