**BACKGROUND:**

Viceroy Gold Company (Viceroy) has requested an extension of the existing mineral prospecting permit. The initial term of the permit was effective August 1, 1992 and expired July 31, 1993. The term of the proposed extension, if approved, will be August 1, 1993 to July 31, 1994.

The permit authorizes prospecting activity including geologic mapping and hand sampling of surface material. No other surface disturbance is authorized. During the initial term, the Permittee conducted detailed geologic mapping of the surface of Section 36 and has taken approximately 100 samples (out of a total of 400 samples permitted for the project) from various locations for assay. Exploration data gathered thus far have been submitted to the Commission staff pursuant to conditions of the permit. Viceroy's geologic staff did not complete all the permitted activity in Section 36 during the initial term of the permit.

The Permittee indicates that during the proposed extension, more surface hand sampling will take place and further mapping of the parcel will be completed. Exploration results will then be examined to determine whether further
