OTHER PERTINENT INFORMATION:

1. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (14 Cal. Code Regs. 15061), the staff has determined that this activity is exempt from the requirements of the CEQA as a categorically exempt project. The project is exempt under Class 4, Minor Alteration to Land, 14 Cal. Code Regs. 15304.

Authority: P.R.C. 21084 and 14 Cal. Code Regs. 15304

2. This activity involves lands identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
3. Pursuant to quiet title action and permanent injunction in People of the State of California v. Charles A. Orwick, et al, Tehama County Superior Court Case 18801, 1983, title to a defined parcel of sovereign land near the mouth of Battle Creek was quieted in the State and is under the jurisdiction of the State Lands Commission. Subsequent to the judgment, the land has been used as unrestricted public access to the Sacramento River. The unrestricted and uncontrolled public uses have led to large scale destruction of the area, as well as public health and safety problems. Automobiles have been abandoned, trees have been cut down, fires have been started. During the salmon season, a large number of fishermen camp in the area for months at a time, using the adjacent vegetation as restroom sites.

CALENDAR ITEM NO. C 0 6 (CONT'D)

4. The Bureau has requested authority to perform on-ground management of the parcels, including ranger patrols, facility design and operation while providing recreational opportunities for the public and protection of the riparian forests on the parcels. The Bureau's management of these lands would eliminate the removal of the State's resources, unauthorized occupancy, litter, and sanitation problems.
5. No permanent structures or features will be constructed or placed upon the lease area during this interim development phase. The proposed management actions on the parcels include: (1) establishment of a 14-day stay limit; (2) placement of informational signs to identify camp and day use areas, restroom locations, and a boat-launch area; (3) placement of posts along interior roads and parking areas to prevent vehicle use in riparian areas; (4) placement of portable restrooms and trash cans during the major-use season; and (5) providing ranger and maintenance personnel to initiate visitor services.

The Bureau of Land Management proposes to develop a detailed site plan and prepare an environmental assessment for the further development of this area which would require an amendment to this authorization.

6. The permit requires the permittee to provide containers for trash and refuse.
7. The permit states that permittee shall not provide to its customers any prepared food in polystyrene foam food containers.
8. Permittee agrees to conserve the natural resources on the subject property and to prevent pollution and harm to the environment.
9. The annual rental value for the combined sites is \$1,350.
