AUTHORIZE THE EXECUTION OF A
BOUNDARY LINE / TITLE SETTLEMENT AGREEMENT
COVERING CERTAIN PROPERTY IN SAN BERNARDING COUNTY

12/21/94 W 24836 PEREZ A.SCOTT AD 221

APPLICANT:

Mansker, et al. 95 Desnok Street Needles, California 92363

The staff of the State Lands Commission has negotiated a Boundary Line/Title Settlement Agreement with Mr. Mansker. et al., along the present right bank of the current channel of the Colorado River, a navigable waterway.

BACKGROUND:

The Colorado River, near the City of Needles, has historically meandered over a large flood plain. In 1883, the United States Bureau of Land Management surveyed the Official Township Plat for Township 8 North, Range 23 East, S.B.M., and located the river within what is now the Mansker property. The river continued to meander and finally settled into a position known as Pelican Bend, easterly of the Mansker property.

On June 25, 1951, the United States Bureau of Reclamation (USBR) opened a dredged channel, westerly of the Pelican Bend area and adjacent to the Mansker Property. This dredged channel is now the current channel of the Colorado River (USBR Channel) and the location of this Agreement. The natural historic channel is the Pelican Bend area, which was occupied by the river prior to the artificial cut by the USBR and the State still retains its sovereign interest within the western half of the bed of this channel. The State, however, retains a navigational easement, and other potential public rights in the USBR Channel and the parties to this agreement mutually desire to fix the common boundary between the Subject Property and the property interest of the STATE, in the current USBR Channel.

The staff believes it is in the best interest of the State, pursuant to the provisions of Division 6 of the P.R.C., to enter into Boundary Line Agreements fixing the boundary of the State's interest in Swamp, Overflowed, Tide and Submerged lands, whenever

it is deemed necessary and expedient. In this way the extent, nature, location, and area of public and private titles and boundaries are defined by settlement and the cost and uncertainties of litigation are avoided.

CURRENT SITUATION:

The current owners of the Subject Property desire to arrange for the property to be cleared of any remaining interest of the STATE, either sovereign fee, public trust easement or implied dedication easement, so that they may receive a policy of title insurance free of any STATE claims. Staff of the Commission has conducted an investigation of the area, for purposes of establishing the best evidence of STATE property interest in the area. Such research has found that the property interest of the STATE in any form, no longer exists on the subject property.

In order to resolve the various ownership claims of the private parties and the STATE in this area, staff has prepared a Boundary Line/Title Settlement Agreement that will, through an exchange of property interests, clear title to the Subject Property in exchange for various Easements and the quieting of title from the private parties, of land easterly of the present right bank of the current USBR channel of the Colorado River.

The proposed Agreement is on file in the Sacramento Office of the Commission.
