**CONSIDER REVOCATION OF A NON-EXCLUSIVE GEOPHYSICAL
SURVEY PERMIT ON TIDE AND SUBMERGED LANDS
UNDER THE JURISDICTION OF THE
CALIFORNIA STATE LANDS COMMISSION**

PERMIT HOLDER:

Fugro Pelagos, Inc.
Attn.: Mr. David Millar
3738 Ruffin Road
San Diego, CA 92123-1812

BACKGROUND:

Fugro Pelagos, Inc. currently holds a low energy statewide Offshore Geophysical Permit. These permits are issued to qualified companies to perform geophysical surveys of the ocean bottom for the purpose of geotechnical investigation of nearshore sand erosion and deposition studies, optic cable routes, oil and gas pipeline routes, marine facility sea bottom changes, seafloor hazards and debris, and location of sunken boats and airplanes. These low energy surveys utilize equipment such as side scan sonar and magnetometer, which use no more than two kilojoules of energy. Air guns and other sources of high energy are expressly prohibited in the permit. Upon request, the California State Lands Commission (CSLC) will receive copies of all data derived from any and all surveys under the permit.

Fugro Pelagos, Inc. has violated provisions of its Offshore Geophysical Survey Permit (PRC 8391) by conducting geophysical surveys without a National Oceanic and Atmospheric Administration (NOAA) approved Marine Wildlife Monitor onboard (per paragraph 6D of Permit 8391). A NOAA special agent contacted the CSLC staff on November 9, 2009, regarding a blue whale that was fatally injured on October 19, 2009. NOAA reported the incident as having occurred in State waters approximately 1-½ miles offshore during a multi beam sonar hydrographic survey that was being conducted by Fugro Pelagos, Inc., under a contract with NOAA.

CALENDAR ITEM NO. 40 (CONT'D)

Further, Fugro Pelagos, Inc. was also in violation of Permit PRC 8391 by conducting a geophysical survey in State waters without prior notification to the agency, as required in Exhibit C of the permit.
