7.

APPROVAL OF NEW WELL "STATE 91" MZU-910,  
STATE OIL AND GAS LEASE PRC 91.1,  
HUNTINGTON BEACH OFFSHORE, ORANGE COUNTY;  
SIGNAL OIL AND GAS COMPANY

Signal Oil and Gas Company has submitted an application to drill a new injection well from an onshore location under State Oil and Gas Lease PRC 91.1, Orange County.

The proposed well is part of the plan for secondary recovery operations approved by the Commission on April 28, 1966 (Minute Item 23, page 12559), and also included under the Main Zone Unit Agreement approved by the Commission on March 30, 1972 (Minute Item 8, page 170).

The well will be drilled from an onshore screened site designed for minimum visual impact upon the area. An eight-foot slump-stone wall encloses the site, and, upon completion of drilling activities, no equipment or production facilities will be visible.

The drilling and completion programs have been reviewed by the State Lands Division, and have been determined to be in accordance with good engineering practices and the rules and regulations of the Commission. The State Division of Oil and Gas has approved the drilling of this well. Further, the well will be subject to any additional requirements as specified by the South Coastal Regional Commission.

Engineering and economic evaluations indicate that deferral of approval of the proposed well would cause an ultimate loss of natural resources and income to the State.

EXHIBIT: A. Location Map.

IT IS RECOMMENDED THAT THE COMMISSION AUTHORIZE THE APPROVAL OF DRILLING AND COMPLETING NEW WELL "STATE 91" MZU-910, IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF STATE OIL AND GAS LEASE 91.1; SIGNAL OIL AND GAS COMPANY, LESSEE, AND THE RULES AND REGULATIONS OF THE COMMISSION.
