APPROVAL OF THE SIXTH MODIFICATION
OF THE 1982-83 PLAN OF DEVELOPMENT
AND OPERATIONS AND BUDGET
LONG BEACH UNIT, WILMINGTON OIL FIELD,
LOS ANGELES COUNTY

The City of Long Beach has requested that the 1982-83 Plan of Development and Operations and Budget, Long Beach Unit, be modified to provide for a new communication system for Unit operations. The estimated cost would be provided by a budget augmentation of \$260,000.

Because of deteriorating condition of the underwater communications cables to the islands, the age of the tele-typewriters used on the system for well testing and the possible need for a more advanced system, the Field Contractor and City of Long Beach had requested such a system in the 1982-83 Plan and Budget. This project was removed from the Plan and Budget by the First Modification until actual requirements could be better determined based on needs which might or might not arise from the results of the Haskins and Sells audit and recommendations for a data base management system.

It has now been determined that a microwave system would best meet all possible future demands and yet be most economical even if a less sophisticated system is required. Because of the time required for permits, it has been requested that this project be started as soon as possible. The estimated cost of the system including links to the City and State is \$250,000. Investment Budget Item Communications Systems would be augmented by \$250,000 by this Modification and Administrative Expense by \$10,000.

IT IS RECOMMENDED THAT THE COMMISSION APPROVE THE SIXTH MODIFICATION OF THE PLAN OF DEVELOPMENT AND OPERATIONS AND BUDGET, LONG BEACH UNIT, (JULY 1, 1982 THROUGH JUNE 30, 1983).
