AREA, LAND TYPE, AND LOCATION:

Negotiated subsurface (no surface use) Oil and Gas Lease No. PRC 8349 and Lease No. E-415.1 contain approximately 58.59 acres and 2,827 acres respectively of tide and submerged lands in the beds of Georgiana Slough and the Mokelumne River in Sacramento and San Joaquin Counties, California.

BACKGROUND:

Negotiated subsurface (no surface use) Oil and Gas Lease No. PRC 8349 (Lease) was entered into on November 8, 2001, between the California State Lands Commission (Commission) and Towne Exploration Company (Towne). Easement 415.1 was issued to Standard Oil Company of California on June 3, 1940. A gas lease between the Commission and Standard Oil Company of California was issued in exchange for Easement 415.1, effective December 20, 1963. Through a series of assignments, the present lessee of Lease No. E-415.1 is Calpine Natural Gas Company (Calpine). Paragraph 22(b) of Lease

No. PRC 8349 and Paragraph 2 of Lease No. E-415.1 allow the lessee(s), with the consent of the State and under terms and conditions approved by the State, to pool or unitize all or part of the leased lands with lands held by the lessee or others.

Towne has drilled the Tyler Island 5-2 well from a location on Lease No. PRC 8349 and completed it under Lease No. E-415.1. The well is capable of commercial natural gas production. Towne and Calpine have formed an operating unit that contains a total of 27.747 acres of State and private leased lands (described in Exhibit A, attached hereto). This unit is called the "Tyler Island Farms 5-2 Unit" and was created for the development and production of natural gas. Towne and Calpine have requested that the Commission consent to the pooling of 9.351 acres of leased lands under Oil and Gas Lease No. PRC 8349 and 9.888 acres of leased lands under Lease No. E-415.1 by approving Towne's Declaration of Pooling, and pooling map, dated March 1, 2005, which will be called the "Tyler Island Farms 5-2 Unit." The State's unit share which includes a combined 19.239 acres represents approximately 69.337 percent (69.337%) of the Unit. .

The "Tyler Island Farms 5-2 Unit" will contain portions of two separate State leases with different royalty rates. The Lessee will be responsible for making payments for the share of the pool in each lease in accordance with the terms of the applicable lease.

Gas Lease No. PRC 8349 has a fixed rate of 20 percent (20%) on all gas substances and a fixed rate of 20 percent (20%) on all oil.

Lease No. E-415.1 requires the following payments:

- A) As a minimum, a sum representing the "market value" of thirty (30) percent of all gas produced from the State lands during the preceding calendar month;
- B) An additional sum equal to the amount by which fifty-one percent (51%) of the cumulative "net profits" derived from the operations in State lands up to the end of such calendar month exceeds the aggregate of:

CALENDAR ITEM NO. C46 (CONT'D)

- 1) All sums previously paid to the State, plus
- 2) The minimum amount currently payable to the State.

Production for the month of March 2005 for the "Tyler Island Farms 5-2" well was 21,084 MCF, and the leases paid an estimated royalty of \$8,228.83 for the portion Gas Lease PRC 8349 and \$22,188.54 for the portion allocated to Lease PRC 415.1, for a total of \$30,417.37. These royalty numbers were estimated by Towne based on the acreage proposed to be unitized.

Commission staff has evaluated the geology and reviewed the proposed unit and has determined that the share of the State's pooled acreage appears to be fair and equitable.
