## APPLICATION FOR EXEMPTION FROM BIDDING PROCEDURE

APPLICANT: City of Beverly Hills

LOCATION: City of Beverly Hills

PROPOSED USE: The City of Beverly Hills proposes to lease 49 parcels of City land to Standard Oil Company of California, and has requested exemption from the bidding procedures as authorized by the Public Resources Code.

## PERTINENT INFORMATION:

1. Forty eight (48) separated parcels contain a total of 64.68 acres and are small in size; the average size of each is 1.35 acres.
2. The remaining parcel contains 22 acres. Standard Oil Company of California has under lease the land surrounding the parcel, and has established production 600 feet from the parcel. There exists a continuity of structure between the parcel and surrounding wells, and additional wells are proposed. Drainage is therefore imminent if not actual.
3. Only one operator (Standard Oil Company of California) is in a unique position to develop the parcel by pooling with surrounding leases. Other operators do not have the pass-through rights necessary to develop the parcel economically with the surrounding leases.

## STAFF DETERMINATION:

1. It would not be practical to follow competitive bidding procedures for forty-eight separated parcels by reason of their small size.
2. The remaining parcel, from which drainage is imminent, can be developed economically at this time by only one operator.
