OTHER PERTINENT INFORMATION:

1. Pursuant to the terms of BLA 150, Novato Center reserved an easement to extract 500,000 cubic yards of fill material from the State's Parcel B. The fill is to be used to raise the elevation of the Novato Center parcel for construction of a regional shopping center. The resulting pond, to be created by the extraction, will serve as a holding pond for flood control and water purity, together with other environmental concerns.

As a condition to the transporting of fill across the Northwestern Pacific Railroad tracks from State-owned lands to the Novato Center parcel, the railroad required that a temporary electric crossing gate be installed. Pacific Gas and Electric Company, at their sole expense, has provided power for the gate.

The developer of the property, E. W. Hahn, has been delayed with his construction schedule due to extended negotiations
