OTHER PERTINENT INFORMATION:

1. By its action of April 24, 1986, the State Lands Commission approved a lease to Bolinas Community Public Utilities District and Bolinas Beach and Cliff Association, as co-lessees, to construct a 240-foot groin on the inlet side of the old groin, build a 300-foot seawall at the toe of the cliffs, and to pump sand from the channel onto Brighton Beach. Due to the difficulties in obtaining the public liability insurance required for this lease, which will allow project funding to be released, the co-lessees have requested a change in construction dates.
2. Staff of the Commission has received evidence of the required insurance and recommends that the construction limiting dates be amended to provide for a construction beginning date of May 1, 1988, and a construction completion date of December 31, 1989. All other terms and conditions of the approved lease remain unchanged.

The project is exempt under Class 2, Replacement or Reconstruction (groin) and Class 4, Minor Alteration to Land (dredging with spoils deposited at a site authorized by all applicable State and Federal regulatory agencies), 14 Cal. 5. The Coastal Development Permit, approved by the California Coastal Commission, provided that each property owner on whose property the groin or seawall is located and on whose property sand is to be placed, shall execute and record a document, irrevocably offering to dedicate to a public agency or a private association, an easement for public access and recreational use along the shoreline. The document shall also restrict the property owners from interfering with present use by the public of the areas subject to the easement prior to acceptance of the offers. The easement shall extend the full length of the project, and shall extend seaward from the toe of the bluff to the mean high tide line. The offers shall run with the land in favor of the people of the State of California, binding successors and assigns of the landowners. The offers of dedication shall be irrevocable for a

period of 21 years. Staff of the State Lands Commission has requested copies of the recorded offers of dedication, and will analyze all other factors necessary to determine if acceptance by the State Lands Commission would be in the State's best interest.
