CONSIDER APPROVAL OF A TITLE SETTLEMENT AGREEMENT  
INVOLVING CERTAIN REAL PROPERTY IN AND ADJACENT TO  
THE SAN JOAQUIN RIVER, FRESNO AND MADERA COUNTIES

PRIVATE PARTY:

Angie Spano, as Trustee under the Last Will  
and Testament of Oscar P. Spano  
c/o M. Carlson Lee  
777 West Shaw Ave  
Fresno CA 93704

BACKGROUND:

The State of California owns the bed of the San Joaquin River between the two ordinary low water marks (OLWMs) (Civil Code §830). The entire river between the ordinary high water marks (OHWMs) is subject to a Public Trust Easement as described in State of California v. Superior Court (Fogerty) 29 Cal 3rd 210 (1980). This easement and the fee owned lands in the bed of the San Joaquin River are under the jurisdiction and control of the California State Lands Commission (CSLC) pursuant to Public Resources Code §§6301 and 6216.

In 1976, the CSLC began a comprehensive investigation of the historical factual evidence relating to the San Joaquin River in order to determine the location of the State's sovereign property interests between Friant Dam and Highway 99. Upon completion of that study, this office prepared, printed and distributed the **San Joaquin River Administrative Maps** to the county, city and other interested parties in April 1992.

Based upon the **San Joaquin River Administrative Maps**, the land that is the subject of this proposed title settlement agreement involves lands within historic high and low water channels as it passes through the private party's (Spano) record title lands. The legal ownership and precise boundaries of the San Joaquin River involving public and private property interests can only be determined by agreement of the parties or litigation. Rather than go through the expensive, time consuming and unpredictable course of litigation, Spano has requested that a mutually agreeable title settlement be entered into. Spano is proposing to sell most of her holdings along the river to the Trust

for Public Land and San Joaquin River Parkway and Conservation Trust. Those lands will ultimately be conveyed to the San Joaquin River Conservancy (Conservancy). A part of that acquisition involves a quitclaim of the bed of the river below the low water mark to the CSLC.

In the area involved in the proposed settlement, the San Joaquin River has been affected by human activities which have had a direct impact upon, among other characteristics, the River's location, velocity and volume of flow, seasonal flow patterns, and sediment transport and deposition. Examples of the direct artificial influences are the impoundment and diversion of water for agricultural, recreational, and flood control purposes by the construction and operation of Friant Dam, and gravel extraction. Consequently, the pre-artificial conditions and location of the OHWM and OLWM in this area along or through the subject property no longer is reflected by current channel configurations. These changes have also had an impact on the location and extent of the riparian corridor along the river and the public trust values associated therewith.

Uncertainty exists as to the precise factual and legal location of the OHWM and the OLWM of the San Joaquin riverbed before the flows were controlled and artificial influences impacted the river. There is a *bona fide* dispute between the State and Spano as to the existence, extent, nature and location of their respective rights, titles and interests in the subject property.

A judicial resolution of the parties' rights, titles and interests in the subject property could require costly, protracted, and vigorously disputed litigation with uncertain results if the controversy could not be resolved by settlement. The parties consider it expedient, necessary and in the best interests of the State, the public, and Spano to resolve this title dispute by compromise settlement, thereby avoiding the anticipated substantial costs, time requirements, and uncertainties of such litigation.

The proposed Title Settlement Agreement provides for: (1) the acceptance of a quitclaim deed from Spano to the CSLC for those portions of the river below the Low Water Mark adjacent to the lands being conveyed to the Conservancy; and (2) conveyance of a 49-year non-exclusive easement, as described in Exhibit C, from the CSLC to Spano for gas monitoring, well maintenance and slope maintenance.

Spano has requested that the CSLC execute a mutual waiver and release of owner's liability relating to toxic or hazardous materials in exchange for Spano's conveyance of a quitclaim deed to the State of any private right, title or interest in the riverbed. CSLC staff is unable to recommend that the CSLC approve such a release of liability at this time. Staff believes that additional information is needed about past usage of the

CALENDAR ITEM NO. **C71** (CONT'D)

property for disposal of toxic materials or the presence of other recognized environmental conditions. Staff will bring this matter back to the CSLC if, after reviewing the uses made of the property and any environmental assessment that has been prepared, staff can recommend that a waiver and release of hazardous substance liability is in the best interests of the State of California.

**OTHER PERTINENT INFORMATION:**

1. The State, acting by and through the CSLC, is authorized under Division 6 of the Public Resources Code, and specifically pursuant to sections 6307 and 6357 of such code, to enter into property exchange and boundary line agreements.
2. Pursuant to Government Code section 66412(e), provisions of the Subdivision Map Act do not apply to title settlement agreements to which the CSLC is a party.
3. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (Title 14, California Code of Regulations, section 15061), the staff has determined that this activity is exempt from the requirements of the CEQA as a statutorily exempt project. The project is exempt because it involves settlements of title and boundary problems.

Authority: Public Resources Code section 21080.11.
