AMENDMENT OF LEASE PRC 6873  
GENERAL PERMIT - PUBLIC AGENCY USE

LESSEE: State Reclamation Board/  
Department of Water Resources  
Attn: Dave Anderson  
1416 Ninth Street  
Sacramento, California 95814

BACKGROUND:

On July 25, 1985, the State Lands Commission approved Lease PRC 6873, issued to the State Reclamation Board/Department of Water Resources, for the installation of a Palisades demonstration bank erosion control system in the Sacramento River at River Mile 236.7. The term of the lease is five years, beginning August 1, 1985, in consideration of the public use and benefit, with the State reserving the right at any time to set a monetary rental if the Commission finds such action to be in the State's best interest. The lease provides that a monitoring/research program must be approved by the State Lands Commission and the Department of Fish and Game prior to any construction and that the results of the research program must be provided to the Commission. The Lessee must also provide evidence of use rights in the adjacent upland prior to construction.

CURRENT SITUATION:

The State Legislature is authorizing appropriations for the Palisades project on the condition that it is installed along the left bank of the Sacramento River at Woodson Bridge State Recreation Area near River Mile 219. Therefore, the Lessee has requested that the lease be amended to provide for a new land description to reflect the new location for the Palisades demonstration project.
