CUTTING BOUNDARY AGREEMENT

On March 25, 1976, the State Lands Division received a proposed Cutting Boundary Agreement from the U. S. Department of Agriculture, Forest Service, Modoc National Forest, Alturas, California, Modoc County.

The agreement proposes to establish, for timber cutting purposes only, a cutting boundary line between land owned by the State of California and the United States. The proposed agreement has the effect of identifying for timber cutting purposes, the property line dividing State of California lands from those claimed by the United States.

The U. S. Department of Agriculture, acting by and through the Forest Supervisor, Modoc National Forest, desires to harvest timber on lands situated within T46N, R11E, M.D.B. & M., adjacent to State land. The official Public Land Survey corners required to determine the location of the boundaries were not recovered and cannot be reset without an unduly prohibitive expenditure of time and funds. As a means of expediency, cutting boundary monuments have been set on the ground by the U. S. Department of Agriculture, Forest Service.

The proposed Cutting Boundary Agreement has been reviewed and approved by the Division.

A copy of the proposed agreement is on file in the Office of the State Lands Division, and by reference made a part hereof.
