THIRD MODIFICATION OF THE 1989-90 PLAN OF DEVELOPMENT AND OPERATIONS AND BUDGET LONG BEACH UNIT, WILMINGTON OIL FIELD, LOS ANGELES COUNTY, REVISING ECONOMIC PROJECTIONS

The City of Long Beach has submitted to the Commission the Third Modification of the 1989-90 Plan of Development and Operations and Budget, Long Beach Unit, providing updated production, injection, income and expenditure information together with revised economic projections.

The Third Modification revised Exhibits "C-3" and "C-4" in PART V of the subject Plan and Budget based on data available through December 31, 1989. PART IV, PROCEDURES Section A-2, of and State of past operations and intended future operations under the Plan. The City is to furnish the State detailed reports; updated and revised, if necessary, exhibits; and any the City's Review. The City does not propose any changes other than in Exhibits C-3 and C-4 to replace forecast first and second quarter numbers with actuals, increase oil and gas forecasted prices for the third and fourth quarters and tc revise expenditures downward. There is no augumentation, reduction or transfer of budget funds.

The average oil production rate during the second quarter of the 1989-90 Plan year was 47,232 barrels per day, 290 barrels per day more than originally estimated. The water production rate was 422,463 barrels per day, 6,637 barrels per day less than originally estimated. The water injection rate was

-1-

CALENDAR PAGE	353
MINUTE PAGE	739

CALENDAR ITEM NO. 4 2 (CONT'D)

507,736 barrels per day, 10,164 barrels per day less than originally estimated. The City of Long Beach now estimates that the oil production rate for the year will average 46,568 barrels per day and the water injection rate 515,288 barrels per day. Gas production averaged 8,961 thousand cubic feet per day during the second quarter and is now expected to average 8,586 MCF/day for the year.

Expenditures during the second quarter were 33.69 million, \$3.29 million less than originally estimated, excluding carry over funds.

Estimated expenditures for the 1989-90 year have been projected by the City to \$131.7 million. No reduction in budgeted funds is suggested in this modification.

Anticipated total Unit income for the 1989-90 fiscal year has been adjusted upward from the end of first quarter predictions. Because of lower expenditures and higher oil prices for the last half of the year, the City now estimates net Unit income for the year to be \$143.56 million, an increase of \$39.51 million over the estimate projected at the end of the first quarter.

The Commission's staff has reviewed the Third Modification including the estimated production, injection, expenditures and revenue shown in the revised exhibits. When actual information through the third quarter of the 1989-90 fiscal year becomes available, it will be reviewed by the staff and reported to the Commission.

Also, in accordance with PART IV A.4 a. and c., two Plan Supplements were approved. One was to replace the Pier J plant influent lines, and the other was to inspect the oil shipping line flanges between J-6 and the Broadway and Mitchell shipping station. Funding was provided by a transfer within the existing budget. This report requires no action by the
