CHAIRPERSON CORY: We'll call the meeting to order. Any corrections or additions to the minutes of the January 26th meeting? Without objection, the minutes

will be approved as presented.

Mr. Northrop.

9 EXECUTIVE OFFICER NORTHROP: Thank you very kindly, 10 Mr. Chairman.

The first item is the Cablecom-General of
Modesto, in which Cablecom of Modesto proposed to install
on existing upland Pacific Telephone Poles an overhead
television transmission cable across the Toulumne River
at Modesto, Stanislaus County.

The crossing is a necessary part of Cablecom's 16 5.51 project to extend television cable service to South Modesto. 17 The reason for this appearing in this report is, the Board 18 of Supervisors of the County of Stanislaus has passed a 19 resolution urging all governmental agencies with jurisdiction 20 to expedite their investigations in this project. Also, 21 we received a request from Assemblyman John Thurman asking 22 us to get with it on this project. 23

24 A negative declaration has been prepared by the
25 Board of Supervisors of Stanislaus County for the project.

A Notice of Determination is on file in the offile of the Secretary of Resources. No negative comments have been received by the staff from agencies with jurisdiction. With the Commission's consent, I will issue a temporary right-of-way letter authorizing Cablecom's project. 5 The temporary right-of-entry will commence March 16, 1981, and 6 terminate May 15 of 1982. Staff is currently processing 7 8 the Cablecom lease and will bring it to the Commission as soon as possible in a formal manner. 9 CHAIRPERSON CORY: Ard we getting a clear foot 100

this is a private entity.

 20 EXECUTIVE OFFICER NORTHROP: Mr. Grimes, if you
 21 would emlighten me.

22 MR. GRIMES: We would hope not. It will be strung

3

CHAIRPERSON CORY: Any questions from the Commissioners on this item?

MS. MORGAN: I wouldn't dare.

7 EXECUTIVE OFFICER NORTHROP: Thank you and I'll
8 proceed, Mr. Chairman.

The second one concerns Southern California Edison Company. On February Mast, the Edison Company filed 10 an application for an easement to construct, operate, and a 11 maintain an electrical transmission line over a parcel of 12 State School land near Desert Center in Riverside County. 13 In addition, Southern Caldfornia Edison requested a 14 temportry right-of-way entry to enter the property for the 15 purpose of testing the soils in the vicinity of the proposed 16 17 towers.

18 The right-of-way entry shall be valid for a period 19 of 90 days, will be valid for a period of 90 days, with the 20 Commission consent, commetring on the date of the proposed 21 agreement, the proposed agreement is executed and returned 22 to the Commission. The staff is currently processing a lease 33 for Southern California Edison which will be presented to 44 the Commission at an upcoming meeting.

25

633

With the Commission's consent, I will issue a

temporary right-of-word entry letter authorizing Southern 1 California Edison's project. 2

4

CHAIRPERSON CORY: Any problems with the 4 Commissioners?

EXECUTIVE OFFICER NORTHROP: Mr. Chairman, I have 5 6 one more item.

Debbie Townsend, who has been our girl in the 7 back and secretary in the Executiv Office has been 🕤 🥔 18 recently promoted to a Land Agent and is moving out, and 9 Jane Smith will be taking her place. 10

The two girls in the back, would you stand? so our office now is Jane Smith and Diane Jones, if you 12 could believe that.

Thank you very kindly.

EXECUTIVE OFFICER NORTHROP: Mr. Chairman, we 17 have no Coastal Commission report at this time. 18

Would the 5 expenditure go for public use facilities, or is it for 6 7 private? CHAIRPERSON CORY: C5, what is it they're going 8 to do with the \$250,000? 9 EXECUTIVE OFFICER NORTHROP: This is \$250,000 of 10 the money that Santa Barbara has for a project in Santa 11 Barbara Harbor, to be used out of their funds. 12 But it is for public? Ί mean, I was b iefed on the calendar some 23 minutes ago. 5 And that item was on there. Can somebody explain to me what's happened in 23 minutes? Who did you meet in the men's room? 8 9 EXECUTIVE OFFICER NORTHROP: Mr .- Chairman, since that time I talked to the head of the department, and 10 Mr. Grimes didn't tell me he had a problem with it either, 11 so I don't know what the problem is. 12 13 MR. HIGHT: We forgot about it. 14 CHAIRPERSON CORY: You forgot to tell us, all That's a good explanation. Incompetence I can 15 right. 16 understand. All right. We have, then, Items Cl through 24, 17 18 excluding 13. Without objection, the Consent Calendar will be 19 20 approved as presented. 21 Item 25. The one on the right is an aerial photo showing the actual cut-off area of north or west 2 Newport Beach, depending on how you perceive Newport Beach. 3 The one on the left is an exhibit of the tidelands area that 4 is currently in the hands of the City of Newport Beach 5 and has been drilled in the past. It shows the location of 6 the wells and the path of the wells into the tidelands. 7 The City of Newport Beach is tideland trustee. 8 They were granted the state tidelands, including the 9 minerals. 10

7

In the past, they entered into a contract for the 11 development of the oil and gas resources. That contract 12 ended up January 25th, 1981. The terms of the contract 13 in general provide that the sub-surface facilities would 14 be turned over to the city. The wells, pumps, tanks, and 15 3 surface facilities would be sold to the city at fair market 16 value, and that all necessary right of access, pass through, 17 et cetera, for the production of the state tideland resources 18 would also be turned over to the city at the conclusion of 19 20 the lease.

The present situation is that there is a disagreement between the City of Newport Beach and the last contractor regarding the exact meaning of those terms and whether or not the city is entitled to operate under these three conditions. As a result, the wells are not now

ĬG	We've reviewed the calendar item as presented to
17	us. We ask that you not accept the recommendation for the
18	following reasons,
19	First of all, there is a contract between the

22	approved the assignment to Armstrong Petroleum in 1968. That

of Armstrong Petroleum at the expiration of the contract. 1 And that's, of course, where we are now, because the 2 contract terminated, did in fact expire on January 25, 1981. 3 The city has taken the position that Armstrong 4 is required to turn over various and sundry rights and 5 6 oquipment. Our position, our reading of the contract is to 7 the contrary, that because of the language in the contract, 8 which we inherited and which this Commission has approved 9 in the past and the city entered into in the past, we're not 10 obliged to do so. We've pointed that out through discussions 11 with the city many, many times. 12 We also asked for arbitration of that issue in, 13 I think, September of 1980. If not September, certainly the 14 first part of October. We were refused arbitration by the 15 City of Newport Beach. We then sought 16 CHAIRPERSON CORY: Did the contract call for 17 18 arbitration? It permits arbitration. The City MR. BUCHANAN: 19 took the position --20 CHAIRPERSON CORY: Does it call for it? 21 MR. BUCHANAN: Yes, it does call for it. It 22 does, but the City took the position, Mr. Cory, that this 23 was not an arbitrable issue within the meaning of the 24 25 contract.

> PETERS SHORTHAND REPORTING CORPORATION 7700 COLLEGE TOWN DRIVE, SUITE 209 SACRAMENTO, CALIFORNIA 95826 TELEPHONE (818) 383-6801

So then, we went to court. We filed an action,
 a declaratory release action, again asking the Court to
 determine these particular issues. These were our conten tions; these were the city's conentions, your Honor please
 resolve that. The city has not yet answered that particular
 plea.

Subsequently, we met with the city on at least two occasions in Mr. Armstrong's case, and I was present at 8 one, wherein we suggested that, pending the resolution of the contract dispute, that Armstrong Petholeum continue to 10 operate these wells for the benefit of the city under the 11 contract, not waiving on either part any rights or contest, 314 and, in fact, suggested that during the interim period, 13 after January 25, 1981, that Armstrong Petroleum would 14 permit the city to have, I think, 30 percent of the royalty 15 as distinguished from 12 and a half which had existed for 16 17 40 years under the contract.

18 The city said no. And the sense of the city's 19 no was, unless you back down from all of your contentions 20 on the contract, we're not going to go along with you on 21 any interim basis. Obviously, we denied, because that would 22 have obviated the whole fight, and there wouldn't have been 23 any interim thing to concern ourselves about.

So, reluctantly, the wells were shut down, indeed, as Mr. Trout represents, they are indeed shut down.

24

25

CHAIRPERSON CORY: "What was the production on those wells?

CHAIRPERSON CORY: You are in contract dispute --7 MR. BUCHANAN: We're In contract dispute, but --8 CHAIRPERSON CORY: -- but why shouldn't we, as guardians of the public trust, take steps to get that 5,000 barrels a month in service as quickly and efficiently as possible?

12 MR. BUCHANAN: Well, we feel this, Mr. Cory, that there is a contract that we and the city entered into. 13 We tried to resolve that through discussion. 14 CHAIRPERSON CORY: Contract questions are just

16 who owes who what. 17

MR. BUCHANAN: No it's a question of conveyances. 18 CHAIRPERSON CORY: Well say you're right and you don't convey. That's fine, win all your points. 19 20 It seems to me the public trust is best served by producing the 5,000 barrels; and we should proceed to assume that you may be right, and we should take steps

to make sure that production continues.

MR. BUCHANAN: Well, the city -- I think the city is asking you here for what I would term an extra-legal act.

> PETERS SHORTHAND REPORTING CORPORATION 7700 COLLEGE TOWN ORIVE, SUITE 208 ACRAMENTO, CALIFORNIA 95828 TELEPHONE (916) 383-3601

The city has commenced, through resolution, annexation and eminent domain.

CHAIRPERSON CORY: I want to know the specific question as to why we should not proceed to maximize the probability of 5,000 barrels a day being produced, assuming you win.

MR. BUCHANAN: Well, the city and your
8 Commission certainly are enabled to do that. The city has
9 the absolute title to the tidelands.

10 CHAIRPERSON CORY: And you're asking us not to 11 proceed.

MR. BUCHANAN: No, sir.

CHAIRFERSON CORY: Explain the distinction. 13 MR. BUCHANAN: All right. We're asking you not 14 15 to proceed with respect to rights that my client has in these two parcels, A and B. You know, you can proceed and 顶 17 so can the city, in any fashion they care to with respect 18 to development of those tidelands. Those belong to the city 19 and the state. We claim no title thereto.

All we're saying is that we're not obliged to turn
over our rights in uplands areas which intercede and
affect other property rights of ours. We have other oil
wells in those areas. We have oil rights in those areas, and
any action of the city or the state, if you will, that would
deprive us of that is, we feel, not only contrary to contract,

<sup>2</sup> 13

but is denial of due process.

2	So, we think that this is a situation that we've
3	offered to handle with the city on an interim basis so that
4	there would not be any loss of income to the city. They
5	have denied that, and now they come to you and say, well,
6	take it out of our hands, and you've got more strength
7	than we do, and, in effect, take it out of the court's
8	hands. And we don't think that that's a proper thing for
9	the Commission to do.
10	MR. ACKERMAN: Along this question of the

14	MR. ARMSIRONG: Gentlemen, I met with the city

16	can be started up tomorrow. We can start those wells.
17	The cash flow can start to the City of Newport Beach.

CHAIRPERSON CORY: You say that there is some risk by leaving those wells --

Absolutely, Cabsolutely. MR. ARMSTRONG: The act of shutting them down allowed -- those wells produce 97 percent water with every barrel of oil And that water contains a lot of sand, that's produced and the sand drops out and freezes the pumps, et cetera. And what I wanted to do was simply continue the operation for the city's benefit, and the reason I'm 17 offering -

CHAIRPERSON CORY: As I understand it, it was for 30 percent city's benefit and 70 percent your benefit. MR. ARMSTRONG: No, 35 percent was to the city. CHAIRPERSON CORY: All right, 35 Senefit for the city and 65 percent for yourself.

MR. ARMSTRONG: No, that's not correct. There's a royalty that has to be paid to the land owner, because 25

0 16	MR. ARMSTRONG: At 50 percent royalty, if they
17	were kept on running, we would be making very little money
18	on our investment, very, very little on 50 percent royalty.
19	But the idea was, let's not shut down the wells. That's
20	silly. Nobody's making any money off of it that way.
21	$\mathfrak{M}_{\mathcal{O}}$ MR. ACKERMAN: When did you shut the wells down?
22	MR, ARMSTRONG: I didn't shut them down. The

MS. MORGAN: But primarily revenues since the contract was initiated. And it seems to me that it's time to go out and test the market again and see what the public can get from the public lands.

MR. ARMSTRONG: If the contract is found by the judge to be in that direction, I couldn't agree with you more.

All I'm saying is, give us a chance to let the judge decide who's right. And in the meantime, give us a chance -- Io don't care whether a third person determines what that royalty should be -- but I think those wells should be produced. I think it's silly to have them shut in. And I think that if the judge decides that we're wrong, we're wron. That's the end of the game. MR. ACKERMAN: You've asked for both contract
 extensions or modifications or whatever during this period?
 MR. ARMSTRONG: Yes, sir and we just didn't make
 any headway. So that --

14 CHAIRPERSON CORY: Anybody else in the audience15 that wishes to comment on this item?

16 Would you come forward and identify yourself17 for the record, please, sir.

18 MR. McCORMACK: Mr. Chairman, I'm Mike
19 McCormack, and attorney with the firm of Rutan and Tucker.
20 We're representing the City of Newport Beach in connection
21 with the Armstrong matter.

And I think basically the problem that we have is
that we feel we have had a long-term contract which expired.
When Mr. Armstrong acquired that contract in 1968, he knew
the expiration date. It expired.

PETERS SHORTHAND REPORTING CORPORATION 7700 COLLEGE TOWN DRIVE, SUITE 209 SACRAMENTO, CALIFORNIA 95820 TELEPHONE (910) 383-3601

We feel that the contract has to go out and go to 1 competitive bidding after we acquire these facilities. We 2 felt that the contract expressly provided that he should 3 turn over these facilities. 4

N

б

7

18

19

20

22

23

24

25

He informed us that he wasn't going to turn over 5 the facilities. And he told us that he could litigate this thing and keep it going in the courts for years.

As a result of that, we were forced to attempt 8 to go to alternative procedures, and that is to condemn the 9 property so we can get an order of immediate possession. 10 While we are in litigation with him, he has pulled, you know, 11 a number of things, like when his client is in Orange 12 County, and the property is in Orange County, and the city 13 is in Orange County, to go up and file in the City of Los 14 Angeles. And we've had to go to the Appellate Court to have 15 the case removed back to Orange County. 16

He's just rolling out one barrel after another 17 to continue the litigation. And we think that to allow him to, in effect, to bootstrap himself, and to continue to operate at some percentage that he sets or agrees on at this point in time is not the proper procedure. 21

We think that, you know, if he's ultimately successful in his position, we'd have to go in and condemn it anyway.

So, what we feel should be done at this point in

time is to allow the staff and city to proceed in the best fashion to acquire possession of the properties, get the 2 wells operating. We will be able to then go out and have a contract by competitive bidding and test the market and see what the fair rate is. If we win it, if we win the action ultimately, then we don't have to pay him for any If he wins that action, ultimately we'll have to rights. pay him for any rights. 0

3

4

5

б

7

8

24

25

Whatever we have to do, we have to acquire the Q rights, and we have to acquire them quickly. I don't think 10 we can depend on him or the courts to resolve that litigation 11 fast enough to get those wells in production, number one. 12 And number two, I don't think we should allow him and it's 13 in the public interest to allow him to dictate the terms 14 of a contract, in effect, by refusing to abide by the terms 15 of the preceding contract, bootstrap himself in the position 16 where he can force the city to continue an operating 17 agreement that we don't think is fair to the public. That's 18 our position. 19

MR. ACKERMAN: At any time during the period 20 of the contract, did the city give any indication to 21 Armstrong that you would either renegotiate the contract 22 or continue the terms of the contract? 23

MR. McCORMACK: No, he was notified in - a year ago, almost a year ago, that the city did not intend to

> PETERS SHORTHAND REPORTING CORPORATION 7700 COLLEGE TOWN DRIVE, SUITE 208 SACHAMENTO, CALIFORNIA 95926 LEPHONE (916) 303-3601

renew the contract. Simply extend the contract, that the city intended to go to bidding on the contract.

MR. ACKERMAN: Did you give every indication that you were going to terminate the contract or let it lapse until its expiration date?

MR. McCORMACK: Yes, every indication. Not only ۶. 7 that, but he talks about his demand for arbitration. The facts are that he filed a demand for arbitration, appointing 8 9 his own attorney as one of the arbitrators, which we felt 10 was illegal and improper. We didn't refuse to go to arbitration. We simply filed an objection to that arbitration on the grounds that we felt the issue, meaning the 12 contract, was not an arbitrable issue, that he had improperly designated himself as an arbitrator. And I think our position has been substantiated by recent cases of the State Supreme Court in this state.

17 -And then, the provisions of the arbitration in 18 the contract provided that, even when we responded to it, 19 he was supposed to get together with the arbitrator we 20 appointed to appoint a neutral or third arbitrator, and he 21 never did that. So, he never carried through with his own demands for arbitration. 22

23 So, you know, we think his position is not valid 24 in that direction, either.

MR. ACKERMAN: I have a question of our legal

2	It seems to me at least maybe there's wo

because we don't own all the rights at this point. We have proceeded with numerous condemnation actions to acquire sub-surface rights in the area between the county island 3 and tidelands, and it will acquire approximately 50 percent of those, you know, at considerable expense to the city. But, they have done that. There's some 200 parcels in there, and we're proceeding to acquire the rest of them. 7 We are not in a position to own the surface rights 8

If we can file a condemnation action and get an out here. Q order of immediate possession, have a right to proceed 10 to own those rights or have possession of those rights, 11 then we're in a position to go to a competitive bid on it. 12 Because, we say here's the rights we own; here's the equip-13 ment we own; now what do you bid to operate it? And that's 14 what we want, to get in that position as soon as possible. 15 MS. MORGAN: Well, I don't have any problem with 16 what the staff's recommending, but I don't want that action 17 to imply that we support what I consider to be terribly 18 poor business practice on the part of the city, that they 19 didn't move a little faster. 20

If, as they contend; that the contract is clear, then it seems to me that they would have made an effort sooner to seek competitive bids and proceed with the trust that they have.

I only know what you've told us and what is on our agenda 1 item. But, I'm not enamored with the fact that the city --2 I mean, it does not appear to me that the city has 3 necessarily acted in a very businesslike manner, either. 4 MR. McCORMACK: Well, we have indications from 5 a number of people out in the marketplace that the royalties 6 that would be bid would be substantially higher. 7 MR. BUCHANAM: May I comment, please on this? 8 CHAIRPERSON CORY: I think we're really close 9 to the end of the issue that's before us. 10 MR, BUCHANAN: You'vo had misrepresentations 11 12 before you. BUCHANAN: CHAIRPERSON CORY: I think we've taken as much 21 time, probably more time, than we need to on this particular 22 23 issue. One more question. 24 MR. 2

21

3 If the action is taken today that's suggested 4 in the calendar item, what is the time frame or the likeli-5 hood of those wells producing again?

6 MR. TROUT: I'm not the attorney to answer, but 7 it would depend on the ability of the courts to make a ruling 8 on a request for an order of immediate possession. And 9 assuming that Mr. Buchanan, on behalf of Mr. Armstrong, 10 would appeal that order, it would have to be whatever time 11 It took for that order to become final.

12 MR. ACKERMAN: In other words, you're saying that 13 continuing litigation could keep those yells shut down for 14 an undetermined amount of time?

15 MR. HIGHT: It's clear that the method that's 16 proposed by the Commission today is much faster, more 17 expedient method, than the declaratory relief action that . 18 the city is currently involved in. And this method, I think, 19 could be relatively short, in a matter of -- I hate to 20 venture a guess -- but a couple of months at most.

CHAIRPERSON CORY: Mr. Armstrong.

22 To Mr. Ackerman's question, I'd MR. ARMSTRONG: 23 like to repeat that we are ready tomorrow to turn on those 24 wells with the cooperation of the city at an agreed upon 25 royalty that would allow us to operate the wells at a

That 20 statement of yours might be an area that the staff should 21 be exploring, and I think that is covered by the proposed 22 staff action here. And maybe that might be a possibility, 23 for a third party to be the intermediary function. 24 EXECUTIVE OFFICER NORTHROP: Would Mr. Armstrong 25

ling to negotiate CHAIRPERSON CORY: We're T a solution. The city is not here. 4

It's a worthwhile thing to have been put on the table, and I think the staff should confer with Mr. Armstrong and his attorney and the city and their views to see if that avenue can be explored.

I think, given what limited options we have . before us, we have an issue, and the proposed staff action 10 would permit that negotiation to continue. 11

I think that would be fine. I think MS. MORGAN: the city needs a message from us as well that we're interested in seeing the trust fring fulfilled.

CHAIRPERSON CORY: And the wells in production 15 as quickly as possible. 16

Is that unanimous?

MR. EXECUTIVE OFFICER NORTHROP: This actually will be from Parcel A. And what we're trying to do is get some conditions to the city and express how we'd like to do this, because there are very short time fuse because the contracts are going to expire September 30th. So, they have to get out and rebid these and get back in.

37

7 CHAIRPERSON CORY: And this is really a concept
8 of just cutting them down into small increments to minimize
9 the number of bidding?

10EXECUTIVE OFFICER NORTHROP:We have cut down11the 39 and 40 to smaller increments.

Item 40 ---

EXECUTIVE OFFICER NORTHROP: Mr. Chairman, Item
follows Item 39, except this deals with the Long Beach
Unit, whereas the other was Parcel A.

CHAIRPERSON CORY: It's amazing how often 39 follows

Go ahcad.

23 EXECUTIVE OFFICER NORTHROP: You have to get four
24 people with ten toes.

This is the notification of the Long Beach

PETERS SHORTHAND REPORTING CORPORATION 0 1 7700 COLLEGE TOWN DRIVE, SUITE 209 SACRAMENTO, CALIFORNIA 95826 TELEPHONE (916) 383-3801 1 contractor ---

2 CHAIRPERSON CORY: In a railroad town, that's 3 hard to find.

4 EXECUTIVE OFFICER NORTHROP: That's right.
5 Notification of the City of Long Beach to direct
6 a contract and sell-off crude oil at Tract 1 Unit, Long
7 Beach, and these, too, will be in smaller increments.
8 CHAIRPERSON CORY: Anybody in the audience on this
9 item?

MR. BUCHANAN

CHAIRPERSON CORY: I'm sorry? MR, BUCHANAN: I have my other client's hat on

Robert Buchanan, again, in this case representing
the five companies comprised in the field contract there.
It would be, as you know, in effect a sale
by the field contractor of this oil.

18 Three points with respect to the calendar item19 on this proposed Item 40.

20 One is that the pricing mechanism recommended
21 to you is somewhat similar to that used with sales made
22 last year just going into effect now, but it does not follow
23 Article 9B of the contract.

24 We feel, and we agreed to go along --- that is,
25 my clients agreed to go along with the contracts that are just

now starting despite this pricing clause, or a similar one ۲ last year, but under objection. " And we would do so here, 2 I can't commit my plients to going ahead with it, I believe. 3 but they wished for me to express my objection here. 4 CHAIRPERSON CORY: Continued objection. 5 That's right, And we feel it's MR. BUCHANAN: 6 outside of the law and outside of the contract. 7 (fecondly, with respect to the number of proposed 8 purchases, they're proposed to be 12 here, for an increment 9 of 12 and a half percent. 10 There have been sell-offs, two specific sell-offs, 11 in the last 16 years, the life of this thing. In each case 12 there were three pieces. And those increments were 7 percent, 13 4 percent, and 1 and a half percent. So, the proposal 14 here changes from what's happened in the last 16 years. 15 We have had, through the administrative areas, 16 of the five contractors involved, two of the three just now , 0 17 started -- but of the five contractors total involved, there 18 were some collection problems with two of those five 19 contractors. Of the two new contracts that are just now 20 commencing, we have contract problems that we're trying 21 to get waived out, and we've gone ahead with deliveries, 22 but there's still -- the letter of credit isn't quite proper, 23 and those kinds of things. So, administratively, 12 new **Z**4 parties, vis-a-vis three, is no little thing, despite it 25

may seem so to you.

Secondly, with respect to actual deliveries, it's a physical problem to deliver a lot of oil down there, as I know Mr. Thompson would be aware. I would assume that one or 12 purchasers might be able to make arrangements // with existing pipeline companies. If they were not, then it's going to be one tremendous lot of difficulty down there, physical difficilty, and expense to the unit, as well as just operating difficulties.

We feel that this is an unreasonable number. 10 Again, we feel the city and the state are fequired to be 11 reasonable under these terms, and we feel that 12 is an 12 unreasonable number. 13

We don't know of any reason why it should be 14 12, and why it shouldn't be changed to three. And we 15 recommend that it be left it three, or some number Gven 16 below three, but certainly not 12. 17

Lastly, I call your a tention to the fact that our reading of the contract is that this notice, or if this 19 action of the Commission is premature, both under the law 20 and the contract, the language, as we understand it, says 21 that the notice shall go out when there is no active 22 contract in existence covering any part of this oil. There 23 are contracts in effect covering all of the oil. So, it's 24 premature.

CHAIRPERSON CORY: Do you have any questions? MR. ACKERMAN: Yes.

Bob, I may be a little confused a little bit here, but my understanding of this item and the previous one was that it does not require separate contracts to be done with 12 different companies, but it simply allows it to be done in 12 different pieces, and one company could be successful in bidding on all 12 pieces; isn't that correct?

MR. HIGHT: Yes.

Э.

MR. BUCHAMAN: I suppose that's possible, but that's a speculative thing. And if that one company bid the same bonus on all of thom, yes, I could concede we might have one contract.

MR. ACKERMAN: The intent here is to try and allow to have greater opportunity for bidding, rather than just zeroing in on the three existing contracts.

EXECUTIVE OFFICER NORTHROP: We hope that we can 12. do as you've suggested, one company bidding, or allow as many 18 people in this crude-short world to get some crude. And 19 that's really what our thinking was in the background, that 120 there may be some independents down there that are terribly 21 crude short and would like to bid. And we'd just like to, 22 I guess, spread the poverty, I guess, is the best thing to 23 do, because that's what we're attempting to do. 24 That's all anyone is ever able 25 CHAIRFERSON CORY:

The largest one, 7 percent, the bonus for that was 21.6 cents. Of course, for the other two smaller ones the bonus was 35 cents.

8 We've seen this in the past in a couple of cases,
9 where the larger increments do not command as large a bonus
10 as the smaller ones.

We're also proposing here that you go to sequentia biddings, that you would bid two parcels a day for six consecutive days, so that everyone would have a chance to zero in and get some oil.

CHAIRPERSON CORY: Or to move upwards.

16 MR. ACKERMAN: That would restructure their 17 bids.

MR. BUCHANAN: One thing I think, though, to keep 18 in mind is that the bids sent out this past summer did not 19 result in all that many Anquiries or bids, as is my under-20 standing. Mr. Thompson, I'm sure, has the figures on that. 21 So, I don't think -- we can debate all day about 22 whether you're going to get more bids, and that kind of 23 I'm not mere to do that. " o 24 stuff. But I am here to say that, as I read the law and 25

the contract, the state's only thing that they must do, or can do, is to fix the term of the contract and to send out the notice.

I feel the notice is premature and the term we're not objecting to. But the state has no business doing the rest of it.

The city has. The city is to provide the terms of the contract, reasonable terms, with approval of the State Lands Commission.

Maybe I'm being overly technical, but I'm
suggesting to you that the state is reaching beyond it's
rights, is premature.

Thank you.

CHAIRPERSON CORY: You are aware that, if the
state came to the conclusion, for some reason, that they
wanted to take the entire operation back, they could.
MR. BUCHANAN: With legislative action, yes.
Yes, certainly, I'm not debating that.

CHATRPERSON CORY: We are planning to convey this information to Long Beach for them to decide whether, in their infinite wisdom as trustee, they wish to follow it.

Is that a technical problem with the bidding arrangements?

MR. THOMPSON: Well, I'm not a lawyer here, but it seems to me that we're required under this to direct. That's what the Commission must do: direct the oil to be sold off. We can only do that once every year. The last action was on January 24th, 1980.

We take this to be the Fact that the Commission 10 is going to direct the field contractor, again, ta sell the 11 oil off. 12

MR. ACKERMAN: So then, there is no problem? 13 MR. THOMPSON: Well, the lawyers will have to 14 discuss this. 15

MR, HIGHT: We do not see a problem.
