OTHER PERTINENT INFORMATION:

The City's letter dated October 30, 1985, notifying the Commission of its intent to spend in excess of \$50,000 of its tideland oil revenues for this capital improvement project, is in conformance with the requirements of Chapter 138/'64 1st E.S., Section 6(h). In support of the Notice of Intent, the City furnished an adequate, detailed description of the proposed work in the form of construction contract plans and specifications and a copy of the notice of categorical exemption.

The Commission may either:

1. Determine that the project is authorized by Chapter 138, Section 6; or
2. Determine that the project is not authorized by Chapter 138; or
3. Take no action within 60 days after receipt of the City's notification of intent (by December 30, 1985) in which case the City may then proceed to spend its tideland oil revenues for the project.

Action 1 is recommended because Section 6(c) provides for "The ... reconstruction, repair, operation and maintenance of buildings, structures, recreational facilities ... on or adjacent to the Long Beach tidelands ... for the benefit and use of said tidelands ..." Section 6(f) provides for "... rendition of services reasonably necessary to the carrying out of the foregoing uses and purposes"; in this case, the engineering costs of the project.

The staff also recommends that the Commission's finding include a requirement that the City file a statement of final project costs with the Commission, within 180 days after completion of the work, to ensure timely auditing of accounts.
