portion of the beach, and if conditions warrant, construct an additional 600-foot long, 15-foot high winter sand berm seaward of the base of the abutment of the Goleta Pier. The proposed berms will be constructed out of approximately 7,000 cubic yards of sand excavated from a site approximately 1,200 feet downcoast of the proposed berms.

3. The County anticipates periodic maintenance of the sand berm by pushing sand from the beach immediately seaward of the berm back onto the berm with bulldozers until its removal prior to Memorial Day, 2002.
4. On November 16, 2001, the California Coastal Commission (CCC) granted Permit # 4-010-136 for this project under its certified regulatory program (Title 14, California Code of Regulations, section 15251 (c)). Staff has reviewed the document and determined that the conditions, as specified in Title 14, California Code of Regulations, section 15253 (b), have been met for the Commission to use the environmental analysis document certified by the CCC as an equivalent in order to comply with the requirements of the CEQA.
5. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
