AUTHORIZATION TO CONTRACT FOR THE  
PREPARATION OF AN EIR FOR  
POTENTIAL RESUMPTION OF DRILLING ON  
FORMER STATE OIL AND GAS LEASES P 2198 AND P 2207  
SANTA BARBARA CHANNEL, SANTA BARBARA COUNTY

On June 29, 1979, the Department of the Interior held OCS Lease Sale No. 48. Included in this sale were several parcels which received very large bids and are located in the vicinity of unleased State-owned submerged lands in the Santa Barbara Channel near Pt. Conception. These parcels were formerly leased under State Lease P 2198 and P 2207. Federal Lease P 0318 which is located in close proximity of the State parcels received a bid in excess of \$53 million or \$37,280 per acre. These OCS leases were issued with a flat 16 2/3 percent royalty.

P.R.C. Section 6871.3 provides a relevant part: "Whenever it appears to the Commission that it is for the best interest of the State to lease lands subject to the provisions of Sections 6871.1 or 6877 of this Code for the production of oil and gas therefrom, the Commission may, subject to the provisions of Section 6871.4 offer the same for bidding at such times and such parcels as the Commission shall determine to be in the best interests of the State."

It cannot be determined at this time that it is in the best interest of the State to lease these lands for oil and gas development.

An EIR has not been completed. The State Lands Commission will serve as the Lead Agency in the preparation of the EIR. In this regard staff proposes to: (1) issue a Request for Proposal (RFP) for the preparation of an EIR; (2) to determine the best qualified consultant to prepare such a report; (3) execute a contract for such services; and (4) to provide for the reimbursement, by the successful bidder to the State, of staff and consultant costs associated with this environmental analysis.
