GENERAL LEASE - PUBLIC AGENCY USE

LESSEE:

City of West Sacramento
1951 South River Road
West Sacramento, California 95691

AREA, LAND TYPE, AND LOCATION:

.12 acre, more or less, of tide and submerged lands in the Sacramento River,
within the city of West Sacramento, Yolo County.

AUTHORIZED USE:

Open space, public access, preservation of riparian habitat, and levee structure.

LEASE TERM:

25 years, beginning August 1, 1997.

CONSIDERATION:

The public use and benefit; with the State reserving the right at any time to set a
monetary rent if the Commission finds such action to be in the State's best
interest.

OTHER PERTINENT INFORMATION:

1. Applicant has the right to use the uplands adjoining the lease premises.
2. A Mitigated Negative Declaration was prepared and adopted for this project by the city of West Sacramento. The State Lands Commission's staff has reviewed this document.
3. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.

CALENDAR PAGE	137
MINUTE PAGE	OC1811

CALENDAR ITEM NO. C32 (CONT'D)

4. In 1988, the Commission entered into a Boundary Line Agreement entitled "An Agreement Between the State Lands Commission and Thomas P. Raley to Establish a Boundary Line Between Private Property and Public Sovereign Property in the Sacramento River, Yolo County" (AD 81). This Lease will involve State sovereign lands waterward of the agreed line, which were leased to Raley's Corporation under Lease No. PRC 7261.9. Staff is recommending that Lease No. PRC 7261.9 be amended to exclude that area in order for it to be leased to the City.
5. The city of West Sacramento proposes to establish and maintain a public park and recreation facility along the west bank of the Sacramento River between the Tower Bridge and the I Street Bridge as part of the West Sacramento Riverfront Improvement Project.

The City will be applying to construct the project in phases. This Lease involves sovereign lands included within the first phase of the project, which phase includes constructing the Tower Bridge Entry Plaza at the Tower Bridge and the southerly 900 feet of the paved promenade along the top of the levee from the Tower Bridge to the easterly extension of G Street (see Exhibit A). The authorized uses in Phase I will include a levee structure, the preservation and enhancement of riparian habitat as depicted in the Landscape Planting Plan prepared by The HLA Group dated August 12, 1997, open space, and public access.

APPROVALS OBTAINED:

State Reclamation Board

FURTHER APPROVALS REQUIRED:

California Department of Transportation

EXHIBITS:

- A. Site Map
- B. Lease Description
- C. Location Map
- D. Mitigation Monitoring Plan

PERMIT STREAMLINING ACT DEADLINE:

CALENDAR ITEM NO. C32 (CONT'D)

February 6, 1998

RECOMMENDED ACTION:

IT IS RECOMMENDED THAT THE COMMISSION:

CEQA FINDING:

FIND THAT A MITIGATED NEGATIVE DECLARATION AND A MITIGATION MONITORING PROGRAM WERE PREPARED AND ADOPTED FOR THIS PROJECT BY THE CITY OF WEST SACRAMENTO AND THAT THE COMMISSION HAS REVIEWED AND CONSIDERED THE INFORMATION CONTAINED THEREIN.

ADOPT THE MITIGATION MONITORING PROGRAM, AS CONTAINED IN EXHIBIT D, ATTACHED HERETO.

SIGNIFICANT LANDS INVENTORY FINDING:

FIND THAT THIS ACTIVITY IS CONSISTENT WITH THE USE CLASSIFICATION DESIGNATED BY THE COMMISSION FOR THE LAND PURSUANT TO PUBLIC RESOURCES CODE SECTIONS 6370, ET SEQ.

AUTHORIZATION:

AUTHORIZE ISSUANCE TO THE CITY OF WEST SACRAMENTO OF A GENERAL LEASE - PUBLIC AGENCY USE, BEGINNING AUGUST 1, 1997, FOR A TERM OF 25 YEARS, FOR THE WEST SACRAMENTO RIVERFRONT IMPROVEMENT PROJECT ON THE LAND SHOWN ON EXHIBIT A ATTACHED AND BY THIS REFERENCE MADE A PART HEREOF; CONSIDERATION BEING THE PUBLIC USE AND BENEFIT, WITH THE STATE RESERVING THE RIGHT AT ANY TIME TO SET A MONETARY RENT IF THE COMMISSION FINDS SUCH ACTION TO BE IN THE STATE'S BEST INTEREST.

**WEST SACRAMENTO RIVERFRONT PARK IMPROVEMENTS
MITIGATION MONITORING PROGRAM
JANUARY 15, 1997**

INTRODUCTION

The City of West Sacramento (City) has identified several potentially significant environmental impacts that may occur with implementation of the Riverfront Park Improvement Project. The Mitigated Negative Declaration prepared for this project documents the impacts and mitigation measures available to reduce, avoid, or otherwise minimize these impacts. This Mitigation Monitoring Program (MMP) is intended to be used by the City to ensure that each mitigation measure, adopted as a condition of project approval, will be implemented. This MMP meets the requirements of the California Environmental Quality Act (CEQA), as amended, which mandates preparation of monitoring provisions for the implementation of mitigation adopted as part of a project approval.

The Mitigation Monitoring Program (MMP) will be adopted as part of the project approval by the West Sacramento City Council.

ROLES AND RESPONSIBILITIES

It is the responsibility of the City to adopt a monitoring program when conditions of project approval have been added or the project changed in order to mitigate significant environmental effects. It is the responsibility of the Community Development Director (Director) or his/her designee to ensure preparation and adoption of the monitoring program, and for coordination and implementation of the program.

City staff responsible for monitoring the implementation of mitigation measures may include: Community Development Department (Building, Engineering, and Planning Divisions), Police Department, Fire Department, the developer, and the construction contractor, as noted in this MMP. The Building Division and other City departments, agencies, and divisions of jurisdiction will assist in ensuring compliance with those mitigation measures related to project design, construction, and occupancy including, but not limited to, plan checking, site preparation, construction, and final inspection activities.

If permits of other agencies are required, the agency of jurisdiction will be the primary responsible agency for implementing certain mitigation measures, with the Community Development Department as the secondary responsible agency.

ENFORCEMENT AND PENALTIES OF NON-COMPLIANCE

If the Director is made aware of any violations of the MMP, the Director will within three (3) working days of receipt of such a report:

EXHIBIT D

CALENDAR PAGE	143
MINUTE PAGE	001817

- Directly notify the applicant or developer (or their representative) by telephone of the violation and attempt to obtain voluntary compliance; or
- Notify the applicant or developer (or their representative) of the violation in writing and request voluntary compliance.

If the above steps do not result in resolution to the Director's satisfaction, the Director may:

- Refer the violation to the Planning Commission and/or City Council for possible revocation of entitlements; or
- Refer the violation to the City Attorney to initiate the filing of misdemeanor charges.

If a mitigation measure is required for inclusion in building or site plans, a building permit or any other permit will not be issued by the Building Division until compliance is verified by the Director. If a mitigation measure is to be implemented during site preparation and project construction, non-implementation or other violation will result in either notification of the violation by the Director as described above, or a stop work order issued by the Building Division until compliance is achieved. Mitigation measures required prior to occupancy will be checked by the Director prior to issuance of occupancy permits by the Building Division. Violations of an adopted mitigation measure subsequent to building completion and occupancy shall result in one or more of the following actions:

- Written notification and demand by the Director for correction;
- Forfeiture of any bond trust account, or other financial assurance;
- Action to recover funds assured under a letter of credit; or
- Initiate nuisance abatement procedure against the violator with the intent of placing a lien against the real property subject to the violation in the amount necessary to correct the violation.

INTERPRETATION AND DISPUTE RESOLUTION

The purpose of each mitigation measure is to reduce, or mitigate, a specific significant impact of the project, as identified in the Mitigated Negative Declaration. The mitigation measures included in this MMP were required by the City Council as conditions of approval of the Riverfront Park Improvement Project. Therefore, any major modification of the mitigation measures contained in this MMP will require the review and approval of the City Council.

Prior to implementation of the mitigation measure, the applicant or developer, and the Director may have different interpretations of how a particular mitigation measure is to be implemented. The following procedure is provided where clarification or minor modification of a particular mitigation measure is needed.

The Director shall review any request from the party carrying out the mitigation measure through project design and/or construction to clarify the implementation requirements of a particular

measure. The request must be in writing and must clearly identify the mitigation measure, the significant impact that it is intended to mitigate, and the reason why the clarification is needed. The Director shall respond verbally or in writing to the requesting party no later than 10 working days of receiving the request. The Director's response shall be in the form of:

- Clarification of the required implementation method based on the Director's interpretation, where the mitigation measure was originally developed or recommended by the Community Development Department; or
- Referral of the request to the appropriate responsible agency who originally developed or recommended the mitigation measure, for a determination of the appropriate implementation method; or
- Referral of the request to the City Council for review and approval, where a major modification of the mitigation measure is requested. Major modification shall include elimination of a measure or change to a measure that substantially reduces its effectiveness in mitigating the related impact.

In all cases, the City's primary concern shall be to implement the mitigation measure in such a manner that it substantially reduces the environmental impact for which it was designed. If alternative mitigation measures are identified during the course of project planning and construction, which would be equally effective in mitigating the identified impacts, substitution of one adopted mitigation measure with an alternative measure shall be permitted, upon review and approval by the Director and any other agency of jurisdiction. Such substitution shall be considered a minor modification and does not require City Council approval.

MITIGATION MONITORING PROGRAM CHECKLIST

The following table provides a checklist for monitoring the adopted mitigation measures. Included in the table is a listing of the project's potential impacts, the associated mitigation measures which were adopted by the City Council, corresponding monitoring and reporting requirement, and responsible parties for ensuring implementation. The impacts in the table represent only those impacts which have been determined to be significant in the Mitigated Negative Declaration. Those impacts found to be less than significant and not requiring mitigation do not appear within this Mitigation Monitoring Program.

The impacts and mitigation measures contained herein are taken verbatim from the Mitigated Negative Declaration. Mitigation measures which are identified by the numbers 1 through 4(b) are those project-specific mitigation measures that were developed specifically for the Riverfront Park Improvement Project. The other mitigation measures, identified by a three-digit number system (e.g. "4.3-2") reflect those measures that are carried over from the Washington Specific Plan EIR (the "master EIR" on which the Mitigated Negative Declaration was based).

This checklist shall be retained by the Director and copies provided to the various departments and agencies that have responsibility for implementing and monitoring the mitigation measures.

Table 1
Mitigation Monitoring Program
WEST SACRAMENTO RIVERFRONT PARK IMPROVEMENTS PROJECT

Impact	Mitigation	Monitoring Duration		Responsibility	
		One-time	Ongoing	Agency	Verification
BIOLOGICAL RESOURCES					
	<p>5) Temporary mulching, seeding, or other suitable stabilization measures shall be used to protect exposed areas during construction activities.</p> <p>6) Excavated materials shall not be deposited or stored where the material could be washed away by stormwater runoff.</p>				
4.3-3 Construction activities along the riverfront may result in erosion and sedimentation within Sacramento River aquatic habitat.	<p>4.3-3(a) The Washington Specific Plan shall require that grading, trenching, removal of vegetation, ground disturbing activity along the bank or within the Sacramento River shall not be conducted between October 15 and April 15, and all disturbed areas shall be planted or otherwise treated with permanent erosion control techniques prior to November 1. No graded areas shall be allowed to remain unprotected during the rainy season. This provision shall apply to all phases of buildout of the Washington Plan Area.</p> <p>4.3-3(b) Development pursuant to the Washington Specific Plan shall implement requirements or provisions specified in any Streambed Alteration Agreement issued by DFG and/or permits issued by the Corps of Engineers. These may include erosion control and on-going maintenance to prevent and repair damage caused by construction, placement of siltation barriers.</p> <p>4.3-3(c) Contractors shall comply with applicable permit requirements, which includes implementation of Best Management Practices (BMPs). BMPs shall include schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce erosion caused by construction (i.e., straw bale dikes, silt fences, sediment traps, or similar methods).</p>	Prior to issuance of a grading permit.	Throughout construction.	<p>City Planning Division</p> <p>City Engineering Division</p> <p>CDFG</p> <p>COE</p> <p>RWQCB</p>	Date/Initial: _____ _____ _____ _____
Construction may result in the disturbance of Swainson's hawks during the breeding and nesting season as a result of future construction activities that occur within a 0.5 mile of an active Swainson's hawk nest.	4.3-4(a) Swainson's hawk nesting surveys shall be conducted immediately prior to initiation of work that will be performed during the breeding season between March 15 through August 15. A DFG qualified raptor biologist shall be hired to conduct a survey within a 0.5 mile radius of the proposed construction site to determine the presence or absence of active nests.	Prior to start of grading/construction.	Throughout construction	<p>City Planning Division</p> <p>CDFG</p>	Date/Initial: _____ _____

MINUTE PAGE

Table 1
Mitigation Monitoring Program
WEST SACRAMENTO RIVERFRONT PARK IMPROVEMENTS PROJECT

Impact	Mitigation	Monitoring Duration		Responsibility	
		One-time	Ongoing	Agency	Verification
BIOLOGICAL RESOURCES					
	<p>4.3-4(b) If an active Swainson's hawk nest is located on or within 0.5 miles of the project site then construction activities shall be deferred until after the adults and young-of-the-year (fledglings) are no longer dependent on the nest site as determined by a qualified biologist; unless, it is determined by DFG that proposed construction activities would not impose impacts that could result in nest failure to Swainson's hawks. During construction, monitoring of active nests shall be conducted (funded by the project proponent). The monitoring shall be done by a DFG approved raptor biologist. Exact implementation shall be coordinated with DFG and will be based upon specific information at the project site.</p> <p>4.3-4(c) If a nest tree is to be removed and fledglings are present, the nest tree may not be removed until September 15 or until the DFG has determined that the young are no longer dependent on the nest tree.</p> <p>4.3-4(d) In the event that a nest is abandoned, despite efforts to minimize disturbance, and if the nestlings are still alive, the project proponent shall contact DFG and, subject to DFG approval fund the recovery and hacking (introduction to the wild of captive raptors) of the nestling(s). The project proponent shall consider initiating construction prior to the nesting season to discourage Swainson's hawks from nesting in the vicinity of an upcoming construction area.</p>				
4.3-5 Development could reduce or destroy potential habitat for the valley elderberry longhorn beetle.	<p>4.3-5 As a condition of project approval, all project proponents in the area where elderberry shrubs have been identified shall:</p> <p>(a) Consult with the USFWS to confirm if the on-site elderberry shrubs are considered suitable habitat for the VELB. Should the USFWS not consider the on-site elderberry shrubs as VELB habitat, then no further mitigation shall be required; or</p>	Prior to start of grading/construction.	Throughout construction	City Planning Division USFWS	Date/Initial: _____ _____

MINUTE PAGE 001802
 CALENDAR PAGE 148

**Table 1
Mitigation Monitoring Program
WEST SACRAMENTO RIVERFRONT PARK IMPROVEMENTS PROJECT**

Impact	Mitigation	Monitoring Duration		Responsibility	
		One-time	Ongoing	Agency	Verification
BIOLOGICAL RESOURCES					
	<p>(b) If the USFWS determines the on-site elderberry shrubs to be VELB habitat, then the project proponent shall either avoid disturbance or obtain the necessary incidental take permit from the USFWS pursuant to the Federal Endangered Species Act. The project proponent shall implement all the terms and conditions of the USFWS incidental take permit. Typically, VELB take permits require the transplant of the impacted shrubs to a USFWS approved mitigation site and compensation plantings of up to a 5:1 ratio of elderberry plantings to elderberry stems greater than one inch in diameter that are impacted. Planting of indigenous riparian species is also required to accompany the elderberry replacement plantings.</p> <p>(c) A potential mitigation measure for VELB impacts would be participation in the Yolo County Habitat Conservation Plan (HCP). Participation will depend on the timing of project construction and the timing of the completion of the HCP. By current agreements with Yolo County and the USFWS, all federally-listed species will need to be avoided until the HCP is complete and adopted by the USFWS and local land use agencies. Therefore, if the VELB habitat is going to be affected prior to the completion of the HCP and necessary approvals, the project proponent will need to obtain a separate permit and implement the required mitigation for this project.</p>				
<p>3. Potential disturbance to the elderberry shrub near the intersection of Third and B Streets.</p>	<p>3. The City shall implement the following protective measures for elderberry shrubs and include them in the construction plans and specifications. Before construction activities are initiated, the following measures will be implemented:</p> <p>(a) Chain-link fencing or a similar construction fencing shall be placed at least 20 feet outside the dripline of the elderberry shrubs. All fencing will be done under direct supervision of a qualified biologist.</p> <p>(b) The fence shall be posted with a sign that reads as follows: "This area is potential habitat of the valley elderberry longhorn beetle, a threatened species, and must not be disturbed. This species is protected by the Federal Endangered Species Act of 1973, as amended. Violators are subject to prosecution, fines, and imprisonment."</p>	<p>Include in construction specs/ prior to start of construction</p>	<p>Throughout construction</p>	<p>City Engineering Division</p>	<p>Date/Initial: _____</p>

BIOLOGICAL RESOURCES					
	<p>(c) The buffer zone within the fence shall remain off-limits to construction activities, vehicles, wastes, and construction materials.</p> <p>(d) The fence shall remain in place until final construction is complete.</p> <p>(e) Dust-reducing construction measures will be used to minimize the amount of dust near the shrubs. These measures include minimizing the amount of time that surfaces are exposed, sprinkling exposed areas and soil pile with water periodically, and covering soil piles with plastic sheets or tarpaulins to limit disturbance.</p>				
4.3-6 Construction activities along the riverfront may result in increased turbidity during migratory phase of anadromous salmonids and disturbance to special status resident species spawning habitat.	4.3-6 Implement Mitigation Measures 4.3-3 (a-c) (i.e., avoidance of construction along the bank or within the Sacramento River between October 15 and April 15; implement CDFG Streambed Alteration Agreement; and minimizing impacts to fisheries using BMP's).	Prior to start of grading/construction	Throughout construction.	City Planning Division City Engineering Division	Date/Initial: _____ _____
4.3-7 Development may result in removal of tree species, including native oak trees.	4.3-7 The City of West Sacramento shall require mitigation for the loss of significant, heritage, and landmark trees, and certain native oak trees (as defined in the City's Tree Preservation Ordinance) within the Washington Specific Plan Area. Where significant trees, heritage trees, landmark trees, or native oak trees greater than 12 inches diameter at breast height (d.b.h.) in size are lost due to development, they shall be replaced on an inch per inch basis. The recommended replacement ratio is 1:1, or replacement planting of one inch for each inch d.b.h. lost. The planting of street trees within the Plan Area shall be credited towards the need to replace the loss of significant, heritage, landmark and native oak trees.	Planting plan to be approved prior to start of construction.	Replacement plantings to occur during project construction	City Planning Division	Date/Initial: _____

CULTURAL RESOURCES					
	<p>4.20-3(b) When Native American archaeological, ethnographic, or spiritual resources are involved, all identification and treatment shall be conducted by qualified archaeologists who are either certified by the Society of Professional Archaeologists (SOPA) or who meet the federal standards as stated in the Code of Federal Regulations (36 C.F.R. 61), and Native American representatives who are approved by the local Native American community as scholars of their cultural traditions. In the event that no such Native American is available, persons who represent tribal governments and/or organizations in the locale in which resources could be affected shall be consulted. When historic archaeological sites or historic architectural features are involved, all identification and treatment is to be carried out by historical archaeologists or architectural historians. These individuals shall meet either SOPA or 36 C.F.R. 61 requirements.</p> <p>4.20-3(c) If human bone or bone of unknown origin is found during construction, all work shall stop in the vicinity of the find and the County Coroner shall be contacted immediately. If the remains are determined to be Native American, the Coroner shall notify the Native American Heritage Commission who shall notify the person it believes to be the most likely descendant. The most likely descendant shall work with the contractor to develop a program for reinterment of the human remains and any associated artifacts. No additional work is to take place within the immediate vicinity of the find until the identified appropriate actions have been carried out.</p>				
DRAINAGE AND FLOODING					
<p>Potential effect of proposed vegetation planting on the hydraulic capacity of the flood control system (Sacramento River).</p>	<p>The City of West Sacramento shall submit an encroachment permit application to the (State) Reclamation Board, including project analyses, drawings, plans, and specifications for the proposed project. Project information shall also be submitted to Reclamation District 900 and DWR Maintenance Area 4 to obtain the endorsement of the (levee) maintenance agencies. The information submitted shall include an analysis of the hydraulic effects of proposed vegetation on hydraulic capacity of the flood control system. The project shall be designed to meet the Regulations of the Reclamation Board for Encroachments into Adopted Plans of Flood Control, except where minor variances are reviewed and approved by the Reclamation Board and maintenance agencies. The City of West Sacramento shall supply project information, as required, to the Corps of Engineers for its use in reviewing potential impacts of the project on flood control facilities and in assisting the Reclamation Board in review of the encroachment permit application.</p>	<p>Prior to issuance of a permit from the Reclamation Board and City building permit.</p>		<p>City Engineering Division</p>	<p>Date/Initial: _____</p>

EARTH RESOURCES					
4.18-3 Development would include grading and construction activities that could potentially encounter groundwater.	<p>4.18-3(b) If dewatering of a construction site is required, subdrains, reinforced concrete retaining walls and waterproofing methods shall be utilized as necessary to eliminate the effects of subsurface groundwater conditions. The subdrain plan shall form part of the final plans for the project and would be prepared with the recommendations of a Certified Engineering Geologist.</p> <p>4.18-3(c) Dewatering shall comply with applicable requirements established by the Central Valley Regional Water Quality Control Board (including any runoff control requirements) and any applicable local permit requirements and shall be coordinated with City Public Works.</p> <p>4.18-3(d) Moisture barriers around foundations shall be used where applicable, to prevent moisture changes from adversely affecting soils beneath a structure.</p> <p>4.18-3(e) Where required due to high groundwater, excavations shall be shored as required by the Office of Safety and Health Administration (OSHA) to preclude slope failures during the construction period. Shoring shall use standard stabilizing methods, such as tiebacks, as necessary to retain excavation areas.</p>	Prior to start of grading/construction		City Engineering Division	Date/Initial: _____
NOISE					
4.7-1 Development would cause temporary increases in construction noise levels on and around the project site.	<p>4.7-1(a) To minimize the noise impacts of nearby residents during noise-sensitive periods, construction within 500 feet of existing residences shall be limited to between the hours of 7:00 A.M. and 7:00 P.M. on weekdays and 8:00 A.M. to 5:00 P.M. on weekends. For construction areas less than 1,600 feet from existing residences, work may only occur outside the designated hours by special permit from the City of West Sacramento stating the compelling environmental reasons for construction during those hours.</p> <p>4.7-1(b) Construction equipment shall be properly outfitted and maintained with noise reduction devices to minimize construction-generated noise. Wherever possible, noise-generating construction equipment shall be shielded from nearby residences by noise-attenuating buffers such as structures or truck. Alternatively, the equipment could be placed into a pit.</p> <p>4.7-1(c) The contractor shall locate stationary noise sources as far away as feasible from noise sensitive land uses.</p>	Include in all construction contracts prior to start of construction.		City Engineering Division	Date/Initial: _____

Mitigation Monitoring Program
WEST SACRAMENTO RIVERFRONT PARK IMPROVEMENTS PROJECT**

Impact	Mitigation	Monitoring Duration		Responsibility	
		One-time	Ongoing	Agency	Verification
NOISE					
4. Potential noise effects on nearby residents due to public events that may be held in the riverfront park/plaza areas.	4 (a) The City shall not allow events with amplified sound to be held at the Grand Staircase between the hours of 10 p.m. and 7 a.m. 4 (b) Exterior sound levels measured at any affected residential property shall not exceed 75 dBA for a cumulative period of 30 minutes per hour.	Planning Dept. to review each special event permit		City Planning Division	Date/Initial: _____
TRANSPORTATION/TRAFFIC					
4.5-36 Potential safety hazard to pedestrians at I Street bridge railroad tracks.	If development occurs adjacent to operating railroad lines, the individual developments shall install protective fencing adjacent to the railroad right of way to prevent pedestrian crossings of railroad tracks at points other than public street grade crossings.	Prior to issuance of grading/construction permit		City Engineering Division	Date/Initial: _____
WATER QUALITY					
4.14-1 Potential for degradation of surface water quality due to construction.	The City of West Sacramento shall ensure that all construction contracts subject to the NPDES requirements (i.e. involving disturbance of 5 acres or more) contain a requirement that contractors file a Notice of Intent for coverage under the City's State General Construction Activity Stormwater Permit (No. CA5000002), or any other applicable permit requirements.	Prior to issuance of grading/construction permit		City Engineering Division	Date/Initial: _____
