PERTINENT INFORMATION:

Burmah has initiated a full-scale waterflood operation. Production performance clearly indicates that the program has been successful, resulting in an economic advantage to the State.

In order to maintain a coordinated and uninterrupted secondary recovery development program, Burmah has submitted an application to drill "State 392" J-251, as a producing well.

The proposed well is part of the plan for secondary recovery operations approved by the Commission on November 6, 1963 (Minute Item 21, page 9362). An environmental impact report is not required as this is an ongoing project. The surface location of this well is on the uplands.

The proposed drilling and completion programs have been reviewed by the Division and determined to be in accordance with good engineering practices and the rules and regulations of the Commission. The Division of Oil and Gas has approved the drilling of this well. The proposed well is part of the plan of development exempted from permit requirements by the South Coast Regional Commission.
