Central Valley, California 96019

AREA, TYPE LAND AND LOCATION:
25.17 acres, more or less, of State school

for development into a community park.

On August 25, 1981, the State Lands Commission
received a purchase application covering
the 25 acres located in the NE $\frac{1}{4}$ of Section
26, T33N, R5W, MDM. The applicant, by letter
received January 20, 1982, formally offered
\$100,000 for the 25.17; The fair market
value established by staff appraisal.

A staff review shows that the land is not
suitable for cultivation without artificial
irrigation and therefore may be sold under
the rules and regulations and at a price
fixed by the Commission.

64. Does the project have impacts which are individually limited, but cumulatively considerable?

65. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

III. DISCUSSION OF ENVIRONMENTAL EVALUATION

II. A. 2. Construction of parking area, bicycle motocross track, and, possibly, a municipal plunge. Levelling of earth for playing fields.

D.20. Most existing shrubbery on the site will be removed (mostly manzanita); some trees will be cut. Department of Fish and Game advises that no rare plants exist at the site.

D.22. Turf and barrier landscaping will be introduced.

E.24. Some animal species may be displaced. Department of Fish and Game advises that this occurrence does not pose a serious problem; no rare or endangered species inhabit the project area.

F.28. Public gathering and competitive sports may cause an increase in noise levels. The area residents have lived with a Little League park for many years with no complaints; there will be greenbelt areas on Rose Avenue and Lake Boulevard, which substantially buffer noise.

G.30. Night lighting will be oriented to avoid glare into residential properties; retention of digger pines will help screen pole structures.

H.31. From natural open space to public park (open space/recreational).

(continued on attached sheet)

IV. DETERMINATION

On the basis of this initial evaluation:

I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A NEGATIVE DECLARATION will be prepared.

I find the proposed project MAY have a significant effect on the environment and an ENVIRONMENTAL IMPACT REPORT is required.

SUPPLEMENT A

Project Description

The project involves the development of 22 1/2 acres of State-owned land in Shasta County for the construction of public park facilities.

Immediate construction plans involve a BMX (bicycle moto-cross) track on approximately 3 - 5 acres. Track facilities will include a small grandstand, outdoor lighting, restrooms, and a parking area. The BMX facility is to be fenced.

Future expansions for the remainder of the parcel include several baseball fields, a soccer and rugby field, a general-use park with picnic tables and barbeque facilities, and possible construction of municipal plunge. Plans also include a small Indian museum located in the general-use park area.

The parcel is bordered on the north by Shasta Dam Boulevard (I-151); on the east by Sacramento Street; on the south by Rose Avenue; and on the west by commercial structures and private residences (beyond Lake Boulevard). Beyond Shasta Dam Boulevard is Summit City School and vacant State-owned land; beyond Sacramento Street is an existing Little League baseball facility and vacant State-owned land; beyond Rose Avenue are private residences.

The project will involve the removal of some existing trees and vegetation, and ground clearance for recreational facilities.

Discussion of Environmental Evaluation (cont.)

- I.32. Short-term construction and long-term operational utilization of water and power resources will be minimal.
- M.37. Much of the traffic generated will be single-car families and will be dispensed over the day and evening. Team events may produce 50 or more vehicles for players and spectators which may produce congestion, especially following games. If the facilities attract sufficient vehicular traffic, safety can be improved with channelization, including left turn pockets on Shasta Dam Boulevard, and signing. To avoid disruptions in the residential neighborhood, manned traffic control could direct traffic from games to Shasta Dam Boulevard for distribution.
- M.38. A parking area is proposed; capacity as yet undetermined.
- M.42. Caltrans has plans for pathways on Shasta Dam Boulevard which are primarily for the benefit of the Summit City School children, but which would also provide safety for park users. Sacramento Drive to the south, and Rose Street have very light traffic with concomitant low hazards for bicyclists and pedestrians. Pathways on these County streets could be constructed at some future date if traffic volumes warrant.
- N.44. Whenever public gatherings occur, the probability for law enforcement needs increases.
- N.46. This park may decrease pressure on other area parks and recreational facilities.
- N.47. Maintenance of the park itself.
- O.49. Fuel involved in construction activities and electricity for night lighting are the major energy demands.
- R.59. Modification from natural area to public park with recreational facilities. Ample remaining natural areas and landscaped grounds should offer an aesthetically pleasing area.
- S.60. Park will augment area's recreational opportunities.
- T.61. An archaeological records search is currently being conducted by C.S.U. Chico. Results pending. Site clearance is expected.
