Reno, Nevada 89502

PROPOSED AUTHORIZATION:

Approval of a Prospecting Permit for two years to prospect for gold, silver and other valuable minerals, other than oil, gas, geothermal resources, sand and gravel on 640 acres of land located in San Bernardino County.

CONSIDERATION:

Filing fee of \$25, processing fee of \$250 and an acreage deposit of \$640.

BASIS FOR CONSIDERATION:

Pursuant to 2 Cal. Adm. Code 2003.

TYPE OF LAND AND LOCATION:

State school land, Section 16, T17N R11E, SBM, San Bernardino County, approximately 28 miles northeast of Baker.

PROPOSED PROJECT:

FMC Minerals Corporation will prospect for valuable minerals by performing detailed geologic mapping and rock chip sampling. Approximately 100 rock samples may be taken with hand tools from outcrops and existing mine dumps. In areas of particular interest

CALENDAR ITEN NO. C 2 2 (CONT'D)

identified by geologic mapping and rock chip sampling or in areas where outcrop density is low, gas detection cups, creosote twig and leaf sampling may be performed. Approximately 500 gas cups, two inches in diameter and four inches long, are buried in ten to 12-inch deep holes and dug up to ten to 30 days after burial and submitted for analysis. Creosote bush sampling at about 500 stations may be done, which involves the taking of approximately a six ounce sample of twigs and leaves from each station. The samples will be sent to a lab for ashing and analysis. Any vehicle access will be restricted to existing roads and jeep trails. No surface disturbance such as road construction, trenching, blasting or clearing will be permitted.

The lands proposed for prospecting are currently included in a grazing lease (PRC 6840). The prospecting permit will require that any activities under the permit will be consistent or compatible with operations of the grazing lessee.

Any proposed activity not authorized by this permit will not proceed without prior approval of a project amendment processed pursuant to the requirements of CEQA. If commercial mining operations are proposed, appropriate environmental documentation will be prepared and certified prior to issuing a mineral extraction lease.

TERM:

The primary term of a Prospecting Permit is two years. The Commission may, in its discretion, extend the term for one additional year.

ROYALTY:

Royalty payable under the permit shall be 20 percent of the gross value of the minerals secured from the permit area and sold or otherwise disposed of or held for sale or other disposition.

PREREQUISITE ITEMS:
