Long Beach, California 90801

SUBSIDENCE PROJECT:

Project consists of vertical and horizontal measurements and studies in the City of Long Beach Harbor District between July 1, 1991 and June 30, 1992.

PROPOSED WORK:

The City of Long Beach Harbor Department conducts ground elevation and horizontal distance measurement surveys and studies twice each year throughout the Harbor District for the purpose of monitoring changes that may be attributable to subsidence.

The major portion of the work effort and cost is in the vertical measurement (elevation) surveys and studies.

COSTS:

The City estimates the cost of the work to be:

Vertical Measurements and Studies	\$245,000
Horizontal Measurements and Studies	<u>10,000</u>
	\$255,000

The estimated cost for vertical measurements and studies has increased by \$10,000 from the current year's estimate of \$235,000. The increase (4.3%) is considered reasonable, being consistent with general cost inflation.
