EXHIBIT A

EXECUTIVE OFFICER'S REPORT
BY

CLAIRE T. DEDRICK
EXECUTIVE OFFICER
JUNE 23, 1983

The Regents of the University of California - PRC 6190.9

At its meeting on April 28, 1983 (Minute Item 14), the Commission authorized issuance to the Regents of the University of California of a five-year General Permit - Public Agency Use, covering two 0.007-acre parcels of submerged lands in Lake Tahoe, one parcel located in each of the Counties of El Dorado and Placer, for the placement and maintenance of two atmospheric sampling station buoy facilities.

The University is conducting a program to monitor the Lake Tahoe Basin ecosystem. The facilities will be utilized in the program to collect the atmospheric contribution of nitrogen and quantify the precipitation falling on the surface of Lake Tahoe. Nitrogen is an essential nutrient in the life cycle of algae growth, which is rapidly increasing to the detriment of the life of the lake.

The University has asked to move the sampling facilities to a better site.

This project is exempt from CEQA pursuant to 2 Cal. Adm. Code 2905(c), Class 6(5) which exempts projects utilizing monitoring devices for information collection. All other terms and conditions of this permit are to remain unchanged and in full force and effect.

I have authorized staff to make the appropriate revision to Section 3 of this permit to show the permittee's preferred site located northerly of the City of South Lake Tahoe.
