TITLE SETTLEMENT AND EXCHANGE AGREEMENT
REGARDING LANDS IN AND ALONG DISAPPOINTMENT SLOUGH,
MOSKER SLOUGH, PIXLEY SLOUGH, AND BEAR CREEK,
CITY OF STOCKTON, SAN JOAQUIN COUNTY

PARTIES:

State Lands Commission

A. G. Spanos Construction, Inc.

Spanos Park Development Co., L. P.

Greenbriar Partners

BACKGROUND

This calendar item recommends settlement, among the above-named parties, of title claims of the State regarding the existence of historical tide and submerged lands within the subject property. The subject property (as shown on Exhibits "A" and "B") is located in the northwesterly corner of the City of Stockton, south of Eight-Mile Road, north of Bear Creek, and lies both easterly and westerly of a one-mile stretch of Interstate Highway 5 (I-5). The area westerly of I-5 involves portions of Bishop Tract (Reclamation District 2042). The proposed development of the area, commonly referred to as Spanos Park, includes approximately 354 acres of primarily farm land which is ultimately planned to include a 7,460 residential unit development, preservation of all 66.9 acres of high quality wetlands on site, and creation of 23.4 acres of

CALENDAR PAGE 464
MINUTE PAGE 2333

wetlands and riparian habitat on site and an additional eight (8) acres off site for a total of 90.3 acres.

The proposed settlement will transfer to the State 90.3 acres of wetlands and riparian habitat areas. In addition, fee title underlying the levees along the waterways and portions of Bear Creek east of I-5 will also come to the State, thereby assuring public access to and along these navigable waterways. The Private Parties' obligations, including the wetlands mitigation plan, which are conditions of their Corps permit and any flood control responsibilities, are not affected by the proposed settlement agreement.

Portions of the Spanos Park area were the subject of swamp and overflowed land surveys and were subsequently patented by the State as described below.

S&O Survey 475 (San Joaquin) involving 317.61 acres in the E/2 of Section 1, T2N, R5E, MDM was applied for by James C. Smith pursuant to Chapter 235, Statutes of 1858; the application was approved February 4, 1859 and paid for by virtue of Reclamation District 61. An S&O patent was issued on August 24, 1870 to Thomas Yolland.

S&O Survey 927 (San Joaquin) involving 224.64 acres in the fractional W/2 of Section 1, T2N, R5E, MDM was applied for by J. A. Long pursuant to Chapter 397, Statutes of 1863; the application was approved June 14, 1864 and paid for by virtue of Reclamation District 61. An S&O patent was issued on April 7, 1874 to Sabin Harris & James M. Learned.

S&O Survey 931 (San Joaquin) involving 310.44 acres in the E/2 of Section 2, T2N, R5E, MDM was applied for by James C. Smith pursuant to Chapter 397, Statutes of 1863 and paid for by virtue of Reclamation District 61. An S&O patent was issued on April 7, 1874 to Sabin Harris & James M. Learned.

S&O Survey 1265 (San Joaquin) involving 310.44 acres in the W/2 of Section 2, T2N, R5E, MDM was applied for by George D. Roberts pursuant to Chapter 415, Statutes of 1868 and paid for by virtue of Reclamation District 61. An S&O patent was issued on March 21, 1874 to Sabin Harris.

The area encompassed by these patents was included within the "Plat showing the subdivision of Two Bodies of Land 'NOTORIOUSLY SWAMP & OVERFLOWED (sic)' East of the Mount Diablo Meridian in Township 1, 2, 3, 4, & 5 North and Township 1 South of Mount Diablo Base Line." This 1872 plat was a perimeter

segregation survey of federal public lands and private grants (ranchos) from the federally granted swamp and overflowed lands of the Sacramento/San Joaquin Delta. The plat made no attempt to segregate, by survey, the sovereign tidally navigable waterways from the swamp and overflowed lands.

Neither the S&O county surveys nor the U.S. segregation plat indicated the existence of any waterways within the subject area. However, certain subsequent maps indicate the existence of waterways within the subject property. The present physical condition of the Spanos Park property indicates that most of the lands are under agricultural use and range from an elevation of just below sea level to just above ten feet.

The State contends that portions of the subject property were, at the time of the admission of the State of California into the Union, and in its natural condition thereafter, traversed by tidal sloughs in the vicinity of today's Disappointment Slough, Mosher Slough, Bear Creek and Pixley Slough. The State further contends that, as lands of the factual and/or legal character of tidelands and submerged lands, portions of the subject property are subject to a public trust ownership, consisting of a fee or an easement, or both, for water-related commerce, navigation, fisheries, recreation, and other public trust purposes. The State further contends that portions of the subject property, due to previous reclamation and flood control activities, are navigable or subject to tidal action and have been taken on the characteristics of navigable waters and have been used by fish and waterfowl and as waterways for navigation and fishery by the public for a period in excess of the five-year period for vesting of prescriptive rights (State of Calif. v Superior Ct. of Placer County (Fogerty), 29 Cal. 3d 240 (1981)).

Portions of the subject property consist of lands, which in the past were covered by tidal waters tributary to Disappointment Slough, which have been filled or reclaimed. Said lands are not subject to tidal action or useable for the purposes of commerce, navigation or fishing, and are not reasonably susceptible of use or required for public trust purposes. Other portions of the subject property are to be filled and reclaimed as part of a program of flood control. Still other portions of the subject property are to be part of a wetlands preservation, creation, and mitigation project to create improved wetland habitat, which are conditions of U.S. Army Corps Permit No. 9995, dated November 20, 1989.

The State has independently evaluated its claims of sovereign interest in the subject property both as to economic value of such claims and value to the public's trust needs in the parcel or the areas claimed to be owned by the State. The historical location of the State's public trust interest claim is no longer practical for public trust needs and constitutes a relatively small portion of Disappointment Slough and its tributaries. In compromise and settlement of their respective claims and in recognition of the present condition of and plans for the subject property, the State and Private Parties have agreed to relocate the State's trust interest to a location which is compatible with the condition of the property and enhances the environmental values of the trust property. By locating the State's trust interest in and adjacent to the present bed of Disappointment Slough, Mosher Slough, Bear Creek and portions of Pixley Slough, this exchange will assure appropriate public access and add to and confirm the program being carried out by State and Federal agencies to maintain and improve the lands as ecologically valuable wetlands. The State has determined that the value of the economic and public trust interest it is receiving in the "Wetlands Parcel" as described in Exhibit "C" and depicted on Exhibit "B" and in the "Bear Creek parcels", as described in exhibits "D" and "E" and depicted on Exhibit "B", is equal to or greater than the value of the State's interest being given up in the "Upland Parcel" in which the State is to terminate its claimed sovereign public trust interest, as described in Exhibit "F" and depicted on Exhibit "B".

There is a bona fide dispute between the State and Private Parties as to the existence, extent, nature and location of their respective rights, titles, and interests in the subject property. A resolution of the Private Parties' rights, titles, and interests in the subject property would require costly, protracted, and vigorously disputed litigation with uncertain results if the controversy could not be resolved by settlement. The parties hereto consider it expedient and necessary and in the best interests of the State, the public, and Private Parties to resolve this title dispute by compromise settlement, thereby avoiding the anticipated substantial costs, time requirements, and uncertainties of litigation. In the interest of settlement, the State and Private Parties have conducted independent studies and evaluations of the title evidence, the principles of law, and the merits of the State's and Private Parties' legal positions.

AGREEMENT

The representatives of the parties after many months of discussions have reached an agreement to settle the title issues involving State claims within the subject property. The State is authorized by Division 6 of the P.R.C., including Section 6307, to enter into exchanges of interest in real property held by the State by reason of its sovereignty.

The elements of the proposed agreement may be summarized as follows.

- (1) Private Parties will quitclaim to the State all of their right, title and interest in the Subject Property described in Exhibits "C", "D", and "E."
- (2) The State will quitclaim to Private Parties all right, title and interest of the State in the subject property, excluding the interests described in Subparagraph 1, above. The trust termination findings involving the Pixley Slough redirection and reclamation areas will be effective upon execution and recordation of a document of the Executive Officer of the Commission stating that the said work has been completed.
- (3) The quitclaim described in Subparagraph 2, above, is intended to terminate any State sovereign interest, including the public trust for commerce, navigation, and fisheries, in the subject property.
- (4) This Agreement shall in no way operate to relieve Spanos of its obligations under Army Corps of Engineers Permit No. 9995, dated November 20, 1989, or any amended or superseding Army Corps of Engineers Permit. Spanos shall have the right to enter the property for purposes of complying with the terms and conditions of said Army Corps of Engineers Permit, and the Streambed Alteration Permit issued by the California Department of Fish and Game, notification number II 203 89/90, issued 11/13/89. Spanos shall be entitled to retain a temporary easement for these purposes, consistent with its obligations under those permits.
- (5) The Private Parties agree that if and when it becomes necessary to modify or change the position of the levees, the Private Parties will execute necessary instruments at that time to reflect the new location(s).

OTHER PERTINENT INFORMATION

This title settlement agreement proposal has been reviewed and approved by the Commission staff and the Office of the Attorney General as to compliance with applicable laws, rules, and regulations of the State Lands Commission.

An EIR (State Clearinghouse #87032415) involving the Spanos Park Development was certified by the City of Stockton on August 2, 1988 and tentative map [TM 56-89] approved with related CEQA findings by the City on December 7, 1989.

U.S. Army Corps Permit # 9995 was issued for the Spanos Park project on November 28, 1989.

California Department of Fish and Game streambed alteration agreement, notification # II 203 89/90, was issued November 13, 1989.

The proposed title settlement agreement is exempt from the provisions of the Subdivision Map Act (Gov. Code § 66412(e)) and the California Environmental Quality Act (P.R.C. § 21080.11).
