Indirect Source Review:

The proposed project is estimated to generate 17,283 grams of carbon monoxide per day. Under the Indirect Source Review Ordinance, the project is required to provide a mitigation for 150% of the emissions or 25,924 grams per day.

Proposed Mitigation:

The applicant proposes to construct a transit shelter adjacent to the project site to enhance public transit service and encourage ridership. Staff feels the proposed mitigation measure is appropriate and adequate for off-setting the air quality impact.

Parking:

Staff feels the proposed parking plan is adequate for the proposed project.

Staff Comments:

The existing Marina site has no organized parking, exhibits severe erosion and drainage problems and is in need of overall repair.

The proposed projects within the Master Plan will provide for organized parking, control of drainage and erosion problems and increased recreational use by the general public.

Mitigation Measures Proposed:

Erosion and Drainage Control: The applicant has proposed to stabilize and revegetate both the Marina and Pino Grande parking lot sites. Drainage and infiltration facilities will be installed to control runoff from the existing and proposed areas of pavement.

Mitigation Measures Proposed (continued):

Traffic: The applicant is proposing to construct a transit shelter adjacent to the project site to enhance public transit service and encourage ridership.

Finding:

In accordance with Section 15083 of the Guidelines for the implementation of the California Environmental Quality Act of 1970, I have reviewed the applicant's documents and have concluded that the applicant's request WILL NOT HAVE A SIGNIFICANT EFFECT ON THE ENVIRONMENT and the preparation of an Environmental Impact Report is not required.

Additional details on the proposal and copies of this Negative Declaration are available at the CTRPA office.
