3. Applicants have applied for a General Lease - Recreational Use to completely remove eight existing wood pilings and related concrete filled drums, and to construct a new pier. It is unknown when the eight wood pilings were placed in the Lake, however, they were never authorized by the Commission. The California Department of Fish and Game has provided guidelines for the piling removal and the installation of the new pilings. The new pier will be supported by 12 steel pilings driven into the Lake bottom using an amphibious vehicle to allow access to the site from the Lake. This method will be used to minimize disturbance to the lakebed. Construction equipment and materials will not be stored on the shoreline. As necessary, a turbidity curtain will be placed around the project site to minimize movement of disturbed sediment into the Lake. The time period for completing the work within the stream zone of Donner Lake is restricted to periods of dry weather and low water to minimize sediment disturbance.

4. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (Title 14, California Code of Regulations, section 15061), the staff has determined that this activity is exempt from the requirements of the CEQA as a categorically exempt project. The project is exempt under Class 3, New Construction of Small Structures; Title 2, California Code of Regulations, section 2905 (c)(1).

Authority: Public Resources Code section 21084 and Title 14, California Code of Regulations, section 15300 and Title 2, California Code of Regulations, section 2905.

5. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
