Easement:

An easement exists for purposes of public ingress and egress to a portion
of the leased premises over, across, and upon the adjacent upland.

CALENDAR ITEM NO. **C62** (CONT'D)

OTHER PERTINENT INFORMATION:

1. Applicant owns the uplands adjoining the lease premises.
2. In August 1972, the Commission issued a 15-year lease to the then owners of the Shore Cliff Lodge, Howard F. Detwiler, Arno Roscher and Howard L. Endlich, a Joint Venture Partnership, dba Shore Cliff Lodge. The Shore Cliff Lodge is located on a 100-foot bluff above the Pacific Ocean in Pismo Beach. The owners were proposing to construct a public access stairway down to the beach, and construct a seawall and backfill to create a public beach area. The lease covered the seawall and beach area. A condition of the original lease was recordation of an easement for public ingress and egress and parking involving the upland leading to and from the leased premises. The City of Pismo Beach accepted the easement. The Lessees agreed not to discourage public use of the easement and beach area by the posting of signs, or otherwise.

In November 1979, the lease was assigned to Shorecliff Properties, Inc., and amended to include an additional lease area needed for the installation of concrete plugs and rock riprap. In July 1987, the Commission authorized a new 15-year lease to Shorecliff Properties, Inc. By executing the new lease, the Lessee acknowledged the recorded easement for public ingress and egress and the requirement that they not discourage public use of the easement and beach area. At its meeting on September 23, 1991, the Commission authorized the assignment of the lease from Shorecliff Properties, Inc., to TIC World-Wide Corporation effective December 11, 1990.

Most recently, the Commission authorized the assignment of the lease to Martin Resorts, Inc., the current Lessee, effective May 1, 2002. Martin Resorts, Inc., has submitted an application for a new lease to maintain the seawall, beach area and rock embankment protection. The new lease will include the language acknowledging the recorded easement for public ingress and egress and the requirement that the Lessee not discourage public use of the easement and beach area.

3. At its meeting of September 17, 2001, the Commission considered and adopted the staff report entitled "Shoreline Protective Structures". In adopting the report, the Commission directed staff to look at a number of factors when processing applications for shoreline protective structures. Specific items to be considered include impacts on the public's ability to

CALENDAR ITEM NO. C62 (CONT'D)

utilize sovereign lands, impacts to public trust resources and the environment. Staff was also directed to charge rent consistent with existing regulations.

Beginning with the original lease that was issued in 1972, annual rent has been paid by the Lessees. The original and subsequent leases also acknowledged the public benefit accruing from the public use of, and right, of access to and from a portion of the lease premises. The current annual rent is \$2,428 and, staff is recommending that the new annual rent be set at \$3,870, plus the public benefit accruing from the public's ability to access and use a portion of the lease premises.

4. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (Title 14, California Code of Regulations, section 15061), the staff has determined that this activity is exempt from the requirements of the CEQA as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; Title 2, California Code of Regulations, section 2905(a)(2).

Authority: Public Resources Code section 21084 and Title 14, California Code of Regulations, section 15300 and Title 2, California Code of Regulations, section 2905.

5. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
