During consideration of Calendar Item 4 attached, Deputy Attorney General Warren J. Abbott, on behalf of the Office of the Attorney General, requested that the Commission defer action on this item until the Environmental and Consumer Protection Unit of the Attorney General's Office has had an opportunity to review the environmental impact report.

Al Rutsch, Assistant Executive Officer of the Wildlife Conservation Board, informed the Commission that the Board is anxious to have this item approved as they will benefit from the project.

Bill Chidlaw, Attorney, representing Star Harbor Company, reported that his client is ready to go forward on the project, the application for which has been pending for almost two years. Star Harbor Company has received all required agency approvals, and, on their behalf, Mr. Chidlaw requested that Commission approval not be delayed.

Upon motion duly made and carried, the following resolution was adopted:

This rental schedule reflects the applicant's construction schedule. Royalty \$0.10/Cu. Yd.

BASIS FOR CONSIDERATION:

U.S. Army Corps of Engineers permit issued.
California Tahoe Regional Planning Agency approval obtained.
Applicant is owner of upland.

STATUTORY AND OTHER REFERENCES:

- a. Public Resources Code: Division 6, Parts 1 and 2.
- b. Administrative Code: Title 2, Division 3, Articles 1 and 2.

OTHER PERTINENT INFORMATION:

- 1. The applicant has provided an environmental statement which has been circulated to agencies and persons with jurisdiction and expertise. A volume of adverse comments has been received, most of which has been incorporated in the environmental impact report.

The principal problems appear to be the lack of detailed factual evidence upon which to base an opinion of impact, and the approvals of various agencies being obtained without the environmental questions being answered. The applicant is asking for Commission approval now, with these problems left not satisfied to the degree which

agencies concerned with water quality require. The lease terms will prohibit pollution of the waters of Lake Tahoe; and the State Water Resources Control Board retains control on construction and operation of the marina.

2. The project, according to the applicant, is an integrated one with the residential development on the upland. However, while the Tahoe Regional Planning Agency has indicated that further review of the marina proposal is not required, it has thus far refused to permit the construction of 100 units on the upland, now zoned for recreational use. Approval of the lease on the marina, therefore, will permit the construction of a marina for which there may never be full use by the applicant. If, however, the upland should be developed for recreational use, the marina would be available for public use. It would not appear to be in the public interest, however, to postpone or deny this application until the basic land-use conflicts can be settled. The public launching ramp needs the protection afforded by the proposed breakwater extension. It is therefore recommended that a lease be issued allowing construction of the marina, with review by the Commission of the lease after five years as to termination or amendment of the lease if, at that time:

- a. the upland units are not approved by the Tahoe Regional Planning Agency; or
- b. the Homeowners' Association has not adopted specific by-laws, restrictions or other effective regulations dealing specifically with the "use pollution" problems discussed in the environmental impact report; or
- c. a reassessment of the effects upon water quality and shoreline processes after construction of the marina shows a significant detrimental environmental effect.

If the applicant's assertions of no ill effects bear out, the lease could be allowed to continue. If not, the applicant will be required to remove the structure or mitigate or correct the ill effects.

3. The applicant intends, after completion of construction, to assign the lease to the Homeowners' Association.

EXHIBITS:

- A. Land Description.
- B. Location Map.

2.
