APPLICATION FOR DREDGING PERMIT, SOVEREIGN LAND OF SAN JOAQUIN RIVER, EMPIRE TRACT AREA, SAN JOAQUIN COUNTY; DEPARTMENT OF WATER RESOURCES - W.O. 4381.

An application has been received from the Department of Water Resources for a permit to dredge in an area of submerged land in the bed of the San Joaquin River in the vicinity of Empire Tract, San Joaquin County.

The dredged material will be used for the construction of a test levee section on the landward side of the existing Empire Tract levee. It is estimated that 15,000 cubic yards of material will be removed from the channel of the San Joaquin River. There are approximately 7 acres of sovereign lands to be dredged.

Section 6303 of the Public Resources Code states, in part, that the Commission may grant the privilege of removing material from beds of navigable rivers owned by the State for improvement of navigation, reclamation and flood control, upon such terms and conditions and for such consideration as will be in the best interests of the State.

Statements of nonobjection to the proposed dredging operations have been received from the Department of Fish and Game, from the Division of Beaches and Parks, and from The Reclamation Board.

The U. S. Corps of Engineers has issued a permit authorizing the conduct of dredging operations at the location described in the application.

IT IS RECOMMENDED THAT THE COMMISSION AUTHORIZE THE EXECUTIVE OFFICER TO ISSUE TO THE DEPARTMENT OF WATER RESOURCES A PERMIT TO DREDGE 15,000 CUBIC YARDS OF MATERIAL, WITHOUT PAYMENT OF ROYALTY, FROM SOVEREIGN LANDS IN THE BED OF THE SAN JOAQUIN RIVER, THE PERMIT TO BE EFFECTIVE UNTIL DECEMBER 31, 1962.
