## CALENDAR ITEM

29.

APPLICATION FOR PROSPECTING FERMIT FOR GEOTHERMAL ENERGY, LAKE COUNTY; 5. I. CORPORATION - W.O. 5337.

An application has been received from the S. I. Corporation, a California conjunction, for a permit to prospect for geothermal steam, for all minerals other than oil and gas, and for mineral waters on 600 acres more or less of submerged lands underlying Clear Lake in portions of projected Section 36, T. 14 N., R. 8 W; projected Sections 31 and 32, T. 14 N., R. 7 W.; projected Section 1, T. 13 N., R. 8 W.; and projected Section 5, T. 13 N., R. 7 W., M.D.B.& M., Lake County.

The Department of Fish and dame and the Water Pollution Control Board each have requested that certain provisions be included in the prospecting permit form. The substantive content of these requests has been met. The Division of Beaches and Parks was contacted in connection with the application, and has submitted a letter of nonobjection.

Section 65/1 of the Public Resources Code provides for the issuance to a qualified applicant of a prospecting permit for lands which are not known mineral lands.

Two exploratory wells for geothermal steam have been drilled in Section 5, T. 13 N., R. 7 W., M.D.B.& M.; one was abandoned and the other suspended pending further testing. An active campaign to lease steam rights has been under way in this area.

The Caysers steam field, the Sulphur Bank steam field, and the Little Gaysers steam field bave been discovered in the past few years in the area approximately 16 miles southwesterly of this proposed permit area. Facific Cas and Electric Company has recally expanded its steam plant at The Jeysers. It has been reported that the capacity of the expanded plant is 27,500 KW, and that Incific Cas and Electric Company plans to construct a 12,500 KW plant in the viganity of the Sulphur Bank field.

The applicant proposes to prospect for goothermal steam, to be used to produce electric energy; as a by product of this operation was minerals and fresh water may be produced.

The subject parcel lies in the bed of Clear lake and a portion is adjacent to the lake's southern shore. The applicant possesses upland drillsites and proposes to drill an exploratory well by slant drilling from this drillsite.

A field reconnaissance of the area has established that the land sought is not known to contain comparcially valuable deposits of miseral. The statutory filing see of \$5 has been paid, and the permit fee of \$500 has been deposited by the applicant.

The office of the Atter by General has advised that the permit complies with the applicable provious of law and the riles and regulations of the Commission.
