03/27/90 PRC 3623 Garibay

APPROVAL OF A RECREATIONAL PIER PERMIT

APPLICANT:

Jcşeph Lanza PO Box 141 Tahoe City, California 95730

AREA, TYPE LAND AND LOCATION: A parcel of submerged land in Lake Tahoe near Tahoe City, Placer County.

LAND USE: Retention of two (2) previously unauthorized buoys.

TERMS OF PROPOSED PERMIT: Initial period:

Five years beginning March 27, 1990.

Consideration:

Rent-free pursuant to Section 6503.5 of the P.R.C.

APPLICANT STATUS:

**ILSE** 

Applicant is owner of upland.

PREREQUISITE CONDITIONS, FEES AND EXPENSES: Filing fee, processing costs, and environmental fees have been received.

STATUTORY AND OTHER REFERENCES: A. P.R.C.: Div. 6, Parts 1 and 2; Div. 13.

> B. Cal. Code Regs.: Title 2, Div. 3; Title 14, Div. 6.

AB 884:

### 05/29/90.

1.

OTHER PERTINENT INFORMATION:

Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (14 Cal. Code Regs. 15025), the staff has prepared a Proposed Negative Declaration identified as EIR ND 502, State Clearinghouse No. 90020090. Such Proposed Negative Declaration was prepared and circulated for public review pursuant to the provisions of CEQA.

Based upon the Initial Study, the Proposed Negative Declaration, and the comments received in response thereto, there is no substantial evidence that the project will have a significant effect on the environment. (14 Cal. Code Regs. 15074(b))

- 2. This activity involves lands identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
- In order to determine the other potential 3. trust uses in the area of the proposed project, the staff contacted representatives of the following agencies: Tahoe Regional Planning Agency, Department of Fish and Game, County of Placer, and the Tahoe Conservancy. None of these agencies expressed a concern that the proposed project would have a significant effect on trust uses in the area. The agencies did not identify any trust needs which were not being met by existing facilities in the area. Identified trust uses in this area would include swimming, boating, walking along the beach, and views of the lake. Prior to the issuance of this permit, staff will conduct an inspection of the site to review the relation of the permitted facilities to other trust uses.

-2-

114 CALENDAR PAGE 426 MINUTE PAGE .

# CALENDAR ITEM NO. C 1 4 (CONT'D)

- 4. All permits issued at Lake Tahoe include special language in which the permittee/lessee agrees to protect and replace or restore, if required, the habitat of Rorippa subumbellata, commonly called the Tahoe Yellow Cress, a State-listed endangered plant species.
- 5. All applicants at Lake Tahoe will be notified that the public has a right to pass along the shoreline and the permittee must provide a reasonable means for public passage along the shorezone area occupied by the permitted structure.
- If any structure hereby authorized is found 6. to be in nonconformance with the Tahoe Regional Planning Agency's shorezone ordinance, and if any alterations, repairs, or removal required pursuant to said ordinance are not accomplished within the designated time to said ordinance are not accomplished within the designated time period, then this lease is automatically terminated, effective upon notice by the State, and the site shall be cleared pursuant to the terms thereof. If the location, size, or number of any structure hereby authorized is to be altered, pursuant to order of the Tahoe Regional Planning Agency, Lessee shall request the consent of State to make such alteration.
- The existing pier is located landward of the 6,223-foot low water mark.

APPROVALS OBTAINED: Placer County and Tahoe Regional Planning Association.

II. D	SCUSSION OF ENVIRONMENT	al evaluat	10N ISez Com	ments Atteched	1\$					

#### IV. PRELIMINARY DETERMINATION

)

On the basis of this initial evaluation:

1 find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A NEGATIVE DECLARATION will be prepared.

: ... I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

-4=

01 / 09 / 90 Date:

26 8 MINUTE PAGE (7782)

III. DISCUSSION OF ENVIRONMENTAL EVALUATION (Attachment to Environmental Impact Assessment Checklist - Part II PRC 3623 - Joseph Lanza

- E1. Lake Tahoa, adjacent to APN 94-150-22 is designated as a fish feeding/escape cover habitat location on the Tahoa Regional Planning Agency maps. Placement of these buoys will not substantially alter the lake bottom features at this location. The Tahoa Regional Planning Agency's fish habitat study indicates that buoys do not have an impact on fish spawning habitat. Recreational use induced in this area of the Lake by the project may affect fish productivity minimally.
- M5. The applicant submits that the adjacent parcel owner and three parcel owners to the north each have a pier and two buoys. The adjacent parcel owner and four parcel owners to the south each have piers with no buoys. Spacing between structures occurs approximately every 100 feet. Two parcels south of this proposal is the Tahoe State Recreation Area which maintains a pier at each site. Applicant submits the buoys in this reported area are approximately 200 feet from the end of each pier. The existing pier adjacent to the parcel of this application, 94-150-22, is located landward of the State Lands Commission's permitting jurisdiction.
  - Recreational activity will not significantly increase in this area because surrounding waterward uses are similar. This proposal will continue to limit public access to shore along this area, which will not change the area currently available to topline trollers.
- R1. Buoys themselves do not present much of a visual obstruction. According to <u>The Cumulative Impacts of Shorezone Development</u> <u>At Lake Tahos</u>, by Phillips, Brandt, Reddick, McDonald, and Grefe, dated February 1978, PP. 4-79, in public responses to visual aspects of shorezone development and use, a grouping of seven boats closely spaced was considered to be a "visual dislike", therefore this proposal itself does not constitute a significant effect, but may add incremental effects to the overall waterward aesthetics in this area.
- S1. The quality and quantity of recreation will change to the owners of these buoys, who will benefit in more convenient, and perhaps more frequent recreational use of Lake Tables. Recreational quality will not substantially change for topline trollers as was mentioned in discussion of M5 above.
