**CONSIDER APPLICATION FOR A NEGOTIATED SUBSURFACE
(NO SURFACE USE) OIL AND GAS LEASE,
SNODGRASS SLOUGH,
SACAMENTO COUNTY**

APPLICANT:

Sunset Exploration, Inc.
Attn.: Mr. Robert E. Nunn
10500 Brentwood Blvd.
Brentwood, CA 94513

AREA, LAND TYPE, AND LOCATION:

Negotiated subsurface (no surface use) Oil and Gas Lease of approximately
30.3 acres in the bed of Snodgrass Slough, Sacramento County, California.

BACKGROUND:

Sunset Exploration, Inc., has submitted a complete application for a negotiated
subsurface (no surface use) Oil and Gas Lease on approximately 30.3 acres in
the bed of Snodgrass Slough, Sacramento County (Exhibit A, attached hereto).
Because the State land is a waterway, surface locations for oil and gas
operations (drill sites) are not available. However, oil and gas resources that
may underlie the State land can be developed and protected pursuant to the
California State Lands Commission's negotiated subsurface (no surface use) Oil
and Gas Lease. This would permit Commission-approved directional drilling
from a county-approved drill site and would permit inclusion of the leased lands
in a Commission-approved pooled area or unit.

Public Resources Code section 6815(a) authorizes the Commission to negotiate
and enter into oil and gas leases on State lands if any of the following exists:
wells drilled on private or public lands are draining or may drain oil and gas from
the State lands; the Commission determines the State lands to be unsuitable for
competitive bidding because of such factors as their small size or irregular
configuration or their inaccessibility from surface drill sites reasonably available

or obtainable; the State owns a fractional mineral interest in the lands; or the Commission determines the lease to be in the best interests of the State.

Because the Applicant controls, by lease or other agreement, all of the private property adjacent to the State land described in Exhibit A, and because the Applicant has county (CEQA Lead Agency) approval to drill a well near the State land, Commission staff has concluded that the criteria of Public Resources Code section 6815(a) have been satisfied. A negotiated subsurface (no surface use) Oil and Gas Lease with the Applicant will protect oil and gas resources that may underlie the State land.

OTHER PERTINENT INFORMATION:

1. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (Title 14, California Code of Regulations, section 15061), the staff has determined that this activity is exempt from the requirements of the CEQA under the general rule that the CEQA applies only to projects which have the potential for causing a significant effect on the environment. The staff believes, based on the information available to it, that there is no possibility that this project may have a significant effect on the environment.

Authority: Title 14, California Code of Regulations, section 15061 (b) (3).

2. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code Sections 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
3. The lease will have a primary term of five years. However, if all or part of the leased lands are included in a Commission-approved pooled area or unit, then drilling operations on and production from lands pooled or unitized with the leased lands shall be deemed to be drilling operations on and production from the leased lands that are included in the Commission-approved pooled area or unit.
4. Annual rental of \$30 per acre (\$909 for approximately 30.3 acres).
5. Royalty of 20 percent on gas and oil.
