(10:12 a.m.)

77

The meeting will please come to MR. CRANSTON: L order. 2

In lieu of the raise for the Executive Officer that 3 has sometimes been discussed, we have a twenty-five year award 4 for the ty-five years of distinguished services for Frank 5 I'd like to just briefly summarize what his quite Hortig. 6 remarkable career has been with the State Lands Commission:

He first took temporary employment with the State 8 in the Division of Highways way back in 1930 and was there 9 again in '35 and '36. On July 25, 1935, he was appointed 10 engineering aid in the State Lands Division and was soon 11 12 assigned as a trouble shooter at the Huntington Beach Tidelands Oil Field, thus his continuous service has been linked 13 with that vital and important field. 14

On July 16, 1940, he was assigned by the State Lands 15 Commission to the supervision of all field operations for the 16 17 State Lands Division. In November 1950 he was appointed in 18 the just-them -established classification of Mineral Resources 19 Engineer, as head of the Mineral Resources Section. He 20 served from the period January 8, 1954 to April 3, 1956 as 21 the head of the Mineral Resources and Civil Engineering Sec-22 tions of the Division.

23 On March 11, 1957, he was appointed Assistant Executive Officer of the whole Lands Division and on July 15/ 24 25 1957 he was appointed as Executive Officer of the State Lands 28 Commission and Chief Administrative Officer of the State Lands

division of administrátive procedury, state of california

Division.

1

2

3

4

5

6

7

8

9

He achieved his twenty-five years of service on March 10, 1950, and in keeping with the slowness with which the government moves, it took us until this date to get around to give him the award.

He served in the armed services, U. S. Navy, during the period '43 to '46, and was released to inactive duty with the rank of Lieutenant, subsequently promoted to Lieutenant Commander.

The growth of the activities of the Lands Division 10 during the time that Frank has served has been truly remarkable. 11 In the period from "3" to '35 to the present, the staff has 12 grown from nine employees, with a budget of \$31,000 and with 13 revenues remitted to the treasury of \$292,000 in that first 14 year (only \$292,000 coming to the State); at the present time 15 we have 104 employees, budget of \$924,000, and, most importantly, 16 revenues accruing to the State of over \$16,900,000 in the last 17 year. which is sort of an average figure, I believe, During 18 the time when he was serving as Executive Officer, the posi-19 tion he presently holds, the income record for all time was 20 realized in '58-'59, when \$75,000,000 was remitted to the State 21 of California. 22

At this time it is a pleasure to me to award Frank this pin and also this certificate honoring him for his distinguished service to the State of California over many years. This is signed by Governor Brown, by Lieutenant Governor

division of administrative procedure, state of califoxilia

Ż

Anderson, by John Carr and myself, and by Frank Jordan. Frank, it's a pleasure to give this to you and more to work with you. Thank you very, very much.

By a sheer coincidence, which I can't quite believe, Frank's wife Helene is in the audience. Helene, would you stand up? (Applause) I think she does honestly believe it is a coincidence, but somebody must have guided her to this room on this occasion since it is the first time she has attended a State Lands Commission meeting.

Thank you very much, Frank.

12 MR. HURTIG: Thank you. If I may, Mr. Chairman - -12 from the development statistics which you have cited it must be apparent that there have been many challenging opportunities 13 34 during those years, which have formed the basis of a very interesting career for me. However, I hasten to assure the 15 Commission that the quantity and complexity of technology and 16 administrative problems of the Commission remaining unsolved 17 18 are increasing rather than decreasing, so there is still an abundant supply for the future, Particularly, I wish to thank 19 the Chairman for his very kind comments and the members of 20 21 the Commission individually and collectively for their guid-22 ance and cooperation.

23 MR. CRANSTON: Thank you very much, Frank. We will 24 now proceed with the regular calendar.

The first item to come before us is Item Classification 1 for permits, easements, and rights-of-way to be

Livision of Administrative procedure. State of California

granted to public and other agencies at no fee, pursuant to 1 statute. The first is to J. O. Archibald -- dredging permit 2 in Redwood Creek. San Mateo County. Is there any discussion 3 of that item? (No response) If not, we move to (b) -4 Applicant Imperial Beach, the City of -- structure permit for 5 a rock-mound groin. T & S lands of Pacific Ocean, San Diego 8 County; then item (c) - Sacramento County Department of 17 Public Works - a dredging permit. 8

9 If there is no discussion on any of those items 10 a motion for approval is in order.

GOV. ANDERSON: I'll move it.

MR, CARR: Second.

13 MR. CRANSTON: It has been moved and seconded to 14 approve them and it is unanimously so ordered.

15 Item Classification 2 -- Permits, easements, leased, 19 and rights-of-way issued pursuant to statutes and established 17 rental and fee policies of the Commission: Number (a) -18 Leo J. Nolan -- a ten-year ark site lease in Petaluma Creek, 19 Black Point, Marin County. If there is no comment, we will 20 move on.

21 MR. CARR: I'd like to ask a question about this, 22 Mr. Chairman. How many of these ark sites are there, Mr. 23 Hortig?

MR. HORTIG: In round numbers, Mr. Carr, probably fifty. There will be more in the near future because a series of cimilar leases are being completed for areas that

DIVISION OF ADMINISTRATIVE PROGEDURE, STATE OF CALIFORNIA

11

constitute trespasses on State lands in Mare Island Straits, 1 2 where people built cottages and recreational sites in error because of lack of certainty of the subdivision boundaries --3 which were only settled finally by the Superior Court in the 4 county after the structures had been built and it was found 嶅 6 that at least a portion of the structures were on State lands. 7 For those occupancies, a series of leases are being negotiated ---8 some ten or twelve at the last meeting -- and there will prob-9 ably be more presented to the Commission for approval in the 10 next and other meetings of the Commission.

MR. CARR: Mr. Chairman, there is a great deal of activity in Marin County on the development of these shore lines and I am wondering if the Planning Commission of Marin County has said anything about these things or knows about them, because they are thinking of development as in Newport Beach. I am wondering if this series of leases might be important.

18 MR. HORTIG: Mr. Carr, the staff agrees this is not 19 the way to plan. In all of the instances where ark sltes 20 have been brought to the Commission for approval, these have 21 constituted a lease for a structure that has been on the 22 property for many years. In the original series of ark sites 23 leases which were on Corte Madera Creek, which the Planning 24 Commission hasn't quarreled with, these were completed in 1942 to cover some ark sites which had been occupied for thirty. 28 years before, without any revenue to the State.

DIVISION OF ADMINISTRATIVE PROACOURS, STATE OF CALIFORNIA

NR. CARR: Mr. Chairman, I am familiar with that 1 grea there and I have no personal interest in it except from 撥 the standpoint of the development of the area. If this ark 3 or other arks have been there fifteen years (and I can remem-1 ber some of them are there for thirty years), why should we 6 extend this for ten years? Why don't we extend them for one 6 year and let the Planning Commission of Marin County get into 7 8 this, find out what the termination dates of these leases are, because they might have a much better development in 9 10 I think ten years is too much of an extension. that area. 11 This one ark site lease (and we are only talking about one) 12 might upset an orderly development of a mile of shore line. 13 I wouldn't vote in favor of extending this lease ten years. I would vote in favor of extending it one year, until the 14 IG county can get into it.

5

16 MR. CRANSTON: Do you wish to make an amendment to 17 that effect.?

18

19

28

MR. CARR: Yes.

GOV, ANDERSON: I'll second it.

MR. CRANSTON: It has been moved and seconded to change it m (a), to change the lease extension from ten years to one year, and the change is approved unanimously.

MR. CARE: And I would suggest this be referred to the Planning Commission of Marin County and see what they have to say.

MR. HORTIG: Mr. Chairman, may I ask Director Carr

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

would it be appropriate for the staff to consider this in effect a policy in connection with all renewals for ark site 2 3 purposes?

MR. CARR: I would say so. That land is too valuable to put it out for \$80 a year for one site which might impede an orderly and proper development, might upset the development and the State needs the money.

8 GOV. ANDERSON: The policy is not this -- but the 9 policy is that the local planning commission have a chance to 10 study it first.

11 MR. CARR: We might furnish them with the termination 12 dates of these leases, so they may consider it. Charge them a 13 suitable foe

14 MR. CRANSTON: Are there any comments on this? 15 (No response).

16 We move, then, to item (b) Pacific Gas and Electric 17 Company - 49-year gas pipe line easement, Whiskey Slough, 18 San Joaquin County. Any comments on that? (No response) If 19 not, item (c) - Shell Oil Company -- modification of submarine 20 geophysical exploration permit in Santa Barbara, Ventura, Los 21 Angeles, Orange and San Diego Counties to provide for use of 22 additional types of explosives.

23 MR. CARR: I'd like to hear the staff comment on 24 that, Mr. Chairman.

25 MR. HORTIG: Mr. Carr, Shell Oil Company currently 26 holds two valid geophysical exploration permits issued by the

DIVISION OF ADMINISTRATIVE PROCEDUR. . STATE OF BALIFORNIA

1

4

5

6

	State Lands Commission. The one issued later in point of
	time arrived when the technology, the approval of Fish and
ບ ~ ຼີ 3 ຢູ່ ຢູ່ ຍັນ	Game Commission for using alternate types of explosives
	(alternate to black powder) had been agreed upon; so the
* 5	earlier permit is restricted currently to the use of black
8	powder, and inasmuch as the time has arrived for renewal of
7	application of the permit term, it was feld desirable that the
8	older permit be modified to update it to coincide with the
9	latest type of permit issued by the State Lands Commission.
LO	MR. CARR: Does this latest type of explosive offer
11	any additional hazard, any different hazard, to the marine
12	life than what has been used black powder?
13 ,	MR. HORTIG: Not in the opinion of the State Fish
14	and Game Commission, within the limits prescribed by the
15	State Fish and Game Commission.
16	MR. CRANSTON: Moving to item (d) L. B. Spaulding
17	et al - termination of mineral extraction lease, San Diego
18	County; operation no longer economically feasible. If there
19	is no comment, we will move on to item (e) - Spight, Lindsey,
20	d.b.a. Diablo Communication Center Sublease to Central
21 ,	California Educational Television of portion of a lease of
22	school lands, Contra Costa County, to install two-way micro-
ຶ 23	wave relay station. Hearing no comment, we move to item (f) -
24	California Electric Fower Company 49-year easement for
25	overhead electric power transmission line, school lands Inyo
26	County; item (g) California Interstate Telephone Company

26

いたいであるというで

MR. HORTIG: Mr. Chairman, 11 I may interrupt at this point, items (f), (g) and (h) represent the completion of work on applications for right-of-way easements across a section of vacant State school land which the Commission in April of this year withheld from sale until such right-of-way easements were completed and a portion of the land had been arranged to be sold to the Division of Highways, Department of Fublic Works, as will be detailed in the next following item.

8

11 These, therefore, constitute a package elimination 12 of the title conflict problems which were to be resolved as a result of the Commission's having withheld the sale of these 13 specific lands. However, as to item (h), which is part of 14 15 the sequence -- easements required by the trustees of Deep 16 Springs College -- counsel for the client is reported to be 17 on vacation and, therefore, his law firm has requested on 18 behalf of the client that action on item (h) be deferred until 19 the next meeting of the Commission.

213 MR. CRANSTON: May I ask in regard to item (h) ---21 the easements are for 49 years. Is this being done in such a 22 way that the State at the end of the 49 years would be in a 23 position to further extend those easements?

MR. HORTIG: No sir. The present statutes provide 25 that in anticipation of the sale of the balance of the land, on which there is still an application pending, such land

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

would be sold subject to existing easements and at the end
 of the 49 years, the control over the easement area would be
 in the then holder of the surface.

9

MR. CRANSTON: Is the school being given all the protection it could be given?

6 MR. HORTIG: Yes sir, and has accepted and is agree-7 able to, and the counsel for Deep Springs School has expressed 8 complete satisfaction with the procedure here recommended; 9 and the deferment is requested only because he is, as I 10 stated, on vacation.

GOV. ANDERSON: Why would he want a deferment if they are satisfied?

MR. HORTIG: The counsel who is satisfied is the one on vacation. His law firm are unfamiliar with the problem, therefore in an abundance of caution have asked for the deferment.

MR. CRANSTON: A motion is in order for item (a)
as amended and through item (g).

19 GOV. ANDERSON: Is there any overlapping if we find 20 out the school was not satisfied with their portion of it, 21 with the grants of the 49-year leases to the California Electric 22 Power Company and Interstate Telephone Company? Would they 23 in any way conflict?

MR. HORTIG: No sir, and we have in addition complete agreements from all parties that these sales are in fact satisfactory to both the estate and the trustees of the

DIVISION OF ADMINISTRATIVE PROGEDURE, STATE OF CALIFORNIA

Deep Springs School.

1

2

3

4

B

6

7

8

9

MR. CARR: Mr. Chairman, I am just wondering --does this withholding of action on item (h) mean that any of this work is being deferred another month? What is the effect of withholding approval?

10

MR. HORTIG: Only the State Lands Commission approval of the easements is being deferred. No work is being stopped.

GOV. ANDERSON: I will move it.

MR. CARR: Second.

MR. CRANSTON: Moved and seconded that item (a) as amended through (g) be approved; so ordered.

12 Sales of vacant State school lands. All land sale 13 items here presented have been reviewed by all State agencies 14 having a land acquisition program and, unless otherwise indi-15 cated, no interest has been reported by these agencies in 16 the lands proposed for sale. (a) Department of Public Works, 17 Division of Highways

MR. HORTIG: Mr. Chairman, this is the land sale 18 item referred to previously, representing a portion of the 19 land required by Division of Highways because they are already 20 occupying and have for years occupied the area for a highway 21 maintenance station. The procedure here recommended is satis-22 factory to the Division of Highways. The Division is repre-23 24 sented here this morning by their attorney, Mr. Pegram, and 26 the only non-standard feature with respect to the recommenda-26 tion here is that these lands be sold in accordance with

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

11 standard Commission practice for a sale to a public agency at 1 the appraised value without the necessity of engaging in 2 competitive public bidding. 3 MR. CRANSTON: If there is no comment on (a), 4 item (b) - Grace M. Day.... 5 MR. CARR: Should we take these separately? I move 6 the approval of (a). 7 GOV. ANDERSON: Second. 8 MR. CRANSTON: Item (a) is approved unanimously. 9 Item (b) - Grace M. Day, bid for \$14,000. 10 11 MR. CARR: There are three parts to this, aren't 12 there, Mr. Hortig? MR. HORTIG: (a), (b) and (c). 13 MR. CARR: 1, 2 and 3 on item (b). Does that call 14 15 for three separate actions because we have to confirm two ettensions, or all in one action? I move approval of (b) 16 17 with the three actions on page 16. MR. HORTIG: With the resolution as stated, all 18 19 Commission action required will have been taken. 20 GOV. ANDERSON: Second. 21 MR. CRANSTON: Approved unanimously. Item (c) -22 Anthony E. Gallo, bid of \$1,577.40. 23 GOV. ANDERSON: I'll move it. 24 MR. CARR: Second. 25 MR. CHANSTON: Moved, seconded and unanimously 26 approved. Then, Item Classification 4 -- Selection and sales

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

BE SEN BRO

of vacant Federal lands: Item (a) State Park Commission,
 Division of Beaches and Parks -- selection of 120 acres in
 Santa Clara County; Item (b) Curtis Mitchell Rocca -- selec tion of 640 acres in Shasta County, including sale to applicant
 at appraised price of \$64,480. Motion is in order on those
 two items.

GOV. ANDERSON: Move it.

MR. CARR: Second.

9 MR. CRANSTON: Moved, seconded and unanimously 10 approved.

II Item 5 -- Recission of resolution in Minute Item 21 of 1/21/60; approval of negotiated sales price of \$75 per acre; finding land not suitable for agriculture without artificial irrigation; authorization for Executive Officer to issue patent to Elinor H. Black for cash amount of \$238.50, covering three plus acres of swamp and overflow survey, Tulare County. Motion is in order on that item.

18

17

8

GOV. ANDERSON: Will you explain that?

19 MR. HORTIG: Mr. Chairman, the Commission will re-20 call this particular sales item because it received particu-21 larly large press notice, which represented that the Lands 22 Commission was selling valuable land for \$2.80 at the time 23 the action was authorized to be completed, whereas the 2.80, 24 or whatever the specific amount is, represented a calculated 28 difference of unpaid interest which might or might not have 26 resulted in a forfeiture of title to the lands. The prior

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

recommendation to the Commission for consummation of this 1 transaction was based on an opinion from the Office of the 2 Attorney General. Subsequent to this completion and prior to 2 delivery of the patent to the land, further research in the 4 Office of the Attorney General revealed a contra opinion as 5 to authorization to proceed in the manner which had been pre-6 viously recommended. So, therefore, we are here today recomry. mending that the prior authorization to sell for simply the 8 amount of unpaid interest barrescinded, which payment does Q not constitute sufficient grounds for conveyance of the lands 10 according to the latest opinion of the Office of the Attorney 11 General, and instead it is being recommended that the lands 12 be sold, authorized to be sold, to the same successors to the 13 party in interest at a negotiated price -- to be sold to 14 these parties in interest because the statutes authorize sale 15 of lands of this type to actual settlers or their successors. 16 and the parties in interest are the actual settlers and it is 17 recommended that the land be sold at the negotiated price of 18 \$238.50, thereby clearing title on lands on which the parties 19 in interest and their predecessors had always held and for 20 more than fifty years they paid taxes to the county in which 21 they are located. 22 23

13

I'll move approval. MR. CARR:

GOV. ANDERSON: Second.

MR, CRANSTON: Moved, seconded and unanimously 25 29 approved.

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

GOV, ANDERSON: Before we go to other items, on the sale of lands what is the status. Mr. Hortig. of your program 2 of cross-checking all the sales with the other State agencies?

MR. HORTIG: As reported at the last meeting, 4 Governor Anderson, all land sales which are now brought to 5 the Lands Commission are brought only after all other State 6 agencies having land acquisition programs have screened the 7 proposed sales and indicated that they have no specific public 8 use which would be higher than the private sale for which 9 these lands are recommended. 10

GOV. ANDERSON: So we hold up the sales on most of 11 these lands during the period of checking. Now, would we 12 expect these lands to be put on the market as they are checked 13 in about the same speed as we had before? 14

MR. HORTIG: When the ultimate program which was 15 heretofore directed by the Commission for a full indexing, 1.6 classification and evaluation is feasible, then we will go 17 ahead with the full policy. 18

GOV. ANDERSON: When will that be?

MR. HORTIG: This is predicated on the study program 20 21 as to the availability and feasibility of using electronic processing equipment in order to process tremendous volumes 23 The program of study on the feasibility of this is 23 of data. being conducted currently by the Organization and Cost Control 24 Division of the Department of Finance under Director Carr. 25 26 MR. CARR: May I comment on that? I share your

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

19

1

impatience. I think it is taking altogether too long to get

 we can't speed this up, because I think we need it. I hope
 to have something more encouraging to report prior to next
 meeting.

15

6 MR. CRANSTON: May I ask if you can all hear what 7 is being said? Will each of you please move your mikes over 8 closer?

We now go to the usual subject of Long Beach -Classification 6: Item (a) Pier "A", Fire Station, second
phase; estimated subproject expenditure from 10/27/60 to
termination, \$129,800, with \$27,258 estimated as subsidence
cost. Any discussion on that item?

14 MR. HORTIG: By definition of "second phase" this 15 immediately classifies the project as one in which the Com-16 mission has heretofore approved in principle, and estimates 17 have now been developed so that a realistic estimate can be 18 presented to the Commission as to the potential costs and 19 they have been reported as a total of \$129,800, qualified to 20 be expended from tidelands funds pursuant to Chapter 29, of 21 which, as indicated, 21% approximately is estimated ultimately 22 may be subsidence costs -- which will ultimately be allowed 23 if and when final engineering review and audit by the State 24 Lands Commission indicates that the expenditures are so 25 qualified.

MR. CRANSTON: Item (b) is Back Areas, Piers A to

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

D; raise back area, berth 19; remove Harbor Department Administration Office Fullding and Garage (second phase); existing approvals under first phase are sufficient to cover first and second phase costs.

16

5 MR. HORTIG: This is an informative item to report 6 progress to the Commission and unique in the sense that in 7 the first approval sufficient amount was approved to permit 8 apparent completion, or at least estimated completion, of the 9 operation; but to complete the Commission's records and to 16 indicate that the Commission has been made aware of steps in 11 the process, this item was included for information.

12 MR. CRANSTON: Item (c) - Town Lot subproject -13 Pump Station No. 1, First Street at Pico Avenue, second phase; 14 estimated subproject expenditure from 10/27/60 to termination 15 of \$35,000 with \$22,050 estimated as subsidence costs.

16 A motion is in order to approve those three Long 17 Beach items.

GOV. ANDERSON: I'll move it.

MR. CARR: Second.

20 MR. CRANSTON: Moved, seconded and unanimously 21 approved.

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

T

2

3

Δ,

18

19

established --- by whom?

L

18

MR. HORTIG: By policy directive of the State Lends 2 Commission, which provides that on a determination in the sale 3 of escheated lands sold heretofore with mineral reservation 4 if it is determined that the lands do not have, in fact, any 5 current known mineral value (and particularly with reference 6 to parcels of this type, which is a single building lot in 7 the City of Sacramento) that under those circumstances the 8 Commission will issue a deed, as authorized by law, for an 9 arbitrary fee of \$10. 10

11 MR. CRANSTON: Does that cover our administrative 12 costs?

MR. HORTIG: In these days of inflation, post the time of determination of the policy by the Commission, the answer is probably "barely."

18 MR. CRANSTON: Motion is in order.

17 GOV. ANDERSON: So moved.

MR. CARR: Second.

19 MR. CRANSTON: Moved, seconded and unanimously 20 approved.

Item 8 -- Approval of compromise settlement of \$3,037 with Earl Snider as full payment to State for damages occurring by reason of timber trespass on 40 acres of land, Nendocino County.

25 MR. HORTIG: In timbering operations -- in timber 26 operators working on parcels which they believe legitimately

DIVISION OF ADMINISTRATIVE PROCEDURS, STATE OF GALIFORNIA

they have title to, and in areas where survey lines have become obscured over the years or may never have been actually run heretofore, it is extremely difficult to log precisely and, even when everyone is doing it with good intention, not to sometimes accidentally include someone else's trees.

Y.

13

Z

4

6

26

This is what occurred in this particular instance 6 in the operation of a timber operator who skimmed a row of 17 trees, or rows -- how many we can't tell precisely without a 8 survey which would cost more at this time than the total value 9 of the problem -- and the timber opcrator has since had finan-10 cial reverses. He has no independent means. It has been 11 determined independently that his financial insolvency is 12 factual and yet his son and brother have volunteered, for the 13 sake of the family, to enter into a compromise settlement with 14 the State to pay the State an wount of \$3,037 in settlement 15 of any damages which might be claimed by the State -- which 16 the Attorney General's office feels we could undoubtedly 17 secure a judgment for, but that the judgment would be meaning-18 less in the sense that there could be no way to enforce col-19 lection. 20

Therefore, it is recommended that as a compromise this appears to be the most favorable recommendation we can bring to the Commission because it is also the maximum amount that the son and brother feel that they are willing to offer the State in settlement.

GOV. ANDERSON: How often does this happen? Is

DIVISION OF ADMINISTRATIVE PROCEDURE, SYATE OF CALIFORNIA

this a practice that is quite common?

1

1. 1. 2 MR. HORTIG: It is not too common. It happens quite 3 frequently with small, independent operators, as this gentle-4 man was at the time that this trespass occurred.

5 G(V. ANDERSON: Is it the feeling that they do this 6 knowingly or unknowingly?

MR. HORTIG: No, the investigation indicated that 7 the trespass was accidental and that the gentleman in all good 8 faith at the time thought he was on his own land, otherwise 9 10 the staff would not here be recommending settlement rather than litigation. With the major timber operators, this is not 11 12 a problem generally because out of an abundance of caution 13 they re-establish or establish survey lines, if they have not 14 been established, before they cut; and so, consequently, there 15 are relatively few occasions where there are trespasses by major timber operators. An individual operation probably 16 17 nominally couldn't justify a survey line and the operator 18 proceeds and hopes he knows where the lines are.

19 There is still an area of doubt over this dividing 20 line over which this operator cut and, as I said, we have 21 survey estimate costs possibly running as high as \$20,000 to 22 determine precisely where this line was -- which might either 23 indicate that we should get less money or possibly a little 24 more money, but certainly not enough to justify a \$20,000 25 survey cost. The most economical and expeditious method of 26 clearing the record would appear to be to accept the settlement.

DIVISION OF ADMINISTRETIVE PROCEDURE, STATE OF CALIFORNIA

GOV. ANDERSON: I'll so move. 1 MR. CARR: Second. 2 MR. CRANSTON: Moved and seconded, unanimously 3 approved. 4 Item 9 -- Determination that plan and improvements 5 contemplated for certain granted T&S lands in Bodega Bay 6 7 would, if completed, constitute substantial improvement within the meaning of the grant, and conditional approval of plan. 8 MR. HORTIG: Mr. Chairman, starting with 1959 legis-9 10 lative grants of tide and submerged lands, the Legislature 11 uniformly added a condition that after ten years after the

20

grant the Lands Commission is required to make a study of the
operations conducted on the granted lands; and if the Lands
Commission can report that there have been substantial improvements placed within the terms of the grant and in conformance
with the conditions of the grant, then the grantee will thereafter hold the lands. Failing in that, the lands would revert
to the State of California.

19 In 1959, the County of Sonoma received a second 20 grant of tide and submerged lands, of those tide and submerged 21 lands still owned by the State in Bodega Bay, with the special 22 reservation I have just reported, but also additional language 23 that if the county can propose a plan which the Commission 24 can review in advance -- which, again, in turn, if completed 25 would constitute substantial compliance -- the Commission may 26 give such approval and, of course, with such approval the

County of Sonoma is in a much better position to arrange for financing and development.

21

The plans of the County of Sonoma for this operation 3 have been reviewed by the staff. They were presented by the 4 Board of Supervisors, representatives of the Harbor Commis-5 sion for the County of Sonoma, and their consulting engineers; 6 and it is felt that the plans do constitute a base, which if 7 completed would constitute substantial improvement within the 8 meaning of subdivision (g) of Section 1. Chapter 1064 of the 9 Statutes of 1959, the granting statute to the County of IO Sonoma; and, therefore, such approval at this time is recom-11 mended. 12

13 If the Commission desires any further details on 14 the plan or an expression of the position of the County of 15 Sonoma, Supervisor Guidotti of the County of Sonoma, who is 16 personally familiar with -- and this is hearsay from him to 17 me -- and has been fighting for this thing for thirty-two 18 years, is in the audience, as well as the consulting engineer 19 for the Sonoma County Harbor Commission.

20 MR. CARR: Mr. Chairman, there has been quite a 21 little publicity about this development in Bodega Bay in the 22 papers this last weekend. I would be interested in taking 23 the time, if you would, to hear a report as to just what this 24 project is. I think it would be interesting to know this in 25 the light of the development of other lands of similar types -28 whether we are going to develop our beaches and parks or

Division of administrative procedure. State of California

2

Another the counties are better able to do it. I am personally of the opinion that the counties can do an adequate job. MR. CRAMSTON: Frank, who might make such a report as Director Carr suggested?

1

2

3

de.

6

8

MR. HORTIG: Mr. Guidetti, would you feel that your engineer should make this report, or would you.....

MR. GUIDOTTI: I would prefer that our engineer 8 do it.

9 MR. CRANSTON: Did you hear Mr. Carr's comments? 10 MR. SARLES: No, I did not.

11 MR. CRANSTON: Mr. Carr, would you briefly state 12 what you would like to hear?

13 MR. CARR: Yes. I was up in the county over the 14 weekend and read some of the publicity in the papers -- there 15 was a map. I would like to know a little more about what 16 use you would put this to, who is going to pay for the devel-17 opment, who is going to enjoy it, what revenue is coming from 18 it, and who gets the revenue.

19 MR. SARLES: The proposal, Mr. Carr, is set out in 20 plans which we have filed with your Commission. There has 21 been a proposal placed on the bond election to authorize the 22 sale of two million dollars' worth of bonds. This two million 23 dollars will provide considerable dredging in the harbor, 24 which will - - as you probably know, that harbor is a broad 25 expanse of water at high tide but at low tide there is very 26 little of it that is usable. It is necessary to do a very

DIVISION OF ADMINISTRATIVE PROCEDURE. STATE OF CALIFORNIA

considerable quantity of dredging in order to provide usable deep water for the commercial fishing fleet.

L

3

4

5

17

18

19

20

21

22

23

24

25

26

MR. CARR: It doesn't say so here, but I believe the paper stated the maximum depth to be dredged out was twelve feet. Would you comment on that?

MR. SARIES: That is correct. It is anticipated 6 that the work can be done, if authorized by this bond issue, 7 coincidentally with a maintenance operation by the Corps of 8 Engineers. The Congress has authorized that expenditure for 9 the present fiscal year and they propose to award a contract 10 for maintenance, dredging and repairs to the entrance jetty. 11 It is felt that there will be considerable advantage to the 12 county to award their contract for dredging coincidentally 13 with that work, so that one organization can probably give us 14 a lower bid than they would if they had to assemble their 15 equipment and organization for a separate job. It is contem-16 plated that this maintenance dredging will provide a deep channel, not only for the existing commercial fishing fleet which operates out of Bodega Bay, but for a very considerable recreational development on the tidelands of the southeast corner of the Bay.

We are now faced with the various problems of sanitation and water supply to Doran Park, a county-owned park, which is well patronized and of considerable benefit to other counties other than Sonoma County. Analysis of the use has indicated that more people, perhaps, come from outside the

DIVISION OF ADMINISTRATIVE PROCEDHRE. STATE OF CALIFORNIA

county to utilize that facility than do from the county itself.

1

14

22

23

24

25

26

24

We propose to provide sanitary facilities for the 2 area; we propose to provide potable water for the area; we 3 propose to provide dredged areas of deep water. that is to 4 twelve feet of depth, for the creation of marinas, boat-5 launching ramps, facilities of that nature; we propose to 6 provide area which can be developed by commercial interests 7 for parking lots, restaurants, things of that type: and the 8 revenues from those will accrue to the County of Sonoma and 9 will be utilized for the retirement of the bond issue if it 10 is approved. 11

12 MR. CARR: Are these general obligation bonds of 13 the county?

MR. SARLES: That's correct.

MR. HORTIG: Mr. Sarles, may I supplement your comment? There is also included within the plan, and there are already negotiations which have been completed, which will result in the location of a Coast Guard station within the area of this development.

20 MR. SARLES: Coast Guard on Bodega Bay, that is 21 correct.

MR. CARR: Mr. Chairman, I move the approval of this. I think as a matter of policy, where a county is taking the initiative and developing these areas, this is a sound policy. I'd move this approval of this item and not wishing to commit the rest of the Commission I would say, as the

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

Director of Finance, I think it is a good policy. I think we are going to get more recreational areas developed in usable areas without obligation to the State if more counties will do this.

GOV. ANDERSON: Second.

MR. CRANSTON: It is moved, seconded and unanimously approved, and I think all of us join in commending you in what you are doing in the county.

MR. SARLES: Thank you, gentlemen.

MR. CRANSTON: Moving on to Item 10 -- Authoriza-tion for Executive Officer to take necessary action to affirm 12 State's sovereign ownership of the accreted lands waterward 13 of the ordinary high water mark established by the Commission's survey of June 1941, hounding uplands owned by Coronado Beach, 15 Inc., on the ocean side of Silver Strand, San Diego County. 16 Any comment on this item?

17 MR. HORTIG: Mr. Chairman, at the ocean side of the 18 Coronado Península, known generally as Silver Strand, and 19 where also is located the Coronado Hotel, the operators of 20 the Coronado Hotel. Coronado Beach, Inc., have now, as recently 21 as yesterday, submitted a recorded man, recorded in San Diego 22 County, which has in turn been submitted to the Assessor of 23 San Diego County as a basis for levying taxes, indicating 24 ownership of the surveyed lands to be in Coronado Beach, Inci 25

The problem arises that the majority, if not the entire area within that survey, by records of the State Lands

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

20

1

2

3

4

5

8

7

8

9

10

Commission is sovereign tide and submerged lands of the State, filled by artificial accretion. So we are faced with, after having reviewed this situation with the Office of the Attorney General, diametrically opposite opinions by the State's attorhey and the State's technical staff and the staff and attorneys for Coronado Beach, Inc., as to who owns these lands.

26

17 In view of the fact that, unless the State's title 8 to these lands is affirmed, Coronado Beach will undertake 9 improvements and capital expenditures on the land, it would 10 appear completely desirable and almost equitably necessary 11 that this question be resolved before any considerable money 12 is expended in operations on these lands. Therefore, it is 13 recommended that the Commission authorize the staff, in con-14 junction with the Office of the Attorney General, to undertake 15 the necessary legal actions requisite -- probably in the form 16 of a quiet title action, to have in the record a judicial 17 determination as to the ownership of the contested lands.

18 MR, SHAVEISON: May I ask, Frank, are these tide-19 lands in this area still owned by the State or have they 20 been grarted to the City of Coronado?

21 MR. HORTIG: They are still owned by the State.
22 MR. CRANSTON: Motion is in order.
23 GOV. ANDERSON: So move.
24 MR. CARR: Second.
25 MR. CRANSTON: Moved seconded uncontrols adouted

MR. CRANSTON: Moved, seconded, unanimously adopted. Item 11 -- Authorization for Executive Officer to determine

13 All the legal steps that can and should have been 14 taken are now of record, have been taken. For any further 15 detail, of course, if the Commission wishes it, as you 16 gentlemen have already noted, City Attorney Desmond is in 17 the audience this morning.

18 MR. CRANSTON: Any comments on this item, on 19 which no action is required? Hearing none, I believe we 20 move on to a supplemental item, which might be called 13-b, 21 which relates to the form of oil and gas lease in Santa 22 Barbara County.

MR. HORTIG: This appears on pages 39 and 40 of the calendar you have before you.

division of administ/fative proceeding, system of california

NR. CRANSTON: Pages 39 and 40 of the calendar ---1 which smounts, first, to review of what has occurred since 2 March 24, 1960, when the Commission was informed that the 3 Shell Oil Company had nominated nine parcels of tide and sub-4 merged lands for oil and gas lease development offshore Santa 5 Barbara County. There then follows a discussion and outline 6 of the few revisions which would occur in the lease form and 7 which amount to the only ways in which this lease would differ 8 from the adoption of the last Commission lease offer in 1958, 9 The final draft of the lease is attached as Exhibit I. 10

11 Section 6834 of the Public Resources Code provides 12 that whenever the Commission determines that lands shall b 13 leased for oil and gas a lease form shall be prepared by the 14 Commission; and then there is the following recommendation:

> "It is recommended that the Commission approve and adopt the form of oil and gas lease, attached hereto as Exhibit I, as the basic bid-lease form for the issuance of oil and gas leases on tide and submerged lands in the area west of Gaviota and extending to Point Conception in Santa Barbara County, pursuant to Division 6, Public Resources Code."

Are there any comments?

24

25

28

MR. HOPTIG: Mr. Chairman, before any other comments or action by the Commission, and particularly for the information of those members of the industry committee who have cooperated with the staff, I should like to clear the record on one item which we have not been able to discuss heretofore, inasmuch as the particular calendar item before

Division of Administrative procedure, state of California

you was not reproduced in its final form until last night. 1 At the time of last discussion with industry com-2 mittees, there were certain proposals under consideration for 3 possible modification of the lease, and which it was agreed 4 by staff would be furnished to all interested parties for 5 advance review prior to recommendation to the State Lands Com-8 mission, We have already heard some rumblings of concern 7 because no one received any advance copies for review. 8 As the calendar item here indicates, the areas which 9 we had under discussion for possible modification have been 10 eliminated in major part because the Office of the Attorney 11 General recommended this as the prudent thing to do, lacking 12 clear cut legislative authorization to include these modifi-13 cations. Therefore, there is no modified language under con-14 sideration here today remaining in existence, which might have 15 been discussed in advance with the committee and, therefore, 16

I would like to emphasize the point which you already made -that there are minimum nominal and primarily modifications of draftsmanship which are the essential variances in the lease form proposed here this morning to the Commission, contrary to the greater number of modifications which were presented to the Commission for consideration at the meeting of September 27th - or 29th.

MR. CRANSTON: Does anyone wish to be heard? GOV. ANDERSON: Could we be told what the changes the modifications?

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

See See

50

A.

MR. HORTIG: Yes sir. They appear on page 40 of your calendar, Governor.

MR. CARR: Is there any objection to reviewing these, this outline here?

MR. HORTIG: No sir, if you wish

MR. CARR: I think so. This is a public hearing. For the benefit of those present it might be well to review it.

MR. HORTIG: The first modification proposed for 8 page 2, lines 28 through 30 of the draft as attached to the 9 calendar item, is identical with what was presented to the 10 Commission on September 29th and is a technical clarification 11 to be certain that the Exhibit A which is referred to in the 12 lease is recognized as being a part of the lease and is in 13 full legal language "by reference made a part" of the lease. 14 This is a clarification of draftsmanship as against the 15 former lease form as used. 16

Page 3, line 13, relates to proposed modification 17 relating to the manner of determination of the price of the 18 oil on which royalties shall be paid. Again, inherited 19 language from earlier leases was utilized in the 1958 draft, 20 which read that this price "shall not be less than the highest 21 price or prices in the nearest field." The "or prices" is 22 not only redundant, it creates an ambiguity -- it makes un-23 specific, if there is such a term, what can otherwise be 24 obviously specific by restricting the language to referring 25 only to the "highest price" and that the relationship shall 26

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

1

2

3

4

5

6

1 be to the "highest price in the nearest field" producing oil
2 of like quality and quantity.

Fage 8, lines 9 through 12, is egain clarification of the dreftsmanship. Having previously, on page 2, made Exhibit A on exhibit by reference

MR. CARR: What line?

MR. HORTIG: Page 8, lines 9 through 12 previously referred to "Exhibit A attached hereto and by reference made a part hereof." That language, having been moved to the fore part of the lease, is now redundant and is stricken as a repetition because in t'> first reference to Exhibit A in the proposed lease form it is definitely and legally included in the lease.

If is should comment that the lease form with the modifications we are discussing here has been reviewed - - its present form is the form suggested for revision by the Office of the Attorney General and the form in which it appears before you gentlemen here this morning has been approved by the Office of the Attorney General as to form.

Page 19, lines 12 and 17 - "6,000 feet" is substituted for the number "8,000 feet" as reported on September 29th and this is no change from that time. To coordinate and give optimum well spacing in relation to offshore structure costs and the costs of drilling deep wells, the staff evaluation indicates that 6,000 feet is a better transition point than 6,000 feet, which would modify the well spacing in that the

lease would now read that wells drilled down to 6,000 feet or less would have to be drilled one for every twenty acres; if they go over 6,000 feet, the minimum wells required to be drilled will be one to forty acres.

Page 25, lines 17 through 19, would be an addition 5 to Exhibit C of the lease form. At the September 29th meeting 6 it was proposed that the provisions with respect to the 7 bidder's specification of bonus offered to be paid would be 8 included within the lease form. The Office of the Attorney 9 General found this to be possibly productive of, or could 10 potentially be productive of, more ambiguitles than it might 11 eliminate; and suggested, instead, that the Exhibit C for 12 specification of the cash bonus bid which has been utilized 13 heretofore be continued, but in order to preclude any confusion 14 as a result of modification of bids and, therefore, a difficult 15 decision for the Commission to evaluate, that there be added 16 a restriction that there be no modifications in the bidding 17 by inserting the language: 18

> "It is understood that no variation shall be made in this prescribed form of offer and that the insertion of any additional condition, qualification or provision hereon will invalidate the bid."

This constitutes the sum total of the proposed modifications from the requirements which, as indicated, had been previously adopted and utilized by the prior State I ands Commission in the last offer of tideland oil and gas leases in 1958.

MR. CRANSTON: Are there any questions, comments 2 or suggestions?

MR. CARR: I move the approval.

3

4

ß

8

7

GOV. ANDERSON: second (unintelligible) MR. CRANSTON: Approval is moved and seconded GOV. ANDERSON: I didn't second it.

MR. CRANSTON: Senator Richards.

SENATOR RICHARDS: Mr. Chairman, gentlemen, my name 8 is Richard Richards, attorney-at-law, appearing in that 9 capacity and appearing to ask a few questions, if I may, 10 11 because I believe a question has been raised by virtue of the last correction mentioned by the staff, to wit, page 25, 12 lines 17 through 19, with reference to Exhibit C, if that 13 is correctly interpreted. My question is: Is the change 14 15 thus made intended in the minds of the Commission, assuming you adopt this change, to preclude as an effective matter 16 17 conditional bidding of the kind which was utilized in 1958 18 in related tidelands properties? May I ask that question be-19 fore proceeding, if that be appropriate?

20 MR. CRANSTON: It is my understanding that this 21 language would have that effect, but I would ask Mr. Hortig 22 to comment.

23 MR. HORTIG: I will answer categorically, Senator, 24 this was the intent, and as to its legal sufficiency the 25 Office of the Attorney General is represented here today and 28 can comment, if you wish, on the theory of this language.

DIVISION OF ADMINISTRATIVE FROCEDURE, STATE OF CALIFORNIA

1 SENATOR RICHARDS: Well, I would like to do exactly 2 that myself, because my appearance here, with the permission 3 of the Commission, will be for the purpose of discussing 4 policy, not just law. Law, of course, can either defeat or 5 expedite the policy that you decide and I think this strikes 6 directly at the root of policy itself.

MR. CRANSTON: I think there is one question we might ask of the Attorney General's representative -- if, in his opinion, insertion of such a provision is necessary under the law.

7

8

9

10

新聞

000

MR. SHAVELSON: Mr. Chairman, I'd like to answer 11 that question perhaps at a little more length than you 12 anticipated. We haven't decided that as a matter of law it 13 14 is necessary to preclude conditional bidding. Our position is this: that we are opposed to a situation under which it 15 is left uncertain as to whether or not conditional bidding is 16 to be allowed. We think that it ought to be either speci-17 18 fically forbidden or, if the State Lands Commission decides 19 that as a matter of policy it wants to allow conditional 20 bidding and if upon further study our office in conjunction 21 with the State Lands Division determines that it is legally 22 and practically possible to set up precise terms governing 23 such conditional bidding, then we suggest that such precise 24 terms be inserted. If it's left uncertain as to exactly 25 whether or not conditional bidding will be allowed and what 26 sort of conditional bids will be allow i, we think that the

door is open for a great deal of confusion and a possibility 7 that if a lot of people put in conditional bids and put in 2 different priorities for different parcels, we would get into 3 an almost hopeless confusion in trying to compare the differ-4 ent bids and determine who is the highest bidder, which could 5 conceivably lead to litigation that would delay the granting 3 of leases as to all bids or perhaps force the Commission to 7 reject all bids. 8

9 So, therefore, our position is that either condi-10 tional bidding should be clearly forbidden -- which is the 11 intent of the present language and what we thought was the 12 policy consideration of the Lands Division -- or, if it is to 13 be allowed, we would like further time to study the problem 14 and see if we can evolve some workable terms for accepting 15 conditional bids.

16 GOV. ANDERSON: Did not your office approve condi-17 tional bidding on the last awards?

2

18 MR. SHAVELSON: Yes, ultimately the conditional 19 bids under the particular circumstances of the offers that 20 were received in 1958 were approved. It happened that there 21 was only one bidder that made conditional bids, so that it 22 was easy to determine.

23 GOV. ANDERSON: But you didn't know that when you 24 gave your approval, did you?

25 MR. SHAVELSON: Yes, when it was ultimately approved 28 we knew what the circumstances were and we felt that under

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

those particular circumstances it could be approved legally.

38

GOV. ANDERSON: You mean the approval last time was based on the fact that you only had one bid in this way and if there had been more you couldn't have approved it legally?

6 MR. SHAVELSON: Well, there would have been a 7 great deal more difficulty in evaluating the legal situation 8 at that time if there had been more than one set of conditional 9 bids.

10 GOV, ANDERSON: That sounds rather odd. I didn't 11 know your opinion was based on that fact. Your opinion, I 12 thought, covered even though there was more than one set of 13 bids.

MR. SHAVEISON: It didn't deal expressly with the 14 situation either way, but it was only intended to deal with 15 the specific situation it dealt with. It didn't mention 18 that particular circumstance, but we do feel that there is 17 at least potentiality of challenge if it is left ambiguous; 18 and even though we may feel it is legal and even though a 19 court should ultimately determine that it is lega, we think 20 that there is a potentiality of difficulty, legal difficulty 21 if the situation is left uncertain. 22

GOV. ANDERSON: If it were the Commission's policy
to allow and permit conditional bidding, do you think it could
be written so there wouldn't be any legal question?
IR. SHAVELSON: We haven't gone into that in detail.

Division of administrative pecceptre. State of California

1

2

뾿

Ą.

because we hadn't been asked to, but we will be able to let you know if it is so determined.

MR. CRANSTON: Mr. Richards.

1

2

3

SENATOR RICHARDS: Thank you, I would only comment Ş. on Mr. Shavelson's problem that, of course, there is a problem -5 as his own office has recognized - since 1958. It is a prob-6 7 lem, as he himself says, which should be settled in policy, which makes it a policy in the Commission rather than between 8 attorneys. I would, Lieutenant Governor, agree certainly that 9 10 the legal question would not rest with whether there was one 11 or more, but the practical question could rest on that; but the law to the degree it has been expressed by the Attorney 12 13 General is contained in a July 23, 1958 letter from the Office 14 of the Attorney General on the question that arose ex post 15 facto following the opening of bids on this same general 16 group of property. At that time there was what we have loosely termed "conditional bidding." At that time the quest 17 18 tion was raised and at that time the Attorney General said 19 it was legal and proper, and as a result the State through 20 the Commission should act on it, and you did.

Now, this is again before us as we face opening of
new tidelands and I think it should be understood -- because
the term "conditional bidding" has a kind of strange ring
to it itself, the practical matter that faces us is the same
it seems to me, as far as the State of California is concerned,
as when a group of us goes to an auction. As I say, I am not

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

talking law, but policy. If you have four or five people who 1 go in to bid on a series of four or five clocks, a very wealthy 2 man might be able to bid on all five clocks and outbid every-3 body else and take those clocks home. Most of us would want 4 5 one of the clocks, fully aware we could not pay for all five. In order to get one, and if we lost the bid on number one, we 8 7 would still have money in our pockets to bid on number two; and thus if the man with a lot of money pulled number one, 8 9 we would have a chance against those who have a little less 10 money and take home number two. And that is what happened 11 in the 1958 tidelands. This points out that in the oil 12 industry, as in the case of individuals, there are smaller 13 and larger groups; but saide from fairness -- fairness is 14 obviously on the side of the example I have given -- beyond 15 fairness, and perhaps of greater importance to all of us, is 16 the interest of the people of the State of California, the 17 interest of the people represented by all of us -- you, the 18 Attorney General, and myself -- in regard to getting as much 19 money as we can from the tidelands bids.

How did conditional bidding work in 1958? The result is clear. If the opinion of the Attorney General had been against recognizing the Phillips-Pauley joint bid (which it wasn't -- it was in favor of it) which was a conditional bid; if the opinion had been the other way and been against it, the State would then and there have lost six million four hundred thousand dollars that we received -- the reason

Division of Administrative procedure, state of California

40

いたとうないのであるとないです。

ALC: NO

being that this joint bid, called a conditional bid, was a very simple situation; this group went in and laid all the money they had on the line for one paidel, parcel "D"; if they got it, fine - if they didn't get it, they were in line for parcels "A" and "E". And they did not get the first parcel and therefore they had stated (and the only condition in their bid was) "If we don't get that first parcel and our money is still around, we want our money on the other parcels." And their money resulted in the high bid for the State of California.

11 It seems to me, as Mr. Shavelson points out, you might possibly have practical items of confusion. I think 12 it would be utterly foolish for any of us to adopt a policy 13 on the basis of confusion which would preclude the State of 14 California from getting as much money as it could possibly 15 get and, incidentally, open up in all fairness not only to 16 the deepest pocket but to everyone, allowing for cash on the 17 line and allowing, incidentally, for more than one parcel to 18 be put up at one time. 19

It is because of the adoption by the State -- and I make no comment as to whether this is right or wrong -- for some reason the State has concluded through Commission action and through your predecessors that instead of putting up one parcel of land at a time you want to put up more than one. It is only for that reason that we have the problem. If only one parcel were involved, there would be no problem -- you

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

1

2

3

4

5

6

7

8

9

10

「「「「「「」」」というという

1

and I bid against each other, one of us winc. The other man Ĩ around, who walks in day after tomorrow for another parcel, 2 knows how much money he has to bid because he knows what went 3 on the first bid. This is the practical manner, if the A. G. 4 wants to avoid problems. We are now faced with the problem 5 because of the policy of the State that there is more than 8 one parcel put up simultaneously. Therefore everyone here in 7 the oil industry has to consider this as a simultaneous situ-8 ation and they can say "Let's go bid on all of them" if they 9 have unlimited money; but if you don't have unlimited money, 10 you have to be pretty analytical on which ones you bid, Even 11 that is all right if you allow the possibility of not bringing 12 in only those with a great deal of money, if you allow the 13 possibility of bringing them in by allowing them to say "If 14 I don't get "A" I might still get "B". In any case, the 15 highest bidder gets the parcel and that is in the interest of 16 the State that the highest qualified bidder gets the bid --17 not some technicality that precludes him, but some policy 18 that allows him to bid. 19

I would refer again to the Attorney General's own opinion --- which I have every reason to assume has not been vitiated, has not been changed, has not been overruled by any court -- and that opinion in the form of an advice letter points out exactly the various contentions that I have been making, first, that the basic test for determining a deviation is substantial is whether it destroys or impairs the

DIVISION OF ADMINISTRATIVE PROCEDGRE, STATE OF CALIFORNIA

competitive character of the bidding procedure; and this cites various litigation. We don't want to impair the competitive character of the bidding, to limit the number of bidders. Any technicality would obviously do that. 43

To allow for what we call "conditional bidding" is the reverse -- is to make possible competition in bidding, which is what we want.

Further, the Attorney General's office points out 8 that the bid proposal prohibited deviation (that's the 9 original one in 1958) from its own specific requirements and 10 there was no deviation from this. The cash bonus offer did 11 not itself prohibit such deviation. Now that was in Exhibit 12 Exhibit C is still before you, but with one very sig-13 С. nificant change -- the additional insertion of that one 14 short paragraph, the effect of which, as the staffhas just 15 pointed out and the Attorney General has also asserted, is 16 to reverse the policy validated by the A. G. in the 1958 17 bidding procedure which resulted in more than six million 18 dollars which we otherwise would not have received. 19

What you would be doing here is important because, if I may read again from this letter of the Attorney General in 1958, "Assuming that the inserted contingency clause departed from the Commission's procedure, there was a deviation only from an administrative requirement, not from a statutory procedure." And we all know, as attorneys, that the statutory procedure has not been changed. Therefore, if this letter

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

1-30 MAN 3PO

1

2

3

4

5

\$

was valid then, and I assume it was, it is valid now.

hh

Again, we are determining basically not the determination of any attorney of any statute -- we are talking about administrative procedure, which is your baby, which puts it smack on the table here as to what is the intelligent process in determining the procedure on these tidelands that are going to be opened in Santa Barbara. After this is opened, then is the time for you to decide to make a change and stop putting up a lot of parcels all at once. You can put up one at a time and you have plenty of time to think of that; but in terms of policy on the opening of this land, as to the limitation of the chances to the State of more money, I think it would be a great mistake and I urge you as strongly as I can not to make the changes on page 25, lines 17 through 19 and, if you will, face squarely the problem of recognizing the utilization of conditional bids to allow bidders to come in, so if they miss on number one they can come in on two.

MR. CRANSTON: Are there any questions?

19 MR. CARR: I do not know whether this is a proper 20 question to Mr. Richards, but I presume so. It has occurred 21 to me several times the simplest way to do this and the one 22 that would result in the most money in the State would be 23 to put up these parcels one at a time and I am in favor of 24 that. I am not in favor of conditional bidding, but I am in 25 favor of putting up the parcels one at a time and I think the 28 State would get more money.

GOV. ANDERSON: I'll make my statement: I also believe they should be put up one at a time. If they are going to be put up in multiple fashion, I think we have to consider conditional bidding. If there is some way we can consider putting these up one at a time

1

2

3

4

5

6

7

8

MR. CARR: Isn't it within the purview of the Commission to determine we can put these up one at a time instead of all at one time?

MR. HORTIG: Definitely, Mr. Chairman. Both in 9 response to Mr. Carr's question and for the further informa-20 tion of the Commission for your further consideration here -11 and I believe with the concurrence of Senator Richards -- it 12 is patently impossible to offer you gentlemen a complete 13 all-inclusive one-paragraph summary of everything that was 14 in the Attorney General's opinion in 1958. Having stated 15 the impossibility, I will now proceed to attempt it neverthe-16 less. I believe the point of substance for the Commission 17 to recognize here and, as I say, I trust with the ecncurrence 18 19 of Senator Richards, is that the Attorney General's opinion did state that the bids as received were not free from doubt 20 21 as to their legality -- they could be defended in court. 22 There was, of course, no basis under which the Attorney 23 General could write an insurance policy as to what a judicial 24 devermination might be, but that in view of all the other cir 25 cumstances involved (which have already been referred to in 28 general by Deputy Shavelson) it appeared that the solution to

the problem or to the dilemma was that the acceptability or rejection of the bids be considered as a policy matter by the State Lands Commission -- coming right back again to the question of the policy being under the complete cognizance and control of the Commission -- and the Commission make the election of the course to follow; and the Commission made the election of deciding to follow the course of accepting the high tids and awarding the leases thereon.

I think this underscores what Senator Richards has 9 already indicated -- that the primary question here this 10 11 morning is a matter of policy. Both Mr. Carr and Governor Anderson have touched on the policy. There is no statutory 12 requirement and it would be within the purview of the Com-13 14 mission to determine to offer any lands from here on out one parcel at a time, thereby eliminating any problems for 15 16 prospective bidders in the sense that they even had to think 17 about conditioning the bid and happily eliminating any potent-18 tial problems for the staff in trying to evaluate any series 19 of bids and give the report on which bid was in fact high.

20 I believe Deputy Shavelson has a supplementary 21 statement.

MR. SHAVELSON: Yes. I'd like to clarify what I have said up to now and remark on the general nature of a letter advice from our office. All it is, is an opinion as to what we think the better legal view is. This was a letter written after the fact that the conditional bids had been

DIVISION OF ADMIN (TRATIVE PROCEDURE, STATE OF CALIFORNIA

1

2

3

4

5

8

7

received. At that time we told the Commission that the đ. question was not free from legal doubt, but we felt the better 2 '把 view would be to say that the bids were legal and we still feel that they are legal bids, but the question wasn't free 4 from doubt. Now we are faced with the question before the 5 bids are solicited. All we are saying here is that we don't 6 think we should deliberately go forward and create a situa-7 tion where there is any legal doubt and, furthermore, in 1958 8 had we received conditional bids from six or eight bidders, 9 each one giving a different priority to his various condi-10 11 tions, I think the problem would have been a lot more difficult than it actually was to resolve; but I want to also say, of 12 13 course, that we have no right and we are not trying to intimate 14 the better policy. All we are saying is that if conditional 15 bids are to be allowed, they should be allowed under precisely 16 defined criteria and not left in an ambiguous state, which 17 we think might be the situation if this additional language 18 had not been added.

19 MR. CARR: Mr. Chairman, inasmuch/there is no motion 50 before the Commission -- I would withdraw my motion because 21 it had no second -- I move that we withdraw these parcels and 22 offer them one at a time with as much dispatch as possible; 23 and in commenting on this, I think it reduces the confusion, 24 eliminates the doubt of the legality, will result in more 25 money for the State of California, and I can't help commenting 28 on the emotional situation. This conditional bidding reminds

1

DIVISION OF AGMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

me too much of the sorority bidding in the University of California -- where a girl puts in first, second and third choices. If she doesn't get the first choice, she might find herself wearing a pin all through her life, a pin she didn't want, but she didn't want to go through life without belonging to a sorority. I think we could spare these oil companies this horrible ordeal.

8 MR. CRANSTON: I'd like to ask Mr. Hortig -- by 9 putting up these parcels one by one, would it necessarily 10 lead to more income to the State of California?

11 MR. HORTIG: Mr. Chairman, this objective reply 12 will require, of course, an advance prognostication as to 13 just how badly prospective bidders are going to scramble at 14 one particular time. I would think, certainly, what with 15 one parcel at a time to be evaluated, it could be given the 16 ben fit of the full objective evaluation and consideration, 17 of using all the technical resources of any one bidder in 18 connection with that evaluation; so that, over all, probably 19 the bids would -- in the final analysis, one parcel at a 20 time would have individually received more scrutiny than in 21 an instance where numerous parcels are offered and therefore 22 aven as bidders might, for financial reasons, have to condi-23 tion their bids as outlined by Senator Richards, or feel they 24 must rather than selecting a parcel on which to concentrate, 25 they similarly patently not having limitless manpower resources 26 also have limits on their evaluation forces. This is one

DIVICION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

1

2

3

4

5

8

7

factor in addition to the one Mr. Carr suggests the oil companies would be spared -- this could be added to that category.

MR. CRANSTON: Does anyone representing anyone other than or the same people have any other viewpoints to present in regard to this general matter?

20

21

22

23

24

25

26

MR. HUTCHINS: My name is J. Barton Hutchins. I am with Edwin W. Pauley. I just would like the record to show that Mr. Richards appeared here today for and in behalf of him and Mr. Richards talked to Mr. Pauley as late as fifteen minutes ago about everything he was prepared to say. The Pauley people are back of everything Mr. Richards says.

MR. CRANSTON: Mr. Hortig, I would like to ask this. I know that all of us are eager to move forward in actually opening these oil fields and in opening the bids. This is a new matter that has come before us that the members of the Commission have not had time to fully consider: first, the matter of opening up one by one the fields; and, secondly, the matter of conditional bidding. The Attorney General's office hasn't had time to consider the matter fully and we haven't had any opportunity to see how they would set forth a conditional bid clause if they did put in one.

Since there are millions of dollars involved, I don't think too great speed should be made. I wonder if it would be possible to approve this, except for this two-fold related question -- putting these up one at a time and the matter of conditional bidding, without slowing up our final

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF CALIFORNIA

schedule?

1

2

3

Å,

5

MR. HORTIG: No sir. Any deferment today of any portion or any segment of what is proposed here today would of necessity slow up the final schedule.

50

MR. CRANSTON: I did not derive from your answer to me any clear-cut feeling as to whether we would get more money 6 on step-by-step. I think unless you have clear-cut feelings, 7 I would prefer to put this over. I think a deferment of 8 thirty days would be better. 9

MR. HORTIG: In my reply with regard to clear-cut 10 11 feelings, I had no intent to be coy and I think intuitively . and I think this was certainly within the framework of the 12 13 example cited by Senator Richards --- if you had the same 14 number of bidders and possibly only one clock, there is pos-15 sibly more enthusiasm with respect to the bidders convincing 16 themselves they want that one clock than if their attention is distracted over five clocks. I certainly can't prove to 17 18 the Commission that this method would produce more money, but 19 I share the intuitive feeling that this might result in more 20 money

21 GOV. ANDERSON: If we would adopt Mr. Carr's sugges-22 tion on one bid and try it, if it looked all right on that one 23 continue in that fashion ...

24 MR. CRANSTON: Well, it would be an interesting 25 experiment. I think it is rather hard to predict what the 26 outcome would be and I, for one, would like to give it a little

DIVISION OF ADMINISTRATIVE PROCEDURE, STATE OF GALIFORNIA

1 more thought, consider the matter further, before we make a decision.

51

MR. CARA: I would urge we put up one parcel for 3 bid as soon as possible. I think it has quite a bit to do 4 with our fiscal situation, our budgeting policy, and what Б might happen along that line and as it affects our proposed 6 7 capital outlay in various directions. I would like to see -8 if we are going to lease these oil fields, I would like to 9 see us begin leasing. I don't like to see us put it off 10 thirty days. Thirty days is getting very close to the 11 Legislature.

GOV. ANDERSON: I am inclined the same way.

15 MR. CRANSTON: It is my feeling that in a matter 14 as important as this, where the bids may be high or low 15 depending on various aspects of the situation; where informa-18 tion comes to light, perhaps, from one company to another on 17 the bld on the first parcel, which may have a great bearing 18 on bidding on other parcels in the same area, I would like 19 more time to consider all the ramifications and do not favor 20 action on the matter today. I think thirty days would be 21 worth considerably more money to the State. I would like to 22 cast my vote when I am more acquainted with this matter, singe 23 I had no time to go into this.

MR. CARR: May I ask the Chairman what he proposes to do in the next thirty days to arrive at a decision? MR. CRANSTON: I would personally talk to a good

24

25

26

「愛いな」」

家である

(Aller

many people, avail myself of all information I could obtain. .

52

MR. CARR: Would the Chairman be prepared to come in with a decision in thirty days?

MR. CRANSTON: I certainly would.

MR. HORTIG: May I suggest, for the information of the Commission, this would mean of necessity, as far as determination of Lands Commission meetings, a possible decision at the December meeting of the Commission because you gentlemen havesadvanced the November date to November 15th, which both for calendar closing and number of calendar days to elapse is only a small portion of thirty days.

MR. CRANSTON: November 15th would suit me.

MR. CARM: Would we be prepared at that time to have a recommendation from the staff? If we decide to put on one parcel at a time, would we be in a position to decide which parcel?

17 MR. CRANSTON: I think that would be a relevant 18 factor.

MR. CARR: In what schedule, Mr. Hortig, yould we be prepared to put out succeeding parcels? What would our procedure be here -- what would be the timetable?

MR. HORTIG: Well, I am inventing the procedure as I sit here, Mr. Carr, as you appreciate. It would occur to me that if this is the policy route that the Commission desires to develop to the fullest -- in the best interest of the State to eliminate all the complications that have heretofore been

attributed to conditional bidding and to enable an operator to evaluate its position with respect to future bids, as the problem was outlined by Senator Richards -- it would appear that there a sequential series of lease offers were made, that they would have to be spaced so that a bidder, before being raced with his next bid, would know reasonably well whether or not he had a final stake in the prior bid, that he definitely was not or likely was not the successful bidder in the first lease before he would know he had his money available for the second bid.

11 MR. CARR: That would certainly contemplate putting 12 out the second bid following the acceptance of the first bid, 13 otherwise there would be no point...

14 MR. CRANSTON: It would seem to me this would be 15 something the oil companies would like to express themselves 18 on to the Lands Commission -- would they like an hour, day 17 I'd like to point out this might lead to leasing of or week. 18 these fields in a much slower schedule than we anticipated. 19 If the oil companies want a slower schedule, that may mean 20 that we may in January not proceed to lease the whole field 21 as we would today; so I feel speed is not necessary today. 22 I would therefore suggest November 15th. It would give me 23 that much time to consider the matter.

MR. HORTIG: Considering all the procedural requirements and the necessity for bringing evaluated bids to the Commission with the recommendations for offering a lease,

which is the first time that a series of bidders actually know whether or not they have been successful, it would necessitate a period ranging from a period of sixty days to possibly ninety days between parcel offers if they are to be offered by parcels, in a series.

6 MR. CRANSTON: So actually the result of this policy, 7 if adopted, is that we would open these fields on a far slower 8 schedule than if we proceeded to offer them all at once.

9 MR. HORTIG: This is not the sum total regult, Mr. 10 Chairman, for the sequential series, if they were all under 11 the same procedure, could run on a schedule -- this could be 12 of advantage to bidders -- if they were going to be sixty or 13 ninety days apart. There would be an offer every sixty or 14 ninety days, so that two or five years down the row there 15 could have been actually more parcels leased than on the more 16 spasmodic and larger leasing utilized heretofore,

MR. CRANSTON: The simultaneous opening of other
scheduled areas as compared to several at a time would be
the same. It seems to me there are many matters we can't
analyze or spell out completely at the moment.

21 GOV.ANDERSON: Mr. Carr, my feeling is that I am 22 perfectly ready to make a second to your motion, although in 23 deference to Mr. Cranston's request for another twenty days 24 to our next meeting I kind of feel this is what we should do. 25 I am ready and we could pass the motion that we do them one 26 at a time. I think that's the simplest and will make the most

money eventually, but I lean a little in going along with Alan to the next meeting.

MR. CARR: I am perfectly willing to do that. 1 3 am willing to do either one. Out of courtesy and deference 4 to our Chairman I wouldn't want to ram this down his neck, Ď but I want to call attention to this fact: I think an 3 orderly marketing of these oil reserves is a good thing for 7 8 the State of California and not being in the oil business I 9 am perhaps being impudent in suggesting this -- but having 10 had some experience in marketing bonds, if people are going 11 to buy this way, they are on notice; they have time for a 12 more thorough preparation and thorough evaluation and can make up their minds how much they are willing to shoot. I 13/ 24 think the other smacks a little of the pool table and the 15 horse track, but inasmuch as you have not seconded my motion 18 it wouldn't embarrass me to let it die for lack of a second 17 and I am perfectly willing to withdraw -- whichever seems to 18 be most diplomatic under the circumstances -- and I hope on 19 the 15th we can get off the dime.

GOV. ANDERSON: I will be willing to second the motion on the 15th.

22 MR. CMANSTO: Thank you very much for your 23 pleasant diplomatic relations. May I request that the 24 Attorney General's office give us, as far in advance as pos-25 sible, what would be their recommendation on conditional 26 bidding if conditional bidding were to be something that the

Lands Commission decided was something that would be advisable; and, secondly,I would advise that the staff and individual members explore, and industry give us their thoughts, if they will, on step-by-step opening of parcels versus opening several simultaneously, and recommendations as to the time that would be necessary between parcels if we go step-by-step. I would assume those would be the major issues.

9 MR. CARR: Mr. Chairman, I might say diplomatically 10 that I have made up my mind on conditional bidding. I am 11 not going to change it.

12 GOV. ANDERSON: I am agreeable that we put them up 13 one at a time. If we have to put them up in a multiple man-14 ner, I would suggest conditional bidding because it brings 15 more money to the State. At least you know our thinking, 16 Frank.

MR. CRANSTON: I will be happy to leave everything
in doubt by expressing no opinions. I believe we have
covered all items on the agenda.

20 MR. HORTIG: One exception, Mr. Chairman, and that 21 is possible consideration at this time of the date of the 22 December meeting.

MR. CARR: May I ask, as far as the approval of the contract is concerned, with the reservation of this last paragraph referring to conditional bidding, can we consider that it would be in order to approve the contract and the

bid form?

MR. CRANSTON: Yes, with the exception of the conditional bidding.

MR. CARR: With the exception of that last paragraph referring to conditional bidding, which will come up on the 15th.

GOV. ANDERSON: There were no objections on the other portions.

MR. CRANSTON: Do you so move?

MR. CARR: Yes.

11

GOV. ANDERSON: Second.

MR. CRANSTON: So there is approval of the entire contract, with the exception of the paragraph on conditional bidding; and implicit in this, there is no decision as to whether we go step-by-step or at once.

The date, time and place of the November meeting is Tuesday, November 15th, ten a.m. in Sacramento. I would prefer to leave the December meeting until then -- I don't have my calendar with me. If there is nothing further to come before us, the meeting is adjourned.
