APPROVAL OF A
COMPROMISE TITLE SETTLEMENT AGREEMENT
NEAR REDWOOD CITY, SAN MATEO COUNTY

APPLICANT: Ideal Basic Industries, Inc.

A title dispute exists between the State in its sovereign capacity and Ideal Basic Industries, a Colorado corporation ("Ideal"), concerning ownership of a 120-acre parcel of real property, located near Redwood City, San Mateo County. The property is at the junction of Redwood Creek and Westpoint Slough. The real property is referred to as the cement plant tract, and is described in Exhibit "A", and depicted on Exhibit "B".

Ideal is the record owner of the cement plant tract as successor-in-interest to a State patent which characterized the cement plant tract as swamp and overflowed lands.

Ideal contends that the State patent conveyed all right, title, and interest of the State within the cement plant tract without any reservations to the State, express or implied, and that Ideal holds title to the property free and clear of any State right, title, or interest.

The staff of the State Lands Commission has conducted a study of the evidence of title to the subject parcel and has drawn a number of factual conclusions, including those summarized below:

1. The cement plant tract was included within the perimeter description of State swamp and overflowed patent of Survey No. 112.

CALENDAR ITEM NO. 33 (CONT'D)

2. The portion included within that survey is filled and reclaimed historic wetlands which formerly consisted of marsh grass and tributaries of Redwood Creek. It was in a natural state covered, at least in part, by the ordinary tides, the precise extent of coverage being uncertain.

The staff is of the opinion that the title evidence and the applicable legal principles lead to the conclusion that the State, in its sovereign capacity, is the owner of some public trust right, title, or interest in the cement plant tract. The exact extent and nature of the State's interest is, however, subject to uncertainty and dispute.

Ideal has offered to resolve the title dispute by written agreement in compromise settlement of the legal and evidentiary issues. The staff of the State Lands Commission recommends approval of the settlement in substantially the form of the agreement now on file with the State Lands Commission.

While the agreement sets forth all the specific terms and conditions of the settlement, a brief summary of some of the principal terms and conditions is set forth below:

1. Ideal will be issued a patent to Parcel One and Two of the cement plant tract, as described in Exhibit "A". These two sub-parcels constitute approximately 115 acres to be patented to Ideal. Exhibit "A" includes a strip 31.5 feet in width, ownership of which may be disputed by a predecessor of Ideal. Staff requests authorization to convey this strip to Ideal or to its predecessor, as is appropriate.
2. Ideal will quitclaim to the State all Ideal's interest in Parcels Three and Four as described in Exhibit "A" constituting approximately seven acres. These two sub-parcels are within the perimeter description of Ideal's deeds but are waterward of the agreed line separating lands to be patented to Ideal and sovereign lands to be retained by the State.
3. Ideal will quitclaim to the State all Ideal's interest in lands surveyed as Tideland Survey 86 and patented by the State as Tideland Location 150. These lands, consisting of approximately 52 acres, are described in Exhibit "C" and depicted on Exhibit "D".

CALENDAR ITEM NO. 33 (CONT'D)

4. Ideal will quitclaim that portion of the tide and submerged lands described in Tideland Survey 31 (patented as Tideland Location 191) lying waterward of a designated boundary which conforms to that established by the Title and Boundary Settlement Agreement (BLA 159) entered into between the State and Westbay Community Associates, et al. This sub-parcel, consisting of approximately 170 acres, is described as Parcel One in Exhibit "E" and depicted on Exhibit "F".
5. The State will patent and confirm to Ideal that portion of the tide and submerged lands described in Tideland Survey 31 (patented as Tideland Location 191) landward of a designated boundary which conforms to that established by the Title and Boundary Settlement Agreement (BLA 159) entered into between the State and Westbay Community Associates, et al, subject to the public trust easement for waterborne commerce, navigation, and fisheries. This sub-parcel, consisting of approximately 45 acres, is described as Parcel Two in Exhibit "E" and is depicted on Exhibit "F".
6. Ideal will quitclaim to the State all Ideal's interest in Bird Island, consisting of approximately 175 acres primarily consisting of Bay wetlands. Bird Island is described in Exhibit "G" and depicted on Exhibit "H".
7. Ideal will quitclaim to the State all Ideal's interest in a portion of Greco Island, consisting of approximately 77 acres. This portion of Greco Island is described in Exhibit "H" and depicted in Exhibit "I".
8. The Commission will lease to Ideal the area in the present location of the wharf adjacent to the cement plant tract along Westpoint Slough in a size and configuration as is necessary for its efficient and economic use for harbor, navigation, and berthing purposes. The rental rate will be nominal (\$500 per year) until the leased area produces income or for 15 years, whichever period is shorter, at which time the rental rate will be in accordance with then-existing standard rental schedules of the Commission. The lease will then be subject to rent review and adjustment every five years. The lease term shall not exceed the maximum permitted under then-existing regulations of the Commission.

CALENDAR ITEM NO. 33 (CONT'D)

9. The Commission will grant to Ideal an exclusive option for a period of ten years from the date of the agreement to lease the remainder of the waterfront along Westpoint Slough adjacent to the cement plant tract. The term of the lease shall be no longer than permitted under then-existing regulations of the Commission and the size and configuration of the lease parcel shall be no greater than is necessary to accommodate Ideal's reasonable needs relating to wharves, berthing, and navigation. In the event the Commission receives an offer from a third party to lease any portion of the option area, Ideal shall be allowed 60 days from the day Ideal is notified of the offer to exercise its option. If Ideal fails to exercise its option within 60 days, the Commission may lease that portion of the option area subject to the offer, thereby terminating the option as to that area.
10. Within 15 years of the effective date of the agreement, Ideal may alter and adjust the boundary separating the lands to be patented to Ideal from the State ownership of Westpoint Slough. The purpose of this boundary relocation is to enhance the present irregular shoreline configuration in order to make the waterfront easier and more economical to use. This boundary relocation may be by bulkheading or other establishment of a regular shoreline so long as such relocation does not result in a net increase in Ideal's ownership or a net decrease of the State's ownership. On relocation, the boundary will be at the new mean high water line, which shall be a permanent boundary line not subject to alteration as a result of changed physical conditions. This and all other work to be performed by Ideal in the lands covered or affected by the agreement shall be subject to all permit requirements of State and Federal agencies having jurisdiction.
11. The State Department of Fish and Game and Ideal will enter into an agreement concerning the right of Ideal to lease certain State water bottoms in San Francisco Bay for aquaculture purposes. It is contemplated that included among the lands subject to such an aquaculture lease will be the parcels described in Exhibit "E" as well as other lands in which the State has sovereign public trust fee or easement ownership.

CALENDAR ITEM NO. 33 (CONT'D).

12. An escrow will be opened to facilitate closure of this transaction, with the cost of escrow to be evenly divided between the parties. The parties will secure title insurance, with the cost of such insurance to be paid by the party requesting the insurance.

All the above exchange parcels are in San Mateo County. Staff has appraised and evaluated its interest in that portion of the cement plant tract to be patented to Ideal and the exchange parcels and has evaluated the law and the evidence bearing on the title dispute and is of the opinion that the value of the property being received by the State is equal to or greater than the value of the State interest being patented to Ideal. Staff has also concluded that the exchange described above is in the best interest of the State to enhance the configuration of the shoreline for the improvement of the water and upland and that the exchange will not interfere with the right of fishing and navigation in the waters involved in the transaction. This conclusion is based on the following. The cement plant tract to be patented to Ideal has been filled and reclaimed and has been excluded from the public channels. The lands to be quitclaimed to the State by Ideal are wetlands of San Francisco Bay. The lands to be leased to Ideal either by the Commission or by the Department of Fish and Game will be used for waterborne commerce, navigation, and aquacultural fisheries.
