ACTUAL REVENUE FOR 1980-81 AND REVENUE ESTIMATES
FOR 1981-82 AND 1982-83

Supplemental language to the 1980-81 Budget for the State of California affects Item 232, giving the following directive to the State lands Commission:

"The State Lands Commission shall report semiannually to the Legislature and the Governor on its actual revenue during the past fiscal year, revenue to date in the current year, and estimated revenue in each of the next two years. For each major oil, gas or geothermal property or producing zone, the reports shall include production levels, prices, costs, taxes or payments deductible from gross revenue, and the percentage of net profits or royalty to the State. The report shall state important assumptions and discuss any factors which may significantly affect revenue for the next five years."

In compliance with this directive, the staff has prepared a report for these years as shown on the attached Exhibit "A".

EXHIBIT: A. Revenue Detail - Actual and Forecast.

IT IS RECOMMENDED THAT THE COMMISSION:

1. APPROVE THE REPORT COVERING ACTUAL REVENUE FOR 1980-81 AND THE ESTIMATES FOR FUTURE YEARS AND AUTHORIZE ITS PRESENTATION FOR THE STATE LANDS COMMISSION REVENUE REPORT TO THE STATE LEGISLATURE AND THE GOVERNOR.

S 27, 31

EXHIBIT "A"

ESTIMATED REVENUE

	<u>Actual Revenue</u> 1980-81 FY	<u>Estimated Revenue</u> 1981-82 FY	<u>Estimated Revenue</u> 1982-83 FY
<u>Oil & Gas</u>			
L.B. Operations	385,157,755	370,000,000	370,000,000
Statewide (Incl. Tract 2)	<u>89,918,674</u>	<u>120,000,000</u>	<u>140,000,000</u>
Total (Subject to Section 6217 PRC)	475,076,429	490,000,000	510,000,000
<u>Geothermal</u>	5,429,671	7,000,000	10,000,000
(General Fund)			

These revenue estimates are based on extrapolated oil and gas and geothermal production rates, prices, and operating costs. Applicable royalty percentages are adjusted for projected production rates. For net profits sharing contracts expenditures are included for anticipated investment projects, increases in fluid production and injection rates, and the level of support activity.

Major assumptions are:

1. That crude oil prices will not increase during the remainder of the 1981-82 year. Price escalation was started at the first of the 1982-83 year and resulted in a 10% increase by the end of that year.
2. That in the Long Beach Tidelands a legal resolution will not become final on the issue as to whether expenditures of approximately \$10,000,000 by the City of Long Beach to fill purchased land may be reimbursed as subsidence cost during this two-year period.
3. That in the Long Beach Tidelands net profits contracts the operating cost will escalate at 10% per year.
4. That production rates at Platform Holly (Leases PRC 3120 and 3242, South Ellwood Field) from the Monterey Zone will increase through the remainder of the 1980-81 year as production facilities capacity is increased, and that production will be shut in for 90 days in August to October 1981 to finally improve and complete

MINUTE PAGE	<u>1537</u>

facilities upgrade with production rates peaking thereafter limited only by emission standards.

5. That production rate decline on other developed Statewide oil and gas leases will be controlled by continued drilling from locations cleared by the Commission.
6. That electrical generation prices utilizing geothermal steam will remain at 26.3 mills/Kw in 1981.
7. That electrical generation prices utilizing geothermal steam will escalate to 30 mills/Kw in 1982.
8. That electrical generation prices utilizing geothermal steam will be escalated at 10% per year thereafter.
9. That electrical generating unit No. 17 at the Geysers Geothermal Field will come on line in August 1982.

The factors that could have the most significant impact on revenue in the next five years would be:

- A. Changes in future oil, gas and geothermal steam prices and the relationship between oil price increases and cost inflation in the Long Beach net profits contracts.
- B. Application of windfall profit tax provisions to State and local governmental agencies in the Long Beach net profits contracts.
- C. Resolution of the subsidence cost reimbursement issue with the City of Long Beach as to the filling of purchased lands.
- D. Determination of the legality of present Los Angeles County mining rights assessment practices.
- E. Continued oil and gas exploration and development on Statewide leased lands.
- F. Continued leasing and development of Statewide lands with oil and gas resources potential.
- G. Continued leasing and development of Statewide lands with geothermal resources potential.
