J. Mattox

CONSIDER EXECUTION OF A MEMORANDUM OF UNDERSTANDING AMONG THE MEMBER AGENCIES OF THE MARINE PROTECTED AREA STATEWIDE LEADERSHIP TEAM, MARINE PROTECTED AREA COLLABORATIVE NETWORK STAFF, AND MARINE PROTECTED AREA COLLABORATIVE NETWORK MEMBERS, RELATING TO ADVANCING MANAGEMENT OF CALIFORNIA'S MARINE PROTECTED AREA NETWORK

BACKGROUND

The State of California completed designation of a network of Marine Protected Areas (MPAs) along the California coast as required by the Marine Life Protection Act (MLPA) (California Fish and Game Code section 2850 et seq.) in December 2012. While the California Fish and Game Commission has primary responsibility to implement the provisions of the MLPA, not all activities necessary to or beneficial in implementing the MPA network are the sole responsibility of any one entity. Many other agencies, including the State Lands Commission (Commission), are responsible for, and have undertaken, activities related to the protection, restoration, enforcement and management of natural resources of the State, including activities related to MPAs.

In 2014, the California Ocean Protection Council developed a Memorandum of Understanding (MOU) that brought together several State and Federal agencies with jurisdictional responsibilities important to MPA effectiveness, along with the Resources Legacy Fund Foundation,¹ in an effort to memorialize and facilitate cooperative planning, implementation, and management of MPAs. The Commission approved its participation in the MOU at its February 2015 public meeting ([Item 96, February 20, 2015](#)) and participates as a member of the MPA Statewide Leadership Team (MSLT), which meets to discuss effective implementation of the MOU and MPA management activities. The other members of the MSLT are: Ocean Protection Council, California Natural Resources Agency, California Department of Fish and Wildlife, California Fish and Game Commission, California Department of Parks and Recreation, State Water Resources Control Board, California Coastal Commission, California

¹ The Resources Legacy Fund Foundation is an independent non-profit organization that supports and performs essential services to promote land, freshwater and marine conservation; its role in the MOU is to assist the parties in achieving the implementation objectives of the MLPA by providing funding and other assistance.

STAFF REPORT NO. 85 (CONT'D)

Ocean Science Trust, National Park Service, and National Oceanic and Atmospheric Administration.

The California Fish and Game Commission adopted the MLPA Master Plan in 2016, which reflects MPA management goals and priorities in four key focal areas: Outreach and Education, Enforcement and Compliance, Research and Monitoring, and Policy and Permitting. The MSLT recognizes the key role played by the MPA Collaborative Network, which was established in 2013, because of its ability to aggregate local expertise that informs and supports the management of the MPAs across the state. The MPA Collaborative Network is made up of 14 individual collaboratives generally associated with California's coastal counties; the work of the individual collaboratives and the Collaborative Network have been critical to the success of the MPA management program to date.

PROPOSED MEMORANDUM OF UNDERSTANDING

In recognition of this value, the MSLT recognizes that there is a need to more clearly define the shared purpose, roles, and responsibilities of the partnership between the MSLT and the Collaborative Network and member collaboratives. The MOU attached as Exhibit A (Collaboratives MOU) seeks to formally recognize the MPA Collaborative Network's significant contributions to the management of the State's MPA Network, formalize the working relationship that has already been established between the MPA Collaborative Network and the MSLT, and increase the MPA Collaborative Network's representation on the MSLT to better reflect local knowledge related to MPA management across the state.

Commission staff recognizes the importance of local knowledge and coordination for effective MPA management and believes the proposed Collaboratives MOU represents an important framework for formalizing the role of the Collaborative Network and its 14 member collaboratives, and provides the necessary platform for bringing community stakeholder and local partner perspectives into MPA management by sharing priorities, reactions, and concerns about the MPA management program. The Commission, as a member of the MSLT, would join the other parties in building on past actions and relationships to facilitate increased collaboration and "localizing" of MPA management through identification of targeted regional projects.

OTHER PERTINENT INFORMATION:

1. Staff recommends that the Commission find that the subject authorization to execute a Memorandum of Understanding does not have a potential for resulting in either a direct or reasonably foreseeable indirect physical change in the environment, and is, therefore, not a project in accordance with the California Environmental Quality Act (CEQA).

STAFF REPORT NO. 85 (CONT'D)

Authority: Public Resources Code section 21065 and California Code of Regulations, title 14, section 15060, subdivision (c)(3) and 15378.

2. This action is consistent with Strategy 3.2 of the Commission's Strategic Plan, to commit to early and meaningful coordination and collaboration with local, state and federal agencies, California Native American Tribes, and local and regional communities.

EXHIBIT:

- A. Memorandum of Understanding to Advance Management of California's Marine Protected Area Network

RECOMMENDED ACTION:

It is recommended that the Commission:

CEQA FINDING:

Find that the subject authorization to execute a Memorandum of Understanding is not subject to the requirements of CEQA pursuant to California Code of Regulations, title 14, section 15060, subdivision (c)(3) because the subject activity is not a project as defined by Public Resources Code section 21065 and California Code of Regulations, title 14, section 15378.

AUTHORIZATION:

Authorize the Executive Officer or her designee to execute a Memorandum of Understanding in substantially the form as shown on Exhibit A among the member agencies of the Marine Protected Area Statewide Leadership Team, Marine Protected Area Collaborative Network staff, and Marine Protected Area Collaborative Network members, relating to advancing management of California's Marine Protected Area Network.

EXHIBIT A

MEMORANDUM OF UNDERSTANDING TO ADVANCE MANAGEMENT OF CALIFORNIA'S MARINE PROTECTED AREA NETWORK

I. OBJECTIVES

- 1.1 This Agreement outlines the purpose, roles, and partnership terms agreed upon by the Parties, as defined in Section II below, to advance the management of California's Marine Protected Area (MPA) Network. Parties represent state-, federal-, and local-level entities involved in California MPA management, including member agencies of the MPA Statewide Leadership Team (MSLT), the MPA Collaborative Network Staff, and the MPA Collaborative Network Members (described in Section III below). Representatives of the Parties worked together to develop the contents of the draft Agreement during a workshop in Sacramento on March 27-28th, 2017 and provided input throughout the subsequent Agreement development process.
- 1.2 The California Fish and Game Commission (Fish and Game Commission) recently adopted the Marine Life Protection Act (MLPA) Master Plan, which outlines the State's MPA Management Program and requires active engagement in four key focal areas: Outreach and Education, Enforcement and Compliance, Research and Monitoring, and Policy and Permitting. Since the inception of the statewide MPA Collaborative Network in 2013, its ability to aggregate local expertise to inform and support the management of the MPAs across the state has been critical to the success of the MPA Management Program. The MPA Collaborative Network is made up of 14 individual collaboratives generally associated with California's coastal counties. The Parties recognize that as a partnership between the MPA Collaborative Network and the State has grown, there is a need to more clearly define the shared purpose, roles, and responsibilities of this partnership (Partnership). This Agreement seeks to allow the Partnership to continue and to formally recognize the MPA Collaborative Network's significant contributions to the management of the State's MPA Network. This Agreement seeks to formalize the working relationship that has already been established between the MPA Collaborative Network and the MSLT, and to increase the MPA Collaborative Network's representation on the MSLT to better reflect local knowledge related to MPA management across the state.

II. PARTIES

- 2.1 This section describes the Parties to the Agreement and their roles within the Partnership. The Partnership will strive for an inclusive approach that incorporates input from all Parties as appropriate to inform California MPA management priorities.

- 2.2 The MSLT is an advisory body that promotes active and engaged communication among entities with significant authority, mandates, or interest in California's MPA Network, and advises on the MPA Management Program. The MSLT also coordinates among the Parties to identify shared priorities for the MPA Management Program and coordinate with MPA collaboratives on locally-driven initiatives.

The MSLT consists of an Executive Committee and a Working Group. The Executive Committee, which includes the Secretary for Natural Resources and directors of member agencies and organizations, meets biannually to review progress and set priority work areas. The Working Group includes a representative from each member agency or organization and meets quarterly (with additional calls as needed) to complete tasks and projects identified by the Executive Committee and identify priority work areas for Executive Committee approval.

- 2.2.1 The process for establishing tribal and collaborative representation on the MSLT is ongoing. The Parties intend to include representation from California tribes and tribal communities, and intend to expand representation from local MPA collaboratives. This Agreement may be updated to describe tribal and collaborative participation as agreed by the Parties.
- 2.2.2 The Ocean Protection Council (OPC), consisting of the Secretary of the California Natural Resources Agency, Secretary for Environmental Protection, Chair of the State Lands Commission, two legislative members and two public members, was created by the California Ocean Protection Act of 2004. OPC is tasked with coordinating the activities of ocean-related agencies to improve the effectiveness of State efforts to protect ocean resources and establishing policies to coordinate the collection and sharing of scientific information related to coast and ocean resources.
- 2.2.3 The California Natural Resources Agency (Agency) is a State of California cabinet-level agency which seeks to restore, protect, and manage the state's natural, historical, and cultural resources for current and future generations using creative approaches and solutions based on science, collaboration, and respect for all the communities and interests involved. The Agency oversees the policies and activities of 26 departments, boards, commissions, and conservancies.
- 2.2.4 The California Department of Fish and Wildlife (Department) is a state department within the Agency that is the trustee for fish and wildlife resources in the State of California and has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants and habitat necessary for biologically sustainable populations of those species. The Department is also responsible for management of specific lands and waters under their ownership. With respect to MPAs, the Department seeks to accomplish the objectives of the MPA Management Program through management of cooperative implementation of the coastwide MPA Network in a collaborative, cost-effective manner consistent with the policies of the MPA Management Program and the Department's public trust responsibilities.

The Fish and Game Commission recently adopted the MLPA Master Plan, which outlines the State's MPA Management Program, and requires active engagement in four key focal areas: Outreach and Education, Enforcement and Compliance, Research and Monitoring, and Policy and Permitting. The Department is a managing agency under the Marine Managed Areas Improvement Act (MMAIA).

- 2.2.5 The Fish and Game Commission is a state agency within the Agency whose mission is to ensure the long-term sustainability of California's fish and wildlife resources. The Fish and Game Commission is responsible for hunting and fishing regulations and oversees the establishment of wildlife areas, ecological reserves, and the designation of MPAs under the MLPA. The Fish and Game Commission is a designating entity under the MMAIA.
- 2.2.6 The California Department of Parks and Recreation (State Parks) is a state department within the Agency whose mission is to provide for the health, inspiration, and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation. As a trustee agency, State Parks is responsible for managing approximately one quarter of California's coastline, including dune ecosystems, beaches, coastal wetlands, estuaries, and nearshore marine areas. State Parks is a managing agency under the MMAIA.
- 2.2.7 The State Water Resources Control Board (Water Board) is a state agency within the California Environmental Protection Agency whose mission is to preserve, enhance, and restore the quality of California's water resources and drinking water for the protection of the environment, public health, and all beneficial uses, and to ensure proper water resources allocation and efficient use, for the benefit of present and future generations. The Water Board oversees nine California Regional Water Quality Control Boards (Regional Boards). The mission of the Regional Boards is to develop and enforce water quality objectives and implementation plans that will protect the State's waters, recognizing local differences in climate, topography, geology, and hydrology.
- 2.2.8 The California Coastal Commission (Coastal Commission) is an independent, quasi-judicial state agency housed within the Agency. The Coastal Commission's mission is to protect, conserve, restore, and enhance environmental and human-based resources of the California coast and ocean for environmentally sustainable and prudent use by current and future generations. The Coastal Commission, in partnership with coastal cities and counties, plans and regulates the use of land and water in the coastal zone. Development activities, which are broadly defined by the Coastal Act to include (among others) construction of buildings, divisions of land, and activities that change the intensity of use of land or public access to coastal waters, generally require a coastal permit from either the Coastal Commission or the local government.

- 2.2.9 The California State Lands Commission is an independent, quasi-legislative state agency housed within the Agency that has exclusive control, jurisdiction, and administration authority over all ungranted tide and submerged lands and the reversionary and residual interest of the State as to public trust lands legislatively granted to local governments. The Commission serves the people of California by providing stewardship of the lands, waterways, and resources entrusted to its care through economic development, protection, preservation, and restoration. Its members include the Lieutenant Governor, the State Controller, and the Governor appointed State Director of Finance.
- 2.2.10 The California Ocean Science Trust (OST) is a non-profit organization established by the California legislature to support, advance, and coordinate science integration to California ocean policies and management. OST works to broaden participation in science and include diverse sources of knowledge to inspire involvement in and understanding of California's MPA Network.
- 2.2.11 The Resources Legacy Fund (RLF) is an independent non-profit organization that supports and performs essential services to promote land, freshwater, and marine conservation. Consistent with its mission, RLF has developed and administered many strategic charitable programs, including one which is designed to achieve significant advances in coastal and marine conservation in California. RLF seeks to assist the Parties to achieve the implementation objectives of the MPA Management Program by providing funding, as available, and other assistance.
- 2.2.12 The United States National Park Service (Park Service) is a federal agency within the United States Department of the Interior whose mission is to preserve unimpaired the natural and cultural resources and values of the national park system for the enjoyment, education, and inspiration of this and future generations. The Park Service cooperates with partners to extend the benefits of natural and cultural resources conservation and outdoor recreation throughout this country and the world. There are several coastal California parks that conserve, restore, and manage diverse coastal and ocean resources. The National Park System of the United States now comprises 417 areas covering more than 84 million acres in 50 states, the District of Columbia, American Samoa, Guam, Puerto Rico, Saipan, and the Virgin Islands.
- 2.2.13 The United States Department of Commerce, National Oceanic and Atmospheric Administration (NOAA) is a federal science agency whose mission is to understand and predict changes in Earth's environment and conserve and manage coastal and marine resources to meet the nation's economic, social, and environmental needs. The agency works to achieve five strategic goals: (1) protect, restore, and manage the use of coastal and ocean resources through an ecosystem approach to management; (2) understand climate variability and change to enhance society's ability to plan and respond; (3) serve society's needs for weather and water information; (4) support the nation's commerce with information for safe,

efficient, and environmentally sound transportation; and (5) provide critical support for NOAA's mission. Six line offices execute the programs required to achieve these goals: the National Weather Service; the National Marine Fisheries Service; the National Ocean Service; the National Environmental Satellite, Data, and Information Service; the Office of Oceanic and Atmospheric Research; and the Office of Program Planning and Integration. The Office of National Marine Sanctuaries manages 13 national marine sanctuaries and Papahānaumokuākea and Rose Atoll marine national monuments. Three of the four national marine sanctuaries off the California Coast have jurisdictions that overlap with state waters and the network of California MPAs.

- 2.3 MPA Collaborative Network Staff acts as a conduit between the MPA collaboratives and the MSLT to help identify shared priorities and opportunities for the Parties to provide support to one another. The MPA Collaborative Network Staff directly supports the MPA Collaborative Network Members and is also a member of the MSLT. Due to this unique bridging role, the MPA Collaborative Network Staff is highlighted separately from the MSLT and the MPA Collaborative Network Members throughout this document.
 - 2.3.1 In addition to liaising between the MPA Collaborative Network Members and the MSLT, the MPA Collaborative Network Staff facilitates sharing of best practices and lessons learned among MPA Collaborative Network Members. By spearheading the development of communications mechanisms and scheduling calls and meetings among the Parties, the MPA Collaborative Network Staff leads communication efforts among collaboratives as well as between collaboratives and the MSLT. The MPA Collaborative Network Staff consists of the Network Director and may grow to include additional staff.
- 2.4 The MPA Collaborative Network is composed of 14 member MPA collaboratives that provide a localized, comprehensive approach to ocean resource management by bringing together local experts and authorities in the areas of outreach and education, enforcement and compliance, and research and monitoring. MPA Collaborative Network Members represent community stakeholders involved in MPA management in California's coastal counties. The role of the MPA collaboratives is to coordinate with local partners and share local priorities, reactions, and concerns to inform MPA management. In addition, the MPA collaboratives work with the Parties to enhance management of MPAs through locally and/or regionally organized projects. Each of the MPA collaboratives and their mission statements are listed below, in order from north to south.
 - 2.4.1 Del Norte: Engaging diverse communities in support of MPAs and the resources they provide from Pelican Beach to Shelter Cove.
 - 2.4.2 Humboldt: Engaging diverse communities in support of MPAs and the resources they provide from Pelican Beach to Shelter Cove.

- 2.4.3 Mendocino: The mission of the Mendocino MPA Collaborative is to enhance effectiveness and increase awareness of Mendocino County's marine protected areas.
- 2.4.4 Sonoma: To connect and empower community stewards to promote the long-term sustainability of Sonoma Coast marine ecosystems.
- 2.4.5 Golden Gate: The Golden Gate MPA Collaborative is dedicated to community engagement to safeguard the ocean and coastal ecosystems of San Francisco and Marin Counties.
- 2.4.6 San Mateo: Enhance awareness and promote stewardship of MPAs as special, protected places and sources of ecological, recreational and commercial value through the coordinated activities of community partners.
- 2.4.7 Santa Cruz: Embedding awareness of marine protected areas into existing programs to increase community engagement in stewardship.
- 2.4.8 Monterey: Our mission is to use a collaborative approach to increase MPA literacy to facilitate respect and stewardship of our coastal marine environment.
- 2.4.9 San Luis Obispo: To inspire individuals to become ocean stewards by cultivating an understanding and appreciation of the value and purpose of our local MPA's through research, education and enforcement.
- 2.4.10 Santa Barbara Channel: Fostering diverse community engagement to assist in the management of Santa Barbara Channel MPAs.
- 2.4.11 Los Angeles: The Los Angeles MPA Collaborative channels broad and diverse perspectives to build ocean resilience and promote the cultural, recreational, and ecological value of Los Angeles County's marine protected areas.
- 2.4.12 Orange County: The mission of OCMPAC is to collaborate at a regional level to assist and inform the public and partner agencies in order to support the effective management of Orange County marine protected areas.
- 2.4.13 Catalina: To act as grassroots stewards of Catalina's marine protected areas through engagement of local stakeholders and island visitors.
- 2.4.14 San Diego: The San Diego MPA Collaborative is a federal, state, county, municipal, tribal, and community alliance that facilitates local communication and coordination to support the management of marine protected areas through; 1. Outreach and Education, 2. Enforcement and Compliance, and 3. Research and Monitoring.

III. RECITALS

- 3.1 The Parties recognize the importance and high priority of cooperative actions at local, regional, and statewide scales to manage the MPA Network created pursuant to the MLPA. Completed in 2012 following a science-based and stakeholder-driven planning process, the MPA Network now includes 124 MPAs and 15 special closures that encompass 16% of state waters and protect marine and coastal ecosystems between the borders of Oregon and Mexico. California recently adopted the MLPA Master Plan, which outlines the State's MPA Management Program, and requires active engagement in four key focal areas: Outreach and Education, Enforcement and Compliance, Research and Monitoring, and Policy and Permitting. This Agreement formalizes the relationship among Parties and solidifies the Parties' roles in advancing the MPA Management Program. The Parties will cooperatively undertake efforts to inform, support, and implement actions as part of the MPA Management Program. This Agreement provides a structure for aligning priorities to advance management of the MPA Network and lays the groundwork for seeking support and funding for those shared priorities.
- 3.2 The Partnership formalized through this Agreement will foster collaboration and create a platform for incorporating input from all Parties to advance the MPA Management Program. This Agreement confirms the role of MPA collaboratives, which provide valuable financial and human resource contributions to MPA management by providing local input to inform and help guide discussions among the Parties. This Agreement also reinforces the partnership among MSLT members and provides a platform for collaboration among the MSLT, MPA Collaborative Network Staff, and MPA collaboratives.
- 3.3 In keeping with the collaborative statewide approach to MPA management, the Parties are committed to a core value of diversity underlying all aspects of the partnership. The Parties seek inclusive participation in the MPA Management Program and the MPA Collaborative Network, involving all willing and able federal, tribal, state, and local governments as well as universities, coastal businesses, conservation organizations, fishing interests, fishery organizations, and other interested parties. The partnership honors and respects tribal government involvement, the right to government-to-government communications, and the ability of tribes to request formal consultations with agencies outside the MPA Collaborative Network framework.

IV. GENERAL TERMS

- 4.1 The Parties seek to manage California's MPA Network in accordance with the MLPA by integrating diverse local and statewide perspectives and expertise.

- 4.2 Goals are attainable, measurable conditions that the Parties will strive to achieve in the coming five years. The following shared goals apply to all the Parties collectively.
 - 4.2.1 Communication: Maintain and strengthen consistent communication, coordination, and information-sharing among Parties.
 - 4.2.2 Direction and Priorities: Collaboratively identify and coordinate on shared priorities for the partnership to advance management of the MPA Network.
 - 4.2.3 Funding and Staffing: Seek resources from the Parties and other diverse sources to support shared priorities.
- 4.3 The partnership will utilize the MSLT as the framework for facilitating collaboration among the Parties, including by using the existing MSLT meeting schedule to convene representatives from the Parties. Given that many Parties are current members of the MSLT, the partnership will augment the MSLT to build in representation of other Parties. In particular, the Parties are committed to adequate representation of the MPA collaboratives and tribes and tribal governments on the MSLT. The structure of the partnership and representation will evolve depending on the needs of the Parties and the resources available to the partnership.
- 4.4 The Parties recognize the value of evaluating collective achievements and shortcomings and implementing adaptive management to improve partnership functioning. Therefore, the Parties are committed to self-improvement, evaluation, and adaptive management of the partnership.

IN WITNESS WHEREOF, the Parties have caused this MOU to be executed by their duly authorized representatives.
