CALENDAR ITEM NO. C17 (CONT'D)

AB 884:

OTHER PERTINENT INFORMATION:

1. A Negative Declaration was prepared and adopted for this project by Humboldt County. The State Lands Commission's staff has reviewed such document.
2. Humboldt County did not prepare a Mitigation Monitoring Program; however, the Coastal Commission authorized permit 1-91-255, on April 25, 1992, which contains special conditions for riparian habitat restoration.
3. This activity involves lands identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
4. The County of Humboldt proposes to remove the existing Valley Flower Bridge on Dillon Road over the Salt River and construct a new two-lane bridge at the same location. The project site is located near Port Kenyon, north of Ferndale in the Eel River Delta.

The purpose of the project is to provide a structure capable of modern loads, wide enough for two lanes, with approaches at both ends which meet present day standards adopted by the Federal Highway Administration.

5. The existing Valley Flower Bridge, which was constructed in 1919 is structurally and geometrically deficient. Removal of the existing bridge will result in the complete removal of a historic structure. Prior to the removal of the bridge, the County will record the bridge photographically to the standards required by the National Park Service for reports filed with the Historic American Engineering Record.
6. The lease requires the lessee to properly implement all of the mitigation measures as described in the environmental document, State Clearinghouse Number 90030692.
