APPROVAL OF PROPOSED REDRILLING OF  
WELL "STATE 392" S-131,  
EXCHANGE OIL AND GAS LEASE E 392,  
HUNTINGTON BEACH OFFSHORE, ORANGE COUNTY

LEASE: E 392.

LESSEE: Burmah Oil and Gas Company  
P. O. Box 191  
Huntington Beach, California

COUNTY: Orange.

AREA: Huntington Beach Offshore Field.

PERTINENT INFORMATION:

Burmah has been actively developing and water-flooding the Upper and Lower Jones Zone intervals, throughout the Huntington Beach Offshore Field.

The proposed redrilling of idle well "State 392" S-131 will provide a necessary additional water injection point into the Upper Jones interval of Fault Block 16. The well will be renamed "State 392" UJ-258, when recompleted.

Burmah estimates that this work should result in increasing oil recovery by 432,000 barrels. Production response to the water injection should begin to occur after about a year so it is essential that this proposed redrilling be done as soon as possible.

This proposed redrill work is a part of the plan for secondary recovery operations, approved by the State Lands Commission on November 6, 1963 (Minute Item 21, page 9362).

An environmental impact report is not required as this is an ongoing project. The surface location of this well is on the uplands.

The proposed drilling and completion program has been reviewed by the Division and found to be in accordance with good engineering practices and the rules and regulations of
