2. The Lessee submitted an application to amend Lease No. PRC 7969.9 to accommodate a short-term channel repair project around Rank Island. The project was needed to restore this reach of the river to conditions prior to the 1997 flood and maintain the flows in the north channel of the San Joaquin River around Rank Island. The project is a short-term solution to reduce further channel degradation and provide temporary relief from the effects of reduced flows in the north channel. The project involves the construction of a temporary berm at the upstream end of the south channel and the placement of approximately 575 cubic yards of washed and clean cobble material in the south channel.
3. A Finding of No Significant Impact (FONSI) was prepared and adopted for this project by the U.S. Bureau of Reclamation. The document was circulated for public review as broadly as state and local law may require and notice was given meeting the standards in Title 14, California Code of Regulations, section 15072(a). Therefore, pursuant to Title 14, California Code of Regulations, sections 15221 and 15225, the staff recommends the use of the federal FONSI in place of a Negative Declaration.
4. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.

APPROVALS OBTAINED:

United States Bureau of Reclamation; United States Army Corps of Engineers; State Department of Fish and Game.
