OTHER PERTINENT INFORMATION:

1. The proposed permit is requested by the Department of Fish and Game because the area has significant value as a breeding and nesting habitat. They plan to initiate a management program to preserve and enhance the wildlife habitat through a staged development program.

To summarize the program; small earth moving equipment will be used to divert fresh water from Davis Creek for additional wetlands, namely, contour ditches and small ponds with low check dams. Cover crop planting and food plants are to be introduced where necessary to create nesting cover and provide food. Nesting platforms will be placed for Canadian Geese.

When the waterfowl are well established, plans are to introduce controlled limited public hunting.

An important aspect of the management program is a controlled grazing program. This will entail rotating cattle grazing by enclosing off 100 acre parcels to maintain a desirable level of foliage.

To effect the necessary grazing control, staff recommends that the Commission approve a grazing lease to Crane Creek Cattle Company

It is Calendar Item 17 appearing on the agenda of today's Commission meeting.

An agreement which will include notification of land enclosure to Crane Creek Cattle Company and State Lands Commission will be required. Notification is necessary for rental payment adjustment by State Lands Commission and future business planning for the Crane Creek Cattle Company.
