OTHER PERTINENT INFORMATION

On October 17, 1995, the Commission authorized the Staff to apply for and, if granted, expend funds from the Hazard Mitigation Grant Program managed by the Federal Emergency Management Agency (FEMA). Those funds were being made available through the Office of Emergency Services (OES) and FEMA to mitigate the effects of future earthquakes. Staff's purpose in pursuing these resources has been to develop regulations and guidelines establishing design criteria to respond to seismic ground motion and soil liquefaction and addressing fire detection and suppression for both new and existing marine oil terminals
