## APPROVE SUBSIDENCE COSTS FOR VERTICAL AND HORIZONTAL MEASUREMENTS AND STUDIES CITY OF LONG BEACH, 1985-86 FISCAL YEAR

### SUBSIDENCE PROJECT:

Subsidence vertical and horizontal measurements  
 and studies in the City of Long Beach Harbor  
 District between July 1, 1985 and June 30, 1986

### PROPOSED WORK:

The City of Long Beach Harbor Department  
 conducts ground elevation and horizontal  
 distance measurement surveys and studies twice  
 each year throughout the Harbor District for  
 the purpose of monitoring changes that may be  
 attributable to subsidence.

The major portion of the work effort and cost  
 is in the vertical measurement (elevation)  
 surveys and studies.

### COST:

The City estimates the cost of the work to be:

Vertical Measurements and Studies	\$250,000
Horizontal Measurements and Studies	10,000
Total	\$260,000

The estimated cost for vertical measurements  
 and studies has increased by \$5,000 over the  
 current year's estimate of \$245,000. The  
 increase reflects anticipated higher Harbor  
 Department staff payroll costs resulting from  
 cost-of-living increases which in turn, are  
 partly offset by continuing efforts to  
 streamline survey field and office costs.
